

# Laos - Vientiane Capital (Ages 13-15) Global Youth Tobacco Survey (GYTS)

## FACT SHEET . . . . .

The Laos - Vientiane Capital GYTS includes data on prevalence of cigarette and other tobacco use as well as information on five determinants of tobacco use: access/availability and price, exposure to secondhand smoke (SHS), cessation, media and advertising, and school curriculum. These determinants are components Laos - Vientiane Capital could include in a comprehensive tobacco control program.

The Laos - Vientiane Capital GYTS was a school-based survey of students in grades 2, 3 and 4 conducted in 2003.

A two-stage cluster sample design was used to produce representative data for Laos - Vientiane Capital. At the first stage, schools were selected with probability proportional to enrollment size. At the second stage, classes were randomly selected and all students in selected classes were eligible to participate. The school response rate was 100.0%, the class response rate was 100.0%, the student response rate was 93.6%, and the overall response rate was 93.6%. A total of 1,642 students aged 13-15 participated in the Laos - Vientiane Capital GYTS.

### Prevalence

- 10.7% of students had ever smoked cigarettes (Boy = 19.0%, Girl = 2.4%)
- 8.9% currently use any tobacco product (Boy = 14.9%, Girl = 2.7%)
- 5.5% currently smoke cigarettes (Boy = 10.2%, Girl = 0.7%)
- 4.3% currently use other tobacco products (Boy = 6.3%, Girl = 2.2%)
- 6.5% of never smokers are likely to initiate smoking next year

### Knowledge and Attitudes

- 15.7% think boys and 5.0% think girls who smoke have more friends
- 8.1% think boys and 4.5% think girls who smoke look more attractive

### Access and Availability - Current Smokers
