

# Myanmar 2011 (Ages 13-15)

## Global Youth Tobacco Survey (GYTS)

### FACT SHEET . . . . .

The Myanmar GYTS includes data on prevalence of cigarette and other tobacco use as well as information on five determinants of tobacco use: access/availability and price, exposure to secondhand smoke (SHS), cessation, media and advertising, and school curriculum. These determinants are components Myanmar could include in a comprehensive tobacco control program.

The Myanmar GYTS was a school-based survey of students in standards 7, 8, 9 and 10 conducted in 2011.

A two-stage cluster sample design was used to produce representative data for Myanmar. At the first stage, schools were selected with probability proportional to enrollment size. At the second stage, classes were randomly selected and all students in selected classes were eligible to participate. A total of 2,666 students participated in the Myanmar GYTS of which 1,652 were ages 13 to 15 years. The overall response rate of all students surveyed was 93.4%.

#### Prevalence

- 14.8% of students had ever smoked cigarettes (Boys = 26.1%, Girls = 3.4%)
- 18.6% currently use any tobacco products (Boys = 30.0%, Girls = 6.8%)
- 6.8% currently smoke cigarettes (Boys = 13.0%, Girls = 0.5%)
- 17.4% currently used tobacco products other than cigarettes (Boys = 27.8%, Girls = 6.7%)
- 13.8% currently use any smoked tobacco products (Boys = 23.5%, Girls = 3.6%)
- 9.8% currently use any smokeless tobacco products (Boys = 15.2%, Girls = 4.0%)
- 8.2% currently smoke cheroot (Boys = 14.0%, Girls = 2.2%)
- 6.2% currently use any smoked tobacco products other than cigarettes or cheroot (Boys = 10.8%, Girls = 1.5%)
- 7.5% currently use tobacco with betel quid (Boys = 11.9%, Girls = 3.0%)
- 4.2% currently use any other smokeless tobacco products other than betel quid (Boys = 6.9%, Girls = 1.4%)
- 14.7% of never smokers are likely to initiate smoking next year

#### Knowledge and Attitudes

- 37.6% think boys and 15.1% think girls who smoke have more friends
- 32.4% think boys and 22.1% think girls who smoke look more attractive

#### Access and Availability - Current Smokers

- 24.4% usually smoke at home
- 39.2% buy cigarettes in a store

#### Exposure to Secondhand Smoke (SHS)

- 32.2% live in homes where others smoke in their presence
- 38.4% are around others who smoke in enclosed public places
- 32.6% are around others who smoke in outdoor public places
- 90.6% think smoking should be banned from public places
- 51.1% think smoke from others is harmful to them
- 47.0% have one or more parents who smoke
- 3.0% have most or all friends who smoke

#### Cessation - Current Smokers

- 90.1% want to stop smoking
- 89.1% tried to stop smoking during the past year
- 76.4% have ever received help to stop smoking

#### Media and Advertising

- 91.8% saw anti-smoking media messages, in the past 30 days
- 69.4% saw pro-cigarette ads on billboards, in the past 30 days
- 58.4% saw pro-cigarette ads in newspapers or magazines, in the past 30 days
- 8.8% have an object with a cigarette brand logo
- 12.5% were offered free cigarettes by a tobacco company representative

#### School

- 65.3% had been taught in class, during the past year, about the dangers of smoking
- 27.5% had discussed in class, during the past year, reasons why people their age smoke
- 52.5% had been taught in class, during the past year, the effects of tobacco use

#### Highlights

- 18.6% of students currently use any tobacco product; 13.8% currently use any smoked tobacco products; 9.8% currently use any smokeless tobacco products
- SHS exposure – one-third of the students live in homes where others smoke, and two in five students are around others who smoke in enclosed public places; close to half the students have at least one parent who smokes
- Half the students think smoke from others is harmful to them
- Nine in 10 students think smoking in public places should be banned
- Nine in 10 current smokers want to stop smoking
- 8.8% of students have an object with a cigarette brand logo on it
- Over nine in 10 students saw anti-smoking media messages in the past 30 days; seven in 10 students saw pro-cigarette ads on billboards and three in five saw pro-cigarette ads in newspapers or magazines in the past 30 days
