

CHAPTER VIII

FARM IMPLEMENTS, DRAUGHT ANIMALS AND STORAGE FACILITIES

1. INTRODUCTION

Agriculture is the single largest sector in the Ethiopian economy. The position of the agricultural sector for the past few decades does not only concern the peasants, but on account of the extent of its inputs, outputs and its function as a largest employer of labour has a profound impact on the entire economy. It is worth to point-out that Ethiopia has large resources in terms of land, agricultural labour, draught animals... etc.

Despite all these facts, the average yield of the main food crops and livestock products attained by private peasant holders is very low and it is not adequate to feed the ever-growing population. Because of such prevailing conditions in the agricultural sector, the economy remained at subsistence level. Among the factors that hampered the country not to prosper is the use of primitive farm implements and tools by the peasants to operate their land and to raise livestock.

The role of improved agricultural implements and tools in raising the standard of farming efficiency and increasing average yield of production has been recognized for many years. Land preparation requires modern power source that results in considerable farm efficiency and expansion of production. Sowing and fertilization are among the agricultural operations where animal and tractor drawn machines appear to be capable of greater efficiency than only hand method. Power-driven line sowing and fertilization are more efficient than hand spreading and this is usually expected to result in higher yield for the same amount of fertilizers and seeds.

The traditional unimproved farm implements used by the peasants and the poor conditions of the draught animals are considered to be among the main factors that retarded the agricultural productivity in the country. On the other hand, the development of farm implements and machineries can also be crippled by small land size holdings, abundant labour in rural area and non-availability of adequate access to

modern farm implements and machineries, which the private peasant holders can afford to rent or buy. In general, effective development of farm implements and machineries takes place when land is abundant and labour is being rapidly absorbed by non-agricultural sector, (WB, 1984).

Since development programmes are in progress in Ethiopia, data generated from censuses and sample surveys on different types of agricultural outputs and inputs are necessary for the formulation of programmes and policies in the sector and thereby for monitoring and evaluation of the impact of the programmes. One of the objectives of this census was to provide benchmark data that can help to assess the growth, quantity, quality and value of farm implements and other farm equipment used by the private peasant holders so as to easily identify the implements that are abundant and those that are in short supply. The structural characteristics of these farm implements and other farm equipment do not change much from year to year and such data are usually obtained from a census of agriculture, which is conducted every 5 or 10 years.

Data on farm implements and other farm equipment have not been collected in Ethiopia and as a result only very little is known about the status and growth of these implements. Thus, in the Ethiopian agricultural census conducted in 2001/2002, data was collected on farm implements, other farm equipment and draught animals. These farm implements include, implements used for clearing land, cultivation, harvesting, threshing and others. In this census draught animals comprises animals engaged specifically in ploughing, threshing and farm transport facilities. Replacement value was one of the variables covered by this census and it is defined as the amount it would cost to replace the farm implement, equipment, draught animals and storage facility with those that are similar in terms of origin, age, quality or condition.

In this chapter the classification of farm implements, farm equipment, draught animals and storage facilities are presented in Section 2. Brief discussions of data on Summary Tables VIII.1 to VIII.4 are also provided in Section 3. Statistical Tables presenting the census results at zonal and wereda levels of the Addis Ababa City Administration are also given as Table series 8.1A-8.25A and 8.1B-8.25B. Finally, the estimates, Standard Errors (S.E.) and Coefficients of Variation (C.V.) on number of holders reporting,

number of farm implements reported and total value are presented in the Annex Table to this chapter.

2. CLASSIFICATION OF FARM IMPLEMENTS, OTHER FARM EQUIPMENT AND DRAUGHT ANIMALS

The farm implements and draught animals reported were classified into the following eight groups: -

- Implements used for clearing land,
- Implements used for cultivation,
- Parts for traditional plough,
- Implements used for harvesting,
- Implements used for threshing,
- Other farm equipment,
- Draught animals for farm activity, and
- Storage facilities.

These eight groups further broken down to include the following implements and other farm equipment:

2.1 Implements used for clearing land:-

- a) Axes,
- b) 'Gejera '(Chopper), and
- c) Shovel.

2.2 Implements used for cultivation:-

- a) Hoe,
- b) 'Mekeskesh',
- c) Pick-Axe, and
- d) Tractor.

2.3 Parts for traditional plough:-

- a) 'Deger',
- b) 'Erfe',
- c) Plough-Beam,
- d) Plough-Tip, and
- e) 'Wegel'-Tip.

2.4 Implement used for harvesting:-

- a) Sickle.

2.5 Implements used for threshing:-

- a) Hay- Fork (metal or wood),
- b) Threshing Stick, and
- c) Winnower (metal or wood).

2.6 Other farm equipment:-

- a) Cart (hauling),
- b) Sprayer (hand operated),
- c) Sprayer (power operated),
- d) Tying Tool, and
- e) Wheelbarrow.

2.7 Draught animals:-

- a) Animals deployed specifically in ploughing.
 - Ass/Donkey,
 - Camel,
 - Horse,
 - Mule, and
 - Ox.
- b) Animals deployed in threshing or transportation: -
 - Ass/Donkey, - Horse, and
 - Camel, - Mule,
 - Cattle (Working Age),

2.8 Storage facilities:-

- a) 'Debignit'(Local storage),
- b) 'Gottera' (Local storage),
- c) 'Gudguad'(Local storage), and
- d) Modern storage.

Definitions of storage facilities

'Debignit': - is a round vessel of earthenware storage attached with the wall of a house. The shape of 'Debignit' is similar to the shape of a barrel. Debignit is usually around 1 metre high and 0.5-1 metres wide.

'Gottera': - is storage made of bamboo plant. The bamboo is split and then crisscrossed and woven like a giant basket. Finally, it is laminated with a mixture of animal dung and dry grass. 'Gottera' is usually about 1-3 metres high and about 1 metre wide

'Gudguad':- is an underground storage, which is formed by digging the ground with certain depth and radius. The wall of 'Gudguad' is usually laminated with animal dung.

Modern storage: - is a storage that has a better quality in protecting grains from humidity and pests than the above-mentioned storages.

3. ESTIMATES OF FARM IMPLEMENTS, DRAUGHT ANIMALS AND STORAGE FACILITIES.

The type, quality and quantity of tools and implements in use usually indicate the level of farming practice and agricultural development of a country. Hence, the results of this census can give us some highlights to evaluate the farming system in the rural areas of Addis Ababa City Administration. In this report farm implements are grouped in terms of their operation and this can help to make appropriate comparisons.

3.1 Farm Implements and Tools

The data in Summary Table VIII.1 indicates that the number of holders reporting axe was the highest followed by shovel while 'Gejera' (Chopper) was the lowest. In the rural areas of Addis Ababa City Administration it is estimated that there were about 12,998 crop holders of which about 9,674 (74.43%) reported to own axes, about 53.43% reporting shovels, and 2.85% reporting 'Gejeras' (choppers). Among the farm implements used for clearing land the number of observation for axe was highest and the total value for axe was also the highest followed by shovels and 'Gejeras'. The expected duration of service of an axe was estimated to be 20 years, while for shovel it was 10 years.

One of the labour and power intensive farm activities is cultivation. It comprises digging, ploughing, sowing and weeding. In order to accomplish such operations, the Ethiopian peasants use hoe, 'Mekeskesha', pick-axe, and traditional plough. Among these farm implements and tools pick-axe was the highest in terms of number of holders reporting, total number of implements reported and total value. The second highest was hoe while 'Mekeskesha' was the lowest. The data in Summary Table VIII.4 reveled that the percentage distribution of the number of crop holders that owned one, two, three, and four pick-axes was 57.09%, 5.22%, 0.65%, and 0.15%, respectively.

3.2 Draught Animals

Peasants in Ethiopia use domestic animals for draught purpose. In several parts of the country since holdings are far from residence and as a result asses, horses, mules and camels are used to transport various types of goods and agricultural products from holding to residence and vice-versa. As it is indicated from the data in Summary Table VIII.2 among the draught animals in the City Administration that are used for ploughing, ox was the highest in terms of number of holders reporting, number of oxen reported and total value the oxen amounted to 24 million Birr. About 9,884 holders (76.04% of the total crop holders in the City Administration) reported 41,255 cattle used for threshing and these cattle had a value of over 32 million Birr and the average replacement value of a working age cattle was about 203.26 Birr. It was also indicated

that asses and horses were used by the holders for threshing and transportation. The estimated number and percentage distribution of crop holders in rural areas of Addis Ababa City Administration that owned implements, equipment and draught animals are shown in Summary Table VIII.4. Thus, the data resulting from the agricultural census shows that there were about 12,998 crop holders in rural areas of the City Administration. Among these 8.69%, 32.04%, 6.87%, 18.35%, and 6.02% holders owned one, two, three, four, and five and above oxen. On the other hand about 28.04% of the holders did not own ox. For details, see Summary Table VIII.4.

3.3 Storage Facilities

One of the methods that minimize post harvest production losses is the usage of modern storage facilities. During the census, data was collected on modern storage facilities and the unimproved local storage facilities such as 'Debignit', 'Gotera' and 'Gudguad'. In this census, buildings or any structure used as storage facilities and other containers that have better storage quality to protect agricultural products from humidity and pests are considered as modern storage facilities.

The data in Summary Table VIII.3 shows the number of crop holders in the City Administration reporting storage facilities and number of such facilities. Thus, the data in the table reveals that 'Debignit' was reported by the highest number of holders. On the other hand, 'Gudguad' and modern storage were reported by insignificant number of holders. The total value of all reported storage facilities was assessed to be 215,526 Birr, of which 65.88% and 34.12% comprises of Debignit and Gotera, respectively. The percentage distribution of the number of crop holders that owned 'Gotera', 'Gudguad', 'Debignit' and modern storage is also presented in Summary Table VIII.4.

SUMMARY TABLE VIII.1: -Number and Percentage of Holders Reporting Implements and Other Farm Equipment by type, Quantity Reported, Replacement Value, and Duration of Implement, for Private Holdings.

Implements and Equipment	Number of Holders Reporting	Percent of Total Holders	Number of Implements and Equipment		Total Value of Imp. and Eq. (Birr)	Average Replacement Value Per Imp. and Eq. (Birr)	Average Duration of Service of Imp. and Eq. (Years)
			Total Reported	Average ¹ Per Holder			
Used for Clearing Land							
Axes	9,674	74.43	14,257	1.10	170,633	8.06	20
'Gejeras' (Choppers).....	370	2.85	377	0.03	6,354	16.22	*
Shovels	6,945	53.43	7,646	0.59	108,781	12.96	10
Used for Cultivation							
Hoes	3,289	25.30	3,590	0.28	61,384	15.26	14
'Mekeskeshas'.....	462	3.55	493	0.04	10,416	20.46	*
Pick-Axes.....	8,204	63.12	9,111	0.70	142,473	13.90	16
Tractor	-	-	-	-	-	-	-
Parts for traditional Plough							
'Degers'.....	10,121	77.87	27,237	2.10	116,105	1.64	2
'Erfes'.....	10,086	77.60	26,684	2.05	99,234	1.46	1
Plow-Beams	10,116	77.83	25,489	1.96	330,334	5.07	5
Plow- Tips.....	10,135	77.97	17,452	1.34	231,632	7.78	6
'Wegel' – Tips	9,993	76.88	17,000	1.31	85,626	3.00	5
Yokes	10,090	77.63	17,439	1.34	209,443	6.94	7
Used for Harvesting							
Sickles	11,271	86.71	22,406	1.72	375,795	8.53	5
Used for Threshing							
Hay-Forks (metal).....	8,496	65.36	12,750	0.98	248,836	13.26	13
Hay-Forks (wood).....	524	4.03	714	0.05	7,989	7.88	10
Threshing Sticks	146	1.12	248	0.02	883	2.89	2
Winnowers (metal)	*	-	*	-	*	*	*
Winnowers (wood)	6,663	51.26	7,530	0.58	139,518	16.25	11
Other farm Equipment							
Carts	*	-	*	-	*	*	*
Sprayers (Hand operated)	*	-	*	-	208,349	*	*
Sprayers (Power operated) ..	-	-	-	-	-	-	-
Tying Tools.....	-	-	-	-	-	-	-
Wheelbarrows	*	-	*	-	*	*	*

- Average¹ per holder is the ratio of total number of each implement reported to total number of crop holders in rural areas in the region.
- Total number of crop holders comprises, holders participated in crop production only and both crop production and livestock rearing.

SUMMARY TABLE VIII.2:-Number and Percentage of Holders Reporting Draught Animals, Quantity Reported, Replacement Value, and Average Age of Animal, for Private Holdings.

Animals	Number of Holders Reporting	Percent of Total Holders	Number of Animals		Total Value of Animals (Birr)	Average Replacement Value Per Animal (Birr)	Average Age of Animal (Years)
			Total Reported	Average ¹ Per Holder			
Used for Ploughing							
Asses	*	-	*	-	*	*	*
Camels.....	-	-	-	-	-	-	-
Horses	-	-	-	-	-	-	-
Mules.....	-	-	-	-	-	-	-
Oxen.....	9,353	71.96	26,529	2.04	24,816,334	329.25	8
Used for Threshing or Transportation							
Asses	8,552	65.79	12,999	1.00	3,918,132	199.84	9
Camels.....	-	-	-	-	-	-	-
Cattle	9,884	76.04	41,255	3.17	32,700,841	203.26	8
Horses	175	1.35	183	0.01	136,564	720.12	7
Mules.....	64	0.49	69	0.01	88,607	1,220.25	15

- Average¹ per holder is the ratio of total number of each draught animal reported to total number of crop holders in rural areas in the region.
- Total number of crop holders comprises, holders participated in crop production only and both crop production and livestock rearing.

SUMMARY TABLE VIII.3: - Number and Percentage of Holders Reporting Storage facilities, Quantity Reported, Replacement Value, and Storage Capacity, for Private Holdings.

Sorage Structure	Number of Holders Reporting	Percent of Total Storage Holders	Number of Storages		Total Value of Storages (Birr)	Average Replacement Value Per Storage (Birr)	Average Storage Capacity Per Storage (Quintal)
			Total Reported	Average ¹ Per Holder			
'Debignits'.....	3,734	28.73	8,769	0.67	141,998	6.44	10
'Gotteras'	685	5.27	1,176	0.09	73,528	36.65	13
'Gudguads'	*	-	*	-	*	*	*
Modern Storage Structures ...	*	-	*	-	*	*	*

- Average¹ per holder is the ratio of total number of each storage facility reported to total number of crop holders in rural areas in the region.
- Total number of crop holders comprises, holders participated in crop production only and both crop production and livestock rearing.

SUMMARY TABLE VIII.4:-Number of Crop Holders that Owned Farm Implement, Equipment and Draught Animals.
