

01. **Sample Size:** Conduct a total of 68 household surveys in each of the 36 PBSs. Geographic regions to be covered will be randomly distributed, representative of the target population and result in a statistically robust and relevant sample
02. **Collect all relevant data/information on lighting use as per the questionnaire in Annex A¹.** This will include but not be limited to the following:
 - ⇒ Number of ILs and CFLs in the household
 - ⇒ Number of hours of usage
 - ⇒ Hours of power failures during the winter and monsoon seasons
 - ⇒ Household knowledge of and attitudes towards energy efficient lights
03. **Collect all relevant data/information on lighting use as per the questionnaire in Annex A.** This will include but not be limited to the following:
 - ⇒ Number of ILs and CFLs in the household
 - ⇒ Number of hours of usage
 - ⇒ Hours of power failures during the winter and monsoon seasons
 - ⇒ Household knowledge of and attitudes towards energy efficient lights

4. The consultant will furthermore produce the following results:

Consultant will submit a detail report.

(e.g. table of contents of the final summary report)

- 5 No. of Copies
 Language: English
 Reporting Date: July 31
 Duration of contract: June 1 to July 31, 2009

¹ Annex A will be the questionnaire similar to the one used in the CEA urban lighting loan study of February 2009. The questionnaire conforms to the format prescribed by Annex I in the AMSII.J methodology.
