Objective: Summary vehicle report for Maryland/River Gee counties

Listed below is a summary of vehicle usage and breakdowns from the CWIQ project supervisors based in Maryland and River Gee counties. The detailed log sheets are being sent to your office also. There were several occasions where the vendor supplied a temporary replacement vehicle (usually the mechanic's) while their primary vehicle was being repaired. Consequently, project supervisors are reclaiming only the days that the vehicle broke down and affected the work, i.e., they could/did not work/travel.
