

REPRODUCTIVE HEALTH SURVEY – Nicaragua 2006

The files of the Reproductive Health Survey of Nicaragua 2006 are in the following structure of directories and files:

Nicaragua 2006				
..\Females				
..\Final_Report	NICARAGUA-2006 - ENCUESTA NICARAGUENSE DE DEMOGRAFIA Y SALUD ENDESA 2006-07.pdf		Contains the final report in PDF format	
..\Questionnaires	Nicaragua 2006_ Cuestionario con nombre de variables.pdf		Contains the household and the individual questionnaires in PDF format, and includes variable names for all variables in the questionnaires.	
..\SAS	..\Data	ni06f_creadas.sas7bdat	This file is a SAS dataset and contains all questionnaire variables and created variables.	
			This files has: 19140 households and, 14221 women of reproductive age (WRA 15-49 years) with completed interview. (MRESUL=1)	
		ni06f_hijos.sas7bdat	SAS dataset that contains one record for each live birth, in the births history.	
			This file has: 34055 live births	
	..\Formats	formats.sas7bcats	This is the SAS catalog of formats	
..\Sasprogs	\File_creation	ni06f_creadas.sas	This SAS syntax file contains the definitions of new variables based on variables in the questionnaire. This file contains the following variables that are needed to weight the data:	
			<i>PESOVIV - defines the relative weights assigned for each stratum in the sample.</i>	
			<i>PESOMEF - weight variable that <u>should be used in all calculations for women with a completed interview</u>, which takes into account the strata weight and the number of women of reproductive age in the household (only one woman 15-49 was selected per household).</i>	

PESOHJO - another weight variable to be used for analyses on variables collected for just one randomly selected child under 5 (**Use in questions 441 thru 469 in the questionnaire**). Using this weight gives results that are representative of all children under 5 (it compensates for unequal probabilities of selection).

ni06f_haga_hijo.sas	This is a SAS syntax file that reads from “ni06f_creadas.sas7bdat” and creates the SAS dataset “ni06f_hijos.sas7bdat”, which contains one record for each live birth in the births history.
---------------------	---

setlib.sas	This SAS syntax file defines the directories in which the SAS datasets and format library are located. (users must change the path according to their own structure)
-------------------	--

..\SPSS	ni06f_creadas.sav	Contains the data for women in SPSS format
	ni06f_hijos.sav	Contains the data for live births in SPSS format
..\STATA	ni06f_creadas.dta	Contains the data for women in STATA format
	ni06f_hijos.dta	Contains the data for live births in STATA format

Ni06_Readme.PDF: Contains the directory structure and file descriptions for Nicaragua 2006
