REPRODUCTIVE HEALTH SURVEY – El Salvador 2008

The files of the Reproductive Health Survey of El Salvador 2008 are in the following structure of directories and files:

El Salvador 2008				
..\Females				
	..\Final_Report	EL SALVADOR-2008_ Encuesta Nacional de Salud Familiar 2008.pdf		Contains the final report in PDF format
	..\Questionnaires	Cuestionario_El Salvador_2008_Nombre de variables.pdf		Contains the household and the individual questionnaires in PDF format, and includes variable names for all variables in the questionnaires.
	..\SAS	**..\Data**	sv08f_creadas.sas7bdat	This file is a SAS dataset and contains all questionnaire variables and created variables. This files has: **21595** households and, **12008** women of reproductive age (**WRA 15-49 years**) with completed interview. (**RESULT=1**)
			sv08f_hijos.sas7bdat	SAS dataset that contains one record for each live birth, in the births history. This file has: **25228 live births**
		..\Formats	formats.sas7bcat	This is the SAS catalog of formats
		..\Sasprogs **\File_creation**	sv08f _creadas.sas	This SAS syntax file contains the definitions of new variables based on variables in the questionnaire. This file contains the following variables that are needed to weight the data: *PESOVIV - defines the relative weights assigned for each stratum in the sample.* *PESOMEF - weight variable that **should be used in all calculations for women with a completed interview**, which takes into account the strata weight and the number of women of reproductive age in the household (only one woman 15-49 was selected per household).*

		PESOHIJO - another weight variable to be used for analyses on variables collected for just one randomly selected child under 5 (__Use in questions 431 thru 471 in the questionnaire__). Using this weight gives results that are representative of all children under 5 (it compensates for unequal probabilities of selection).
		PESOMNut- defines the relative weights for anthropometric analysis.
	sv08f_haga_hijo.sas	This is a SAS syntax file that reads from "sv08f_creadas.sas7bdat" and creates the SAS dataset "sv08f_hijos.sas7bdat", which contains one record for each live birth in the births history.
	setlib.sas	This SAS syntax file defines the directories in which the SAS datasets and format library are located. (users must change the path according to their own structure)
..\SPSS	sv08f_creadas.sav	Contains the data for women in SPSS format
	sv08f_hijos.sav	Contains the data for live births in SPSS format
..\STATA	sv08f_creadas.dta	Contains the data for women in STATA format
	sv08f_hijos.dta	Contains the data for live births in STATA format

Sv08_**Readme.PDF: Contains the directory structure and file descriptions for El Salvador 2008**
