

EMPLOYMENT PATTERNS IN FINANCIAL INTERMEDIATION SECTOR (establishments with 20 or more workers)

(Ninth of a series on employment)

This LABSTAT is the ninth issue on a series of reports that focuses on patterns of employment in specific industry based on the results of the 2003/2004 BLES Integrated Survey (BITS). The BITS aims to provide integrated data sets on employment patterns, industrial relations practices and occupational injuries in non-agricultural establishments with 20 or more workers. The survey covered a sample size of around 6,000 establishments and was conducted last year in coordination with DOLE Regional Offices.

OVERVIEW

Total employment in the financial intermediation sector was placed at 101,788 as of the payroll period June 30, 2004. This translates to 4.2 percent of the 2.413 million total employed in non-agricultural establishments with 20 or more workers. (*Table 1*)

This sector is divided into four (4) sub-groups. The first group is composed of banking institutions (except central banking) which employed nearly two-thirds (62.2% or 63,305) of the sector's total workforce.

The other three (3) minor divisions were comprised of non-bank financial institutions (16.9%), insurance and pension, except compulsory social security (12.7%)

and activities auxiliary to financial intermediation (8.2%). (*Table 2*)

Type of Workers

The employment pattern in this sector stood out across industry groups as it recorded the smallest proportion of rank and file workers (64.7%). This figure is well below the all-industry average of 86.0 percent (see LABSTAT Updates Vol. 9 No. 47).

This difference reflects the nature of financial intermediation business which is top heavy in terms of managerial and professional workers. Specifically, the proportion of managers, executives and supervisors in this sector (34.8%) was almost three times the overall industry average (13.1%).

Nature of Employment

Majority (90.4% or 91,967) of the workforce in this sector were regular or permanent workers. This is expected as workers in this line of business were dominated by professionals and technical workers.

Non-regular workers were minimal in this sector as they accounted for less than 10 percent of the total workforce (9.2% or 9,347). This category of workers was composed mainly of probationary workers (5,099), casual workers (2,588) and contractual/project-based workers (1,374). (Table 1)

Basis of Payment

Corollary to above, virtually all (99.1% or 100,915) workers in this industry were time-rate workers. Of the total employment, 93.8 percent were paid on monthly basis and only 4.8 percent on daily basis.

The number of output workers was almost non-existent among establishments venturing in this line of business. (Table 1)

TABLE 1 - Employment Patterns in Financial Intermediation Establishments with 20 or More Workers, Philippines: June 30, 2004

INDICATOR	Number	Percent
TOTAL EMPLOYMENT	101,788	100.0
Type of Workers		
Working Owners/Unpaid Workers	a	-
Paid Employees	101,314	99.5
Managers/Executives	21,882	21.5
Supervisors/Foremen	13,565	13.3
Rank and File	65,867	64.7
Regular Workers	56,520	55.5
Non-Regular Workers	9,347	9.2
Nature of Employment		
Paid Employees	101,314	99.5
Regular Workers ¹	91,967	90.4
Non-Regular Workers	9,347	9.2
