Characteristics of Poor Families in the Philippines
(Findings from the 2008 Annual Poverty Indicators Survey)

Two in three heads of poor families have at most an elementary education

- Heads of the families belonging to the bottom 30% income stratum tend to be less educated compared to heads of families in the upper 70% income stratum. The bottom 30% of all families in this report represents the poor families. Two out of three (65%) family heads belonging to the bottom 30% income stratum had at most an elementary education (Table 1). In comparison, 34 percent of family heads belonging to the upper 70% income stratum were of similar levels of education (no grade completed/pre-school, 2%; elementary undergraduates, 15%; and elementary graduates, 17%).

- About three out of ten (27%) family heads in the upper 70% income stratum had attended college or higher level of education, while only 5 percent of family heads in the bottom 30% income stratum had attained that level of education.

- Overall, three-fourths of all family heads did not reach college, that is, 21 percent of them were elementary undergraduates, 20 percent were elementary graduates, 12 percent were high school undergraduates and 22 percent were high school graduates. Only three percent had no grade completed. Those who had some college education comprised 10 percent and those who graduated from college, 11 percent.

Two in every five poor Filipino families do not have electricity in their homes

- Based on the results of the 2008 Annual Poverty Indicators Survey, 36 percent of families in the bottom 30% income stratum do not have electricity in their homes compared to 8 percent among families in the upper 70% income stratum (Table 2).

- At the national level, 16 percent of all families do not have electricity.

- Regions with the highest percentages of families without electricity are Autonomous Region in Muslim Mindanao (ARMM) (43%), MIMAROPA (33%) and Zamboanga Peninsula (33%).

Seven in ten poor families have access to safe water

- Seven in 10 families that belong to the bottom 30% income stratum have access to safe water compared to nine in 10 families in the upper 70% income stratum (Table 3).

- Overall, 84 percent of the total families have access to a safe source of water supply. Considered as clean and safe sources of water supply are community water system and protected well. The remaining 16 percent of families obtain their water from sources considered unsafe, such as unprotected well (5%), developed spring (4%), undeveloped spring (2%), river, stream, pond, lake or dam (1%), rainwater (less than one percent), and tanker truck or peddler (3%).

- Four regions in Luzon have over 90 percent of their families with access to safe water. These are Central Luzon (96%), Cagayan Valley (93%), Ilocos (93%) and National Capital Region (NCR) (92%).

- In ARMM, less than half (49%) of the families have access to safe water.

Table A. Percentage of Families with Access to Safe Water, by Region and Income Stratum: 2008

Region	All Families	Lowest 30%	Highest 70%
Philippines	84.1	71.3	89.6
National Capital Region	91.6	83.1	92.2
Cordillera Administrative Region	83.6	78.3	85.9
I - Ilocos	92.9	87.7	95.0
II - Cagayan Valley	93.2	92.8	93.5
III - Central Luzon	95.6	89.9	96.7
IVA - CALABARZON	90.2	78.3	92.6
IVB - MIMAROPA	75.9	67.8	83.7
V - Bicol	74.9	63.2	84.4
VI - Western Visayas	79.9	69.5	86.5
VII - Central Visayas	80.8	67.7	87.7
VIII - Eastern Visayas	83.8	76.8	89.9
IX - Zamboanga Peninsula	70.7	59.4	81.7
X - Northern Mindanao	80.6	72.2	86.9
XI - Davao	72.8	59.3	80.6
XII - SOCCSKSARGEN	79.4	71.5	85.9

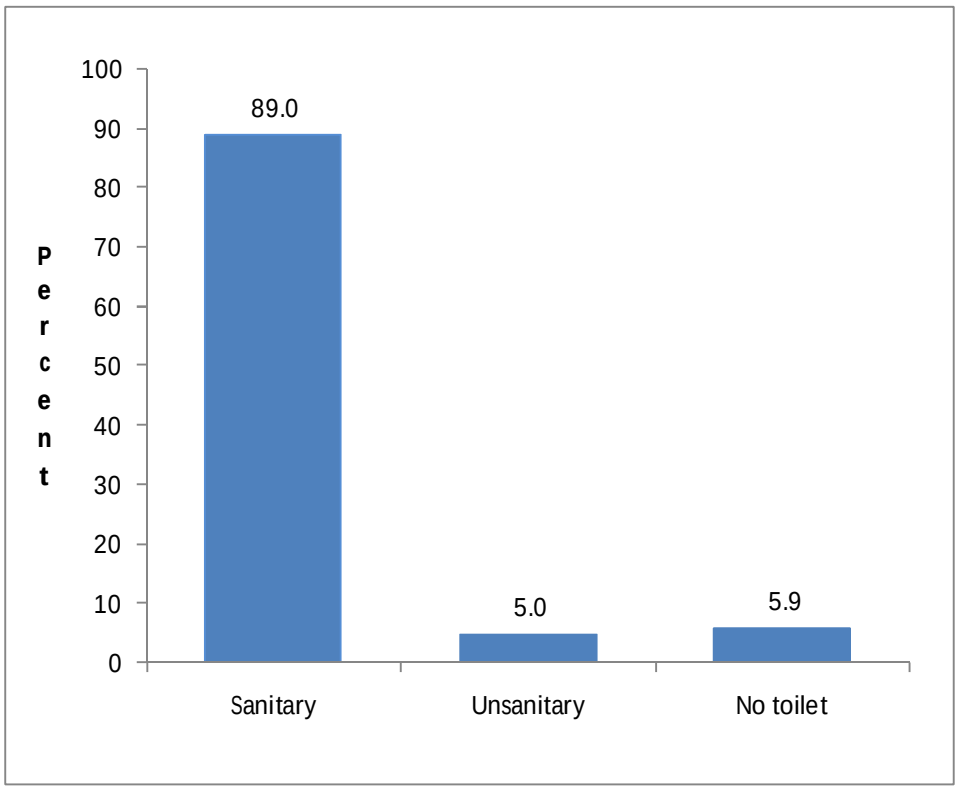
One in four poor families has no sanitary toilet

- Poor families are more likely to use an unsanitary toilet than non-poor families. Sanitary toilet refers to flush toilet (either owned or shared) and closed pit type of toilet facility. The percentage of poor families without sanitary toilet at home is 24 percent compared to five percent among non-poor families (Table 4).

- At the national level, the proportion of Filipino families using sanitary toilets is 89 percent. Other families use open pit (3%), drop or overhang (1%) and pail system (1%), which are considered unsanitary toilets. There are six percent families without toilet facilities in their homes at all.

- Regions with over 20 percent of families without sanitary toilets are Central Visayas (21%) and ARMM (52%).

FIGURE 1 Families by Type of Toilet Facility Used: 2008 APIS



Sixty-five percent of poor families in the country own the house and lot they occupy

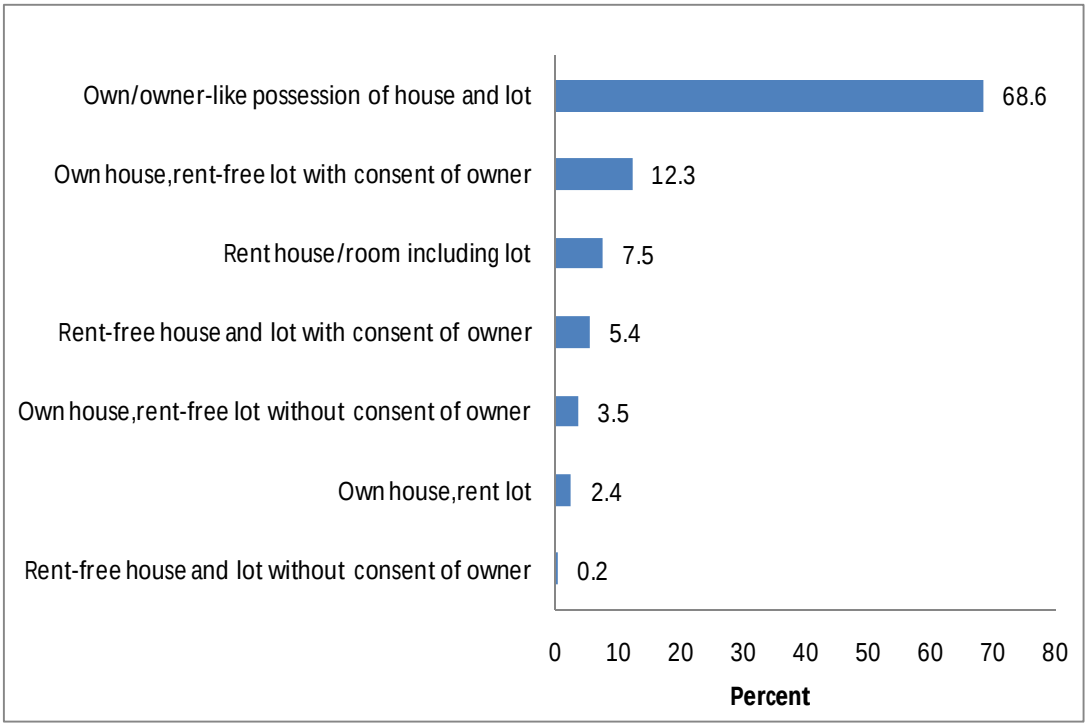
- Among the families in the bottom 30% income stratum, 65 percent own their house and lot while among the upper 70% income stratum, 70 percent.

- In NCR, only 31 percent of families in the bottom 30% income stratum own the house and lot they are occupying.

- Among the regions, NCR (49%) and Western Visayas (54%) have the lowest percentage of families owning house and lot.

- At the national level, 69 percent of families in the country own the house and lot they occupy (Table 5). The remaining 31 percent occupy houses and lots under the following tenure: own house, rent-free lot with consent of owner (12%), rent house/room including lot (8%), rent-free house and lot with consent of owner (5%), own house, rent-free lot without consent of owner (4%), own house, rent lot (2%), and rent-free house and lot without consent of owner (less than one percent).

FIGURE 2 Families by Tenure Status of House and Lot they Occupy: 2008 APIS



Majority of Filipino families are residing in single houses

- Nine in ten (93%) Filipino families are residing in single houses (Table 6). The other families dwell in either apartment/accessoria/ condominium/townhouse (4%), duplex houses (3%), or commercial/ industrial/agricultural buildings (less than one percent).

- In NCR, 16 percent are living in apartments, accessoria, condominiums or townhouses. Hence, a much lower percentage (78%) of families in the NCR are living in single houses.

Table 2. Families with Electricity in House/Building they Reside in, by Region and Income Stratum: 2008
