## INSTRUCTIONS FOR PAGE 17

Alcoholic beverages. Ask the respondent whether he consumed alcoholic drinks in bars, beerhalls and shebeens in the past week. Specify the type of drink consumed in the past week. Further specify the value of each type of drink and indicate where it was consumed (fill in code).

Snacks consumed at cafés, beerhalls, fish and chip shops, etc. Ask the respondent whether he had consumed food, cakes, sweets, etc. at cafés, canteens, restaurants and beerhalls in the past week. Specify the item consumed in the past week. Further specify the value of each type of drink and indicate where it was consumed (fill in code).

Support to relatives. Ask the respondent whether he supports persons by sending them cash or food or clothing, e.g. family or parents in a rural area.

If cash was given as support during the past 12 months, state the relationship of the receiver of the cash to the respondent in the relevant column. Indicate the sum sent to each of such persons in the 'amount' column and indicate the area to which the cash was sent.

This section is important because we want to find out how much money is being sent out of the area and to what extent the homelands depend on it.

Holidays. If the respondent was away on holiday during the past 12 months, ask him/her what amount was spent on the items listed in the table. Indicate the approximate sum spent on each of these items in the relevant column and whether persons spent their holiday inside the area (but away from home) or outside the area in which the household resides. Be careful not to duplicate food items, i.e. a food item stated here must not be among food expenditure items earlier in the questionnaire.

If the respondent was away from home for a week-end during the past month, find out what sum was spent on the items listed in the table and indicate the sum spent on each of these items in the value column.

Savings. Establish from the respondent whether he is in possession of a savings book. Specify out of the relevant savings book the recent balance as well as the balance 12 months ago.

INSTRUCTIONS FOR PAGE 1

Determine the number of independent families in the dwelling before filling in anything on page 1. If more than one family lives in the dwelling, use the selection scale below to select the family to be interviewed.

Next to index number 1 write in the first name of the head of the family being interviewed. Thereafter (from index number 2) write in the names of the head's family members next to the index numbers, followed by the names of all other persons living in the dwelling.

Fill in all the information required for each person:

<u>Relationship to head</u>	fill in e.g. wife, daughter, son, grandson, lodger, boarder
<u>Sex</u>	fill in M for male and F for female
<u>Age</u>	fill in age at last birthday
<u>Marital status</u>	fill in M for married, S for single, W for widowed or D for divorced
<u>Occupation</u>	fill in e.g. labourer, clerk, domestic servant, housewife, scholar, unemployed, etc.
<u>Education</u>	fill in the highest level of education attained by each person, e.g. none, Std. III, diploma, B.A., etc.
<u>Income</u>	fill in the gross cash income of all persons in employment.

Contribution to household - In this column fill in for all persons with a cash income whether the whole (W), part (P) or none (N) of this income is contributed to the household and indicate the weekly or monthly amount of the distribution, if any, in the applicable column. The head and the wife are assumed in all cases to be contributing the whole of their income to the household.

Birthplace - Fill in the name of the town/district in which each person was born.

Year came to this town - Fill in year during which each person in the household came to this town either to live or work. If born in this town fill in 'birth'.

Before going any further establish the composition of the household, in other words sort out the persons who comply with the definition of a household given earlier. Make an X next to the index numbers of all persons who do not belong to the household. Such persons can be recognised by looking at the details in the 'contribution to household' columns. Persons who contribute none of their income to the household are not members of the household. Persons who contribute part of their income but keep R20 and more for their own use also are not members of the household. Exclude the income and personal expenditure of all such non-members of the household in the rest of the questionnaire.

Religion of household head - Indicate the religion of the head by making a cross in the relevant block. If what is written in the blocks is not applicable, write in the religion in the block marked 'other'. The same applies to Tribe of the Head (Bantu only). 'No Tribe' refers to persons formerly passing as Coloureds.

Home language - Make a cross in the relevant block to indicate the language normally (mostly) spoken in the household.

N.B. This applies only to Coloured and Indian households.

SELECTION SCALE

HOUSEHOLD TO BE INTERVIEWED											
NUMBER OF HOUSEHOLDS IN DWELLING UNIT/NUMBER OF FLOORS/		1	2	3	4	5	6	7	8	9	10
NUMBER OF FLATS PER FLOOR		11	12	13	14	15	16	17	18	19	20
<u>HOUSEHOLD TO BE INTERVIEWED</u> (select on basis of age of household head/number of floors in building/number of flats per floor)											5

Use this selection scale where:

(a) the address on the questionnaire leads you to a stand with more than one dwelling on it. In such cases, first establish the number of dwellings and mark that number on the typed figures across the top of the table, e.g. if there are 3 dwellings, mark the typed number 3. Then establish the ages of the head of the household in each dwelling on the site and number them from the oldest to the youngest, e.g. the oldest = number 1, the second oldest = number 2, etc. Then look at the scale underneath the typed number you marked, e.g. number 3. There you will find a written number. This number gives you the dwelling to be visited, e.g. if the written number is 2, go to the dwelling with the second oldest household head on the site.

(b) Where the address leads you to a building consisting of flats. If the building has 5 floors, go to the floor indicated in writing under the typed figure 5. Then find out how many flats there are on the floor, e.g. 6, and call at the flat number shown in writing under the typed number 6. Where a building has more than 10 floors or a floor has more than 10 flats, use the unit and disregard the ten, e.g. if there are 15 flats on a floor, use the written number under the typed 5.

(c) Where the address on the questionnaire leads you to a dwelling with more than one household. If the dwelling has, say, 3 households living in it, mark the typed number 3. Then establish the age of each household head and number them from 1 to 3 according to their age. The number in writing underneath No. 3 indicates the household to be interviewed, e.g. if the number in writing is 2, interview the household with the second oldest head.

## INSTRUCTIONS FOR PAGE 6

Rented property - if the household lives on rented property, state the sum paid for each applicable item listed under this heading. An amount for 'gas', if any, must only be given if it is paid to the local authority. In cases where water and electricity charges are included in the rent, do not insist on a separation. Just indicate that these items are included in the rent.

Board and lodging - in some cases the selected household may be boarders. State the monthly sum the household pays for board and lodging.

Servants - state the number of full-time and/or part-time servants and the monthly or weekly wages, as applicable. Other expenses on servants include such items as registration fees, doctor fees paid for servants, etc.

Own property - If the household owns the property on which it resides, indicate in the relevant block whether the property is fully paid or whether it is still being paid off by the household. Write the data on which the property was bought by the household in the block provided. Ask the respondent to give you an estimated market value of the property (what he may get if he sells the property) and state the estimated figure in the space allowed. Also find out from the respondent the amount that might be obtained if the property were rented out to somebody else, and state the amount in the space allowed. State the amount in the case of each applicable expenditure item listed. If sewerage, water and electricity charges are included in the instalment, do not insist on a separation. Just indicate that these items are included in the instalment.

INSTRUCTIONS FOR PAGE 20

Alcoholic beverages. Ask the respondent to give you the names of household members who have consumed alcoholic drinks in bars, beerhalls and shebeens in the past week. Fill in their index numbers (see p. 1) in the space provided (underneath each other in the table). Specify for each index number the type of drink consumed in the past week.

Further specify the value of each type of drink and indicate where it was consumed (fill in code).

Snacks consumed at cafés, beerhalls, fish and chip shops, etc. Ask the respondent to give you the names of household members who have consumed food, cakes, sweets, etc. at cafés, canteens, restaurants and beerhalls in the past week. Fill in their index numbers (see p. 1) in the space provided. Specify for each index number the item consumed in the past week.

Further specify the value of each type of drink and indicate where it was consumed (fill in code).

Support to relatives. Ask the respondent whether members of the household support a person or persons outside the household by sending them cash or food or clothing, e.g. a girl friend with a baby in town or parents in a rural area.

If support is given in kind, e.g. clothing or food, to people outside the household complete Table A under this heading. Ask the respondent which of the items were given or sent away as support. If the item sent is not listed, specify it under 'other'. Indicate the value of each item mentioned during the past 12 months in the relevant column. Also indicate where such items were bought and the area to which it was sent. 'Inside area' refers to the town in which the household resides (this could even be the same township) and 'outside area' to any other area, e.g. homelands or other town.

If cash was given as support during the past 12 months, complete Table B under this heading. State the relationship of the receiver of the cash to the head of the household in the relevant column. Indicate the sum sent to each of such persons in the 'value' column and indicate the area to which the cash was sent.

This section is important because we want to find out how much money is being sent out of the area and to what extent the homelands depend on it.

Holidays. If members of the household were away on holiday during the past 12 months, ask the respondent what amount was spent on the items listed under Heading A in the table. Indicate the approximate sum spent on each of these items in the relevant column and whether persons spent their holiday inside the area (but away from home) or outside the area in which the household resides. Be careful not to duplicate food items, i.e. a food item stated here must not be among food expenditure items earlier in the questionnaire.

If any of the members of the household were away from home for a week-end during the past month, find out what sum was spent on the items listed under Heading B in the table and indicate the sum spent on each of these items in the value column. Also indicate where members went for the week-end.
