MANUAL FOR CODING AND CHECKING OF PERSONAL PARTICULARS

(Area, Education, Occupation and Industry excluded)

OF

WHITES, COLOURED AND ASIANS

(FORM 01)

PREFACE

This manual is one of a series of handbooks compiled for the elucidation of the first step (coding and checking) in the processing of the information obtained at the Population and Dwelling censuses taken on 6 May 1970.

The reason for the compilation of these manuals is twofold, namely, in the first instance, to serve as a manual of instructions to coders, and, secondly, to give users of census data a clearer picture of the statistics they use.

INTRODUCTION

DESCRIPTION OF THE CONCEPT "CODING"

For the information of those uninitiated in the principles of machine tabulation of data, coding can be described briefly as the process of translation of written data into figures or codes. It is thus the initial step in the preparation of data in machine-readable form for machine tabulation.

GEOGRAPHICAL UNIT OF CODING

For the purpose of the census, the Republic and South West Africa were divided into approximately 400 supervisors' areas of enumeration (SAE) with a census supervisor in charge of the survey in each SAE. For simplification of the survey each SAE was again divided into enumerators' sub-districts (ESD) and consequently the geographical unit of coding is also the enumerator subdistrict.

DETERMINATION OF THE CONTENTS OF CODE LISTS

The following factors were taken into account when considering which items had to be identified separately in these code lists.

- (a) Separate codes have been allocated in the code lists to the answers which appear most frequently against the relevant questions on the questionnaire.
- (b) Separate codes have also been allocated to answers which appear less frequently, but which are so important that separate identification is warranted.
- (c) The statistical needs of the Government and other users of statistics.

COMPARISON OF CODE LISTS IN THIS MANUAL WITH CODE LISTS OF THE PREVIOUS (1960) CENSUS

The introduction of the principle of precoding in the 1970 questionnaire is an innovation which warrants special mentioning. This principle was applied where at all possible and meant that the answers to questions were placed in spaces during the printing of the questionnaires and that the relative codes for the answers were also printed in the spaces. The respondent then answers the question by merely placing a cross in the relative space. At the coding stage, these questions thus requires merely a cursory (glancing) check and coding is therefore expedited.

Although the items listed in the 1970 code lists often differ from those listed in the corresponding 1960 code lists, the following differences between the two sets of code lists can be mentioned.

Code list	Position for 1970	Position for 1960
Area particulars	See manual for coding of areas	
Subdistrict number	Type of area (Compound, trust and State land, etc.) can be deduced from subdistrict number.	Type of area could not be deduced from subdistrict number.

POPULATION CENSUS 1970INSTRUCTIONS FOR THE CODING OF FORM 01(PERSONAL PARTICULARS OF WHITES, COLOURED AND ASIANS)A. General

1. The following particulars must be coded in respect of each White, Coloured or Asian.

1. Province/homeland
2. Economic region
3. SAE
4. Place name
5. Area
6. Metropolitan area
7. Subdistrict number
8. Return number
9. Type of dwelling
10. Column number
11. Race
12. Sex
13. Age (unless unspecified - see par. 1)
14. Marital status
15. Birthplace
16. Nationality or citizenship
17. Usual place of residence and type of dwelling
18. Home language
19. Religion
20. Level and Nature of education
21. Occupation
22. Status of Employment
23. Identity of employer
24. Industry or profession
25. Income

2. Returns are bound in bundles according to subdistricts (mostly one bundle for each subdistrict). In the front of the bundle is a work record, on which the processing of that bundle is reflected. The coding of items 1 to 7 above is only done once on the work record for the whole bundle. Items 8 and 9, are coded once for each form on the top right hand side of the return. Codes in respect of items 10 to 25 should be shown for each person in the relative column.

3. Coding should be done with a red ball point pen and figures must be clear. The coding of items 10 to 25 must be done in such a manner that the written information still remains legible. To simplify the work of the punch operators the codes of the latter items should, as far as possible, be written in the top right hand corner of the space provided for the answer.

4. After items 1 to 9 have been coded, each person on the form must be coded in full before a start is made with the coding of the next person. It is of vital importance that the codes allocated to the different characteristics of one person are reconcilable and that impossible combinations do not occur. (Age must for instance coincide with marital status, sex with occupation, level of education with age, etc.)

5. It will often happen that information omitted can be arrived at by referring to other information on the form. In the case of a teacher for instance the status of employment and the industry could be deduced from the answers to occupation and name of employer. If the religion of a child has been omitted it could be deduced from the religion of the parents. The code "Unspecified" must only be used if it is impossible to allocate a more specific code (except in the case of question D - (age) - "Unspecified" must definitely not be coded - (see paragraph 12 hereunder).

6. All figures must be clearly legible. If a code or number has to be changed, the original number or code must be deleted and the correct number or code inserted, e.g. ~~56~~ ⑦

7. These instructions and codes will definitely not cover all problems that may arise and any doubtful cases must be referred to the supervisor for a decision.

B. ACTUAL CODING

As already mentioned (Par. A2), items 1 to 7 of paragraph A1 must be coded once on the work record of the bundle. The codes used for the seven items are as follows:

1. Province/ See separate manual i.r.o. Areas
homeland

2. Economic See separate manual i.r.o. Areas

7. Subdistrict As the subdistrict number

number has already been entered on

(4-figures) the work record, this item
can be ignored by the coder.

8. Return This item can be ignored by the coder

9. Type of The type of dwelling is already pre=

dwelling coded on the forms. Care should be

(1-figure) taken that only one space is marked.

If the type of dwelling is not marked
it may be possible to deduce it from
the address. Refer doubtful cases
to the supervisor.

Licensed Hotel.....3

Private hotel or

boarding house.....4

Old-age home.....5

Hostel.....6

Other dwelling.....7

If space 7 on the form is marked, the coder must
satisfy himself that the type of dwelling is actually
"7" and that one of the other spaces is not really
applicable. If so, the existing cross should be
deleted in this manner x and the appropriate space
marked with a cross (x).

10. Column number The columns of form 01 is numbered from 1 to 7.
(1-figure) In the case of columns that were used, the coder should ring the column numbers to indicate that the number must be punched. Particulars of only one person must appear in a column. If columns are left blank in between, or the particulars are cancelled, the columns must be renumbered and the summary at the end of the page amended accordingly if necessary. It is the coders' responsibility to see that the summary is correct in all cases.
11. Race White 1
(1-figure) Coloured 2
 Malay 3
 Griqua 4
 Other Coloured
 (Inhabitants of Mauritius, St. Helena, Turkey, Abessinia, Egypt, Sudan and American Negroes 5
 Indian, Pakistani 6
 Chinese 7
 Other Asians (Japanese, Arab, Iranian, etc.) 8
12. Sex This item is already precoded on the form.
(1-figure) If not, a code must be allocated by referring to other relevant information on the form.
13. Age Under 1 year 000
(3-figures) 1 to 9 years 001-009
 10 to 99 years 010-099
 100 to 109 years 100-109
 (code all persons 109 years and older, 109)
 Only completed years are required and where age is shown in years and months, the months must be deleted. Please note, that an age code must be allocated to each individual even in cases where an age has not been stated. In such cases, the coder must allocate an estimated age (the method in this connection is explained in annexure A). Page 13.
14. Marital status This item is already precoded on the form. Please note
(1-figure) that space 5 only relates to persons who live together as man and wife but who are not legally married. In

these cases the legal status must be ignored. If the marital status of an individual is not shown, a code must be allocated by referring to other relevant information on the form.

- 15, 16 Birthplace and Nationality If spaces 01 or 02 in the case of birthplace or space 01 in the case of nationality are marked, the questions require no further attention. If not, the relative codes (see below) must be filled in.

(An instruction will be given to the computer that the province/homeland, economic region - ; SAE -, place name -, area -, metropolitan area - and type of dwelling which have already been coded in accordance with paragraphs 1 to 8, are to be used in such cases).

ANNEXURE A

METHOD FOR THE DETERMINATION OF AGE IF NOT SPECIFIED

The following modus operandi must be followed.

- (a) In the case of a scholar (Question M1) whose age is not known:

	<u>Grade/ Standard</u>	<u>Estimated age</u>
<u>Whites</u>	Gr. 1	7
	" 2	8
	Std. I	9
	II	10
	III	11
	IV	12
	V	13
	VI	14
	VII	15
	VIII	16
<u>Coloureds and Asians</u>	IX	17
	Gr. 1	8
	" 2	10
	Std. I	10
	II	11
	III	12
	IV	13
	V	14
	VI	15
	VII	16
	VIII	17
	IX	18

- (b) In all other cases an age range should be determined and the apparant age estimated within that range. This range must be determined with the aid of other relevant information on the relative return. Aspects such as the following will for example serve as guides -

- (i) Relationship to head of family -

Question B - (range of age of wife 5 years younger to 2 years older than her husband; (average age difference between children is 3 years), if a child of unspecified age is encountered and the ages of the older or younger children are known, the

range is between one year older than the younger child and one year younger than the elder child, etc.).

(ii) Marital status -

Question E - (Age if married):

White	male	-	24 or older
"	female	-	21 or older
Coloured	male	-	25 or older
"	female	-	23 or older
Asian	male	-	26 or older
"	female	-	21 or older

(iii) Occupation - Question M(1) - (a pre-school child is under 6 years old; an apprentice 15 - 22 years; a student 17 - 24 years; economically active persons are 17 - 70; pensioner (retired) 65+; a housewife is 24+).

(iv) Status of employment (Question M(2), name of employer (Question M(3) and industry (Question M(4) - if employed, 17 - 70 years old.

(v) Income (Question N). Although it is possible that salaries or wages are not the only sources of income but also the proceeds of interest and dividends received, it will normally be correct to assume that a high income of a person employed by the State Railways or a Municipality, is indicative of an advanced age.

(c) To determine the selected age within the range, each supervisor is supplied with 110 index cards which have been positioned at random. The supervisor then page through the cards until he/she finds a card, which shows an age within the range. All the handled cards up to the latter are then placed at the back of the pack. The original random sequence is thus maintained.

(d) If more than one age on a form is to be estimated, the age of the person for whom the most information is available must be estimated first. This age must then serve as basis to determine the range of other cases.

PREFACE.

This manual is one of a series of similar handbooks compiled for the elucidation of the first step (coding and checking) in the processing of the information obtained at the Population and Dwelling censuses taken on 6 May 1970.

The reason for the compilation of those manuals is twofold, namely, in the first instance, to serve as a manual of instructions to coders, and, secondly, to give the users of census data a clearer picture of the statistics they use.

DATE:

DESCRIPTION OF THE CONCEPT "CODING".

For the information of those uninitiated in the principles of machine tabulation of data, coding can be described briefly as the process of translation of written data into figures or codes. It is thus the initial step in the preparation of data in machine-readable form for machine tabulation.

DETERMINATION OF THE CONTENTS OF CODE LISTS.

The following factors were taken into account when considering which items had to be identified separately in these code lists.

- (a) Separate codes have been allocated in the code lists to the answers which appear most frequently against the relevant questions on the questionnaire.
- (b) Separate codes have also been allocated to answers which appear less frequently, but which are so important that separate identification is warranted.
- (c) The statistical needs of the Government and other users of statistics.

COMPARISON OF CODE LISTS IN THIS MANUAL WITH CODE LISTS OF THE 1960 CENSUS.

Apart from the fact that the codenumbers of the 1970 level of education code list sometimes differ from those of the corresponding 1960 code list, the following major differences between the two code lists can be noted:

- (a) Parts of courses were coded in 1960, but are ignored in the 1970 code list.
- (b) The 1960 code list differentiated between general courses and professional courses, whereas the 1970 code list does not.

The 1970 nature of education code list is virtually the same as that for 1960, with slightly more detail for engineering, and separate codes for:

- "other medical qualifications",
- "other education",
- "other cultural qualifications",
- "non-technical trades",
- "computer programming",
- "qualifications not elsewhere classified".

A. CODE LIST FOR LEVEL OF EDUCATION (2-figure code)

Par. 1.

The term "Level of Education" means the highest level of education obtained as reflected by completed school standard, degree, certificate or diploma. Parts of courses must therefore be ignored totally. If a person entered "B. Com, II" against Part 2 of the question on the level of education, his highest level of education is Standard 10 and code "10" must consequently be allocated.

Par. 2.

The following five main levels are distinguished:-

- (i) No school standard passed (code 00)
- (ii) Passed school standard only (codes 01-11)
- (iii) Degree(s) only (codes 20-22)
- (iv) Diploma(s)/certificate(s) only (codes 30-32)
- (v) Both degree(s) and diploma(s)/certificate(s) (codes 40-42)

Both (i) and (ii) are coded under the heading "No degree or diploma".

Par. 3.

No degree or diploma

No Standard	00
Grade I and II (Sub A and B) and	
Standard 1	01
Standard 2	02
Standard 3	03
Standard 4	04
Standard 5	05
Standard 6	06
Standard 7	07
Standard 8	08
Standard 9	09

Standard 10 (Matric, Senior Certificate or equivalents)	10
---------------------------------------------------------	----

Par. 4.

Completed degree(s) only

Bachelor's degrees and their equivalents	
(e.g. B.Comm., B.A., M.B.Ch.B., M.R.C.S., L.R.C.P., M.I.A., etc.)	11

Master's degrees

(e.g. M.Sc., M.A., M.B.A., etc.)	12
----------------------------------	----

Doctor's degrees

(e.g. D.Sc., Ph.D., D. Litt., M.D. etc.)	13
------------------------------------------	----

Par. 5.

Completed Diploma(s) or Certificate(s) only

If a person shows a diploma or certificate coupled with one or other school standard (Standard X or lower), these cases are coded as follow:

With Standard X	14
With Standard VIII or IX	15
With Standard VII or lower	16

Par. 6.

Completed Degree(s) and diploma(s) or completed degree(s) and certificate(s)

Bachelor's degree (or equivalent) and diploma/certificate	17
Master's degree and diploma/certificate	18
Doctor's degree and diploma/certificate	19

Par. 7. Level of education unspecified
See also Par. 8(ii) 20

Par. 8. Further explanations in connection with the
forementioned codes

(i) "Honorary" degrees must be ignored.

(ii) Code "20" must be used only if both parts of the question are not filled in. Whenever the second part of the question is not answered, it must be accepted that the person has no post-school qualifications and such a person must be coded to the highest school standard passed.

B. CODE LIST FOR NATURE OF EDUCATION (2-figure code)

Par. 1. The term "nature of education" means the direction in which a person has qualified himself/herself by ~~various courses, diplomas, and is reflected~~

by completed degrees, diplomas and/or certificates. It should be borne in mind that "Nature of Education" need not necessarily have a direct bearing on the occupation. A person with B.A. H.E.D. could, for example, be employed in a commercial capacity (agent, traveller, salesman, etc.). This person's nature of education must, nevertheless, be coded "34".

Par. 2. Broadly speaking the population can, as far as nature of education is concerned, be broken down into three major groups, viz.

(i) Those with no post-school qualifications - see par. 11 below.

(ii) Those who have qualified in general courses (i.e. courses which are not designed for a particular profession or vocation). - see par. 12 below.

(iii) Those who have qualified in professional or vocational courses (i.e. courses which are designed for a particular profession or vocation). - see par. 14 below.

Nature of education must be coded as follows:-

Par. 3. NO POST-SCHOOL QUALIFICATIONS

All persons with no degrees, post-school certificates or post-school diplomas (i.e. persons with school qualifications only 00

PREFACE

This manual is one of a series of handbooks compiled for the elucidation of the first step (coding and checking) in the processing of the information obtained at the Population and Dwelling censuses taken on 6 May 1970.

The reason for the compilation of these manuals is twofold, namely, in the first instance, to serve as a manual of instructions to coders, and, secondly, to give users of census data a clearer picture of the statistics they use.

INTRODUCTION

DESCRIPTION OF THE CONCEPT "CODING"

For the information of those uninitiated in the principles of machine tabulation of data, coding can be described briefly as the process of translation of written data into figures or codes. It is thus the initial step in the preparation of data in machine-readable form for machine tabulation.

GEOGRAPHICAL UNIT OF CODING

For the purpose of the census, the Republic and South West Africa were divided into approximately 400 supervisors' areas of enumeration (SAE) with a census supervisor in charge of the survey in each SAE. For simplification of the survey each SAE was again divided into enumerators subdistricts (ESD) and consequently the geographical unit of coding is also the enumerator subdistrict.

DETERMINATION OF THE CONTENTS OF CODE LISTS

The following factors were taken into account when considering which items had to be identified separately in these code lists.

- (a) Separate codes have been allocated in the code lists to the answers which appear most frequently against the relevant questions on the questionnaire.
- (b) Separate codes have also been allocated to answers which appear less frequently, but which are so important that separate identification is warranted.
- (c) The statistical needs of the Government and other users of statistics.

COMPARISON OF CODE LISTS IN THIS MANUAL WITH CODE LISTS OF THE PREVIOUS (1960) CENSUS

The introduction of the principle of precoding in the 1970 questionnaire is an innovation which warrants special mention. This principle was applied where at all possible and meant that the answers to questions were placed in spaces during the printing of the questionnaires and that the relative codes for the answers were also printed in the spaces. The respondent then answers the question by merely placing a cross in the relative space. At the coding stage, these questions thus requires merely a cursory (glancing) check and coding is therefore expedited.

Although the items listed in the 1970 code lists often differ from those listed in the corresponding 1960 code lists, the following differences between the two sets of code lists can be mentioned.

Code list	Position for 1970	Position for 1960
Area particulars	See manual for coding of areas	
Subdistrict number	Type of area (Compound, trust and State land, etc.) can be deduced from subdistrict number.	Type of area could not be deduced from subdistrict number.
Return number	4 Figures. The returns of each subdistrict start at 0001.	3 Figures. The returns of each subdistrict start at 0001.
Type of dwelling	Precoded.	Not precoded.
Column No.	1 Figure.	Not coded.
Sex	Precoded.	Not precoded.
Age	All unspecified ages are estimated.	All unspecified ages coded as XX.
Marital status and now married.	Precoded.	Not precoded.
Birthplace	Name of magisterial district asked.	Name of province asked.

POPULATION CENSUS 1970INSTRUCTIONS FOR THE CODING OF FORM 02/08-
PERSONAL PARTICULARS OF BANTU)General

The following particulars must be coded in respect of each Bantu:

1. Province/homeland
2. Economic region
3. SAE
4. Place name
5. Area
6. Metropolitan area
7. Subdistrict number
8. Return number
9. Type of dwelling
10. Column number
11. Sex
12. Age
13. Marital status
14. How married
15. Children
16. Birthplace
17. Occupation
18. Status of employment
19. Identity of employer
20. Industry or profession
21. Religion
22. Literacy in any language
23. Level of education
24. Languages able to speak
25. Home language

Returns are bound in bundles according to subdistricts (mostly one bundle for each subdistrict). In the front of the bundle is a work record, on which the processing of that bundle is reflected. The coding of items 1 to 7 above is only done once on the work record for the whole bundle. Items 8 and 9, are coded once for each form on the top right hand side of the return. Codes in respect of items 10 to 25 should be shown for each person in the relative column.

3. Coding should be done with a black ball point pen and figures must be clear. The coding of items 10 to 25 must be done in such a manner that the written information still remains legible. To simplify the work of the punch operators the codes of the latter items should, as far as possible, be written in the top right hand corner of the space provided for the answer.
4. After items 1 to 9 have been coded, each person on the form must be coded in full before a start is made with the coding of the next person. It is of vital importance that the codes allocated to the different characteristics of one person are reconcilable and that impossible combinations do not occur. (Age must for instance coincide with marital status, sex with occupation, level of education with age, etc).
5. It will often happen that information omitted can be arrived at by referring to other information on the form. In the case of a teacher for instance the status of employment and the industry could be deduced from the answers to occupation and name of employer. If the sex of a child has been omitted it could be deduced from the relationship to the head of the family. The code "Unspecified" must only be used if it is impossible to allocate a more specific code (except in the case of question D- (age) - "Unspecified" must definitely not be coded - (see paragraph 12 hereunder).
6. After a form has been coded completely, a cursory check must be made again to ensure that no codes have been omitted and that the code numbers allocated are reconcilable.
7. All figures must be clearly legible. If a code or number has to be changed, the original number or code must be deleted and the correct number or code inserted. e.g. 5 & 7 . (7)
8. These instructions and codes will definitely not cover all problems that may arise and any doubtful cases must be referred to the supervisor for a decision.

B. ACTUAL CODING

As already mentioned (Par. A2), items 1 to 7 of paragraph A1 must be coded once on the work record of the bundle. The codes used for the seven items are as follows:

Type of The type of dwelling is already pre-

dwelling coded on the forms. Care should be

(1-figure) taken that only one space is marked.

If the type of dwelling is not marked

it may be possible to deduce it from

the address. Refer doubtful cases

to the supervisor.

House

2

Flat

3

Hostel

4

Compound	5
Hut, shack, etc.	6
Other	7

If space 7 on the form is marked, the coder must satisfy himself that the type of dwelling is actually "7" and that one of the other spaces is not really applicable. If so, the existing cross should be deleted in this manner x and the appropriate space marked with a cross (x).

10. Column number (1-figure) The columns of form 02 is numbered from 1 to 7 and those of form 08 from 1 to 8. In the case of columns that were used, the coder should ring the column numbers to indicate that the number must be punched. Particulars of only one person must appear in a column. If columns are left blank in between, or the particulars are cancelled, the columns must be renumbered and the summary at the end of the page amended accordingly if necessary. It is the coders' responsibility to see that the summary is correct in all cases.
11. Sex (1-figure) This item is already precoded on the form. If not, a code must be allocated by referring to other relevant information on the form.
12. Age (3-figures)
- | | |
|------------------|---------|
| Under 1 year | 000 |
| 1 to 9 years | 001-009 |
| 10 to 99 years | 010-099 |
| 100 to 109 years | 100-109 |
- (code all persons 109 years and older, 109)
- Only completed years are required and where age is shown in years and months, the months must be deleted. Please note, that an age code must be allocated to each individual even in cases where an age has not been stated. In such cases, the coder must allocate an estimated age (the method in this connection is explained in annexure A).
13. Marital status (1-figure) This item is already precoded on the form. Please note that space 5 relates to persons who live together as man and wife but who are not legally married. In these cases the legal status must be ignored. If the marital status of and individual is not shown, a code must be allocated by referring to other relevant information on the form.

If the marital status of a minor is not shown, space 1 (never married) must be marked.

How married
(1-figure)

This item is already precoded on the form.

N.B. Only if married (i.e. if space 2 of part 1 of the question is marked) either space 1 or 2 or 3 of part 2 must be marked.

Children
(Three 1-
figure codes)

This item is applicable to all women (not men) (never married, married, widowed, divorced and living together) irrespective of their ages. If figures are inserted in any of these three subdivisions of the question, the coder must ring each figure to make it more conspicuous to the punch operator. It is important that the answers on the three subdivisions be compared, (2) and (3) may for example be greater than (1) but (3) must not be greater than (2). If no numerals appear against the question, it requires no further attention (the three answer spaces are then left blank). If this question is filled in in respect of a man, the particulars must be deleted.

Birthplace
(3-figures)

If born in the R.S.A., fill in code of the relative S.A.E. number (see manual for coding areas). If it is clear that the birthplace is in the R.S.A., but the Magisterial district (S.A.E.) is not specified, code 377. If not, fill the relative code in against the country as shown below.

Refer all doubtful cases to supervisor.

23. Level of Education and nature of education
 (4-figures) See manual for coding of education.
24. Language able to speak
 (1-figure) This item is not precoded and the languages which can be spoken must be coded as follows:-

| Only English | 2 |
| Only Afrikaans | 3 |
| Bantu language and English | 4 |
| Bantu language and Afrikaans | 5 |

25. Home language
 (2-figures) This item is already precoded on the form and requires no further attention.
- It will be noticed that no code has been allocated to home language "unspecified". One of the codes already mentioned must therefore be allocated to each Bantu. If no space is marked, study other information on the form and allocate a code, taking into account the home language which appears predominantly in the bundle of forms.

If the language for young children is not shown, code to home language of mother.

All doubtful cases must be referred to the supervisor.

ANNEXURE A

METHOD FOR THE DETERMINATION OF AGE IF NOT SPECIFIED

The following modus operandi must be followed.

(a) In the case of a scholar (Question H1) whose age is not known:

	Grade/ Standard	Estimated age
<u>Boys</u>	Sub. A	9
	Sub. B	10
	Std. 1	11
	II	12
	III	13
	IV	14
	V	15
	VI	16
	Form I	17
	II	18
	III	19
<u>Girls</u>	IV	19
	V	19
	Sub. A	9
	Sub. B	10
	Std. I	11
	II	12
	III	13
	IV	14
	V	15
	VI	16
	Form I	16
	II	17
	III	18
	IV	18
	V	19

(b) In all other cases an age range should be determined and the apparant age estimated within that range. This range must be determined with the aid of other relevant information on the relative return. Aspects such as the following will for example serve as guides (clues)-

(i) Relationship to head of family -

Question B - (range of age of wife 5 years younger to 2 years older than her husband; (average age difference between children is 3 years). If a child of unspecified age is encountered and the ages of the elder or younger children are known, the range is between one year older than the younger child and one year younger than the elder child, etc.)

(ii) Marital status -

Question E - (Age if married):

Bantu male - 25 or older

Bantu female - 23 or older

(iii) Occupation -

Question H - (a pre-school child is under 9 years old; an apprentice 15-22 years; a student 17-24 years; an economically active 15-70 years; a pensioner, retired person 65+; a housewife 24+, a domestic servant 15+, etc.).

(iv) Status of employment, name of employer and industry -

Question H - (if employed, 15-70 years old).

It has been found that age estimates based on (i) above, i.e. relationship to head of family, is very close to the real age and it is recommended that this method be adopted where possible.

(c) To determine the selected age within the range, each supervisor is supplied with 110 index cards which have been positioned at random. The supervisor then page through the cards until he/she finds a card, which shows an age within the range. All the handled cards up to the latter are then placed at the back of the pack. The original random sequence is thus maintained.

(d) If more than one age on a form is to be estimated, the age of the person for whom the most information is available must be estimated first. This age must then serve as basis to determine the range of other cases.

STEEKPROEFTABELLASIE

HANDLEIDING VIR KODERING VAN BANTOES

(VORM 02 EN BOEK 08)

STEEKPROEFTABELLASIE

Vyf persent van alle Bantoes sal vir die steekproef verwerk word. Dit kom daarop neer dat elke twintigste persoon in elke opnemersubdistrik (OSD) verwerk moet word. Aangesien dit 'n skewe beeld sal gee indien daar vir elke OSD met, byvoorbeeld, die heel eerste persoon begin word (in baie gevalle sal die eerste persoon die hoof van 'n gesin wees, die tweede sy vrou, die derde 'n kind, ens.) is daar 'n afsonderlike span wat op ewekansige manier statisties bepaal met watter persoon daar begin moet word. Hierdie span dui dan d.m.v. 'n "S" bo-aan die betrokke kolom aan met welke persoon die kodeerder moet begin. Indien die keuse op, byvoorbeeld, die vyfde persoon val, moet die kodeerder persone 5, 25, 45, ens. kodeer. Om nasien van kodering te bespoedig moet hy al die kolomme wat hy kodeer ook met 'n "S" merk.

Kyk bylaag vir voorbeeld van hoe 'n kodestrokie ingevul moet word.

Behalwe by ouderdom en, in die geval van ekonomies bedrywige persone, by beroep en bedryf, kom die balans van die kodering neer op kruisies (x) wat in toepaslike blokkies getrek moet word.

1. Provinsie/tuisland) Soos reeds gesê, moet hierdie drie items
) slegs op die eerste drie kodelisties wat op
2. Ekonomiese streek) 'n spesifieke OSD betrekking het, versyfer
) word. Die betrokke kodenommers moet op die
3. KOG) stippellyn ingeskryf word volgens bylaag .. **B**...
) van hierdie handleiding.

Stel vas volgens bylaag^B watter blokkie van toepassing is, en merk met 'n kruisie (x).

2/.....

'n Nommer wat byvoorbeeld as "0036" op die vorm verskyn, moet, met ander woorde, as "36" op die kodestrokie geskryf word.

Die betrokke kolomnommer (1 tot 7 in die geval van vorm 01 en 1 tot 8 in die geval van boek 08) moet op die stippellyn regs van die vertikale strepie ingeskryf word.

7. Ras

Plaas 'n kruisie (x) in die toepaslike ruimte. Indien 'n Bantoe se geboorteplek (vraag G) iewers in die Republiek van Suid-Afrika is, is ruimte 4 van toepassing. Indien geboorteplek egter buite die R.S.A. is, is ruimte 5 van toepassing.

8. Geslag

Plaas 'n kruisie (x) in die toepaslike ruimte.

9. Ouderdom

Ouderdom moet in voltooide jare ingeskryf word, bv. "10", "36", ens. In die geval van 'n kind van onder 1 jaar, skryf "00". Vir persone wat 99 jaar of ouer is, skryf "99". Indien 'n persoon se ouderdom nie gespesifiseer is nie, moet die vorm na die toesighouer verwys word wat dit dan volgens bylaag ...C... sal skat. Die geskatte ouderdom moet dan op die kodestrokie sowel as op die vraelys ingeskryf word.

10. Huwelikstaat

Plaas 'n kruisie (x) in die toepaslike ruimte.

11. Geboorteplek

Plaas 'n kruisie (x) in die toepaslike ruimte. Die volgende afkortings en simbole is op die kodestrokie gebruik:

S.A. = Republiek van Suid-Afrika

S.W.A. = Suidwes-Afrika

? = Onbekend en ongespesifiseer.

12. Beroep

Indien die persoon nie ekonomies bedrywig is nie (bv. voltydse huisvrouens, skoliere, voorskoolse kinders, babas, voltydse studente, gepensioeneerdes, invalides wat nie werk nie, ens.) moet 'n kruisie (x) in ruimte 78 gemaak word. In die geval van persone wat ekonomies bedrywig is, moet die betrokke kode volgens bylaagD..... op die stippellyn langs "Ander" ingeskryf word.

13. Status

Merk toepaslike ruimte met 'n kruisie (x). Let asseblief op die volgende:

- (a) Werkers vir eie rekening (geen werknemers nie) moet by "Werkgewer" ingesluit word:
- (b) Ruimte 4 is van toepassing op nie-ekonomies bedrywige persone
- (c) Ruimte 5 is van toepassing op buitelanders wat op tydelike besoek in Suid-Afrika is (maar hulle werk nie in S.A. nie).

14. Identiteit van werknemer.

Maak 'n kruisie (x) in die toepaslike ruimte. Die volgende afkortings is gebruik:

- (a) Sentrale Reg. = Sentrale Regering
- (b) Prov. Adm. = Provinsiale Administrasie
- (c) Plaasl. Owerh. = Plaaslike owerheid
- (d) Bantoe Owerh. = Bantoe owerheid

Aandag word daarop gevestig dat:

- (a) instellings wat gesubsidieer is (bv. universiteite, nasionale kunsgallerye, botaniese- en dieretuine, museums, nasionale parke, W.N.N.R., S.A.B.S., ens. ingesluit moet word by die instansie wat die subsidie betaal (bv. Staat, Provinsiale Administrasie).
- (b) ruimte 8 betrekking het op persone wat huishoudelike diens verrig teen vergoeding (hoofsaaklik huisbediendes).
- (c) Nie-ekonomies bedrywige persone moet by ruimte 9 ingesluit word.

15. Bedryf

Indien 'n persoon nie-ekonomies bedrywig is, moet 'n kruisie (x) in ruimte 76 gemaak word. In ander gevalle moet die betrokke kode volgens bylaag ... op die stippellyn langs "Ander" ingeskryf word.

16. Geloof

Plaas 'n kruisie (x) in die toepaslike ruimte. Die volgende afkortings en simbole is gebruik:

TOESIGHOUER SE WERKSMETODE VIR DIE TOEKENNING VAN OUDERDOM
INDIEN NIE GESPEFISEER NIE

Die volgende modus operandi moet gevolg word -

- (a) In die geval van 'n skolier (Vraag H1) wie se ouderdom nie bekend is nie:

	<u>Graad/Standerd</u>	<u>Beraamde Ouderdom</u>
<u>SEUNS</u>	Sub. A	9
	Sub. B	10
	St. I	11
	II	12
	III	13
	IV	14
	V	15
	VI	16
	Vorm I	17
	II	18
	III	19
	IV	19
	V	19
<u>DOGTERS</u>	Sub. A	9
	Sub. B	10
	St. I	11
	II	12
	III	13
	IV	14
	V	15
	VI	16
	Vorm 1	16
	II	17
	III	18
	IV	18
	V	19

- (b) In alle ander gevalle moet 'n ouderdomspeelruimte (range) waarin die werklike ouderdom waarskynlik val, beraam word. Hierdie speelruimte moet bepaal word met behulp van ander ter sake inligting op die betrokke opgawe. Aspekte soos die volgende sal byvoorbeeld as leidrade kan dien.

(i) Verwantskap met gesinshoof - Vraag B (speelruimte van ouderdom van vrou van 5 jaar jonger tot 2 jaar ouer as haar man; gemiddelde ouderdomsverskil tussen kinders is 3 jaar; indien n kind van ongespesifiseerde ouderdom voorkom en die ouderdomme van die ouere en jongere kinders is bekend, is die speelruimte tusser een jaar ouer as die jonger kind en een jaar jonger as die ouer kind; ens.)

(ii) Huwelikstaat - Vraag E (Ouderdom indien getroud):
Bantoe manlik - 25 of ouer
Bantoe vroulik - 23 of ouer

(iii) Beroep - Vraag H - (Voorskoolse kind is onder 9 jaar oud; vakleerling is 15 - 22 jaar; student is 17-24 jaar; Ekonomies bedrywig 15 - 70; pensio-naris, afgetree is 65₊; huisvrou is 24₊, huisbediende 15₊ ens.)

(iv) Werkstatus, naam van werkgewer en nywerheid - Vraag H - (indien werksaam is 15 - 70 jaar)

Daar is gevind dat ouderdomskattings wat gebaseer is op (i) hierbo, d.w.s. op verwantskap met gesinshoof, baie naby aan die werklike ouderdom lê, en daar word aanbeveel dat hierdie metode waar moontlik gevolg word.

(c) Om die geselekteerde ouderdom binne die speelruimte te bepaal, word elke toesighouer voorsien van 100 indekskaarte wat op ewekansige basis gerangskik is. Op elkeen van dié kaarte verskyn n ouderdom. Die toesighouer blaai dan die kaarte deur totdat hy/sy kom by n kaart wat n ouderdom binne die speelruimte toon. Alle kaarte tot en met laasgenoemde word dan agter aan die pak gesit. Die oorspronklike ewekansige volgorde van die kaarte bly dus op die manier behoue.

(d) Indien meer as een ouderdom op n vorm geskat moet word, moet dié van die persoon vir wie die meeste ter sake inligting beskikbaar is, eers geskat word. Hierdie ouderdom moet dan as basis dien om die speelruimte van die ander gevalle te bepaal.

BEVOLKINGSSENSUS 1970

HANDLEIDING VIR NASIEN EN KODERING

VAN BESONDERHEDE VIR GESINNE, HUISHOUDINGS EN WONINGS

BLANKES, KLEURLINGE EN ASIËRS

(VORM 03)

VOORSKRIFTE VIR DIE KODERING/NASIEN VAN VORM 03 -

(Gesinne, huishoudings en wonings - Blankes, Kleurlinge
en Asiërs)

A. Algemeen -

1. B3 vorms kan in drie kategorieë verdeel word, nl.

- (a) Vorms waarop deel 1 en deel 2 ingevul is,
- (b) Vorms waarop slegs deel 1 ingevul is,
- (c) Vorms waarop slegs deel 2 ingevul is.

2. Selfs al is een deel of beide dele van 'n vorm ingevul, kan dit wees dat daardie deel/dele nie ingevul moes gewees het nie en die kodeerder moet gevolglik nie blindelings alles op 'n vorm kodeer nie, maar eers homself tevrede stel dat wat ingevul is, wel kodeer moet word. Die volgende moet in dié verband in gedagte gehou word:

Deel 1 moet slegs ten opsigte van gesinne kodeer word. 'n Gesin word omskryf as 'n -

- (a) man en vrou; of
- (b) vader en moeder met een of meer ongetroude kinders; of
- (c) vader met een of meer ongetroude kinders; of
- (d) moeder met een of meer ongetroude kinders

Deel 2 moet slegs kodeer word indien die soort woning 'n huis, woonstel of ander afsonderlike en onafhanklike woning soos 'n woonwa, hut, tent, ens., is. Sover dit die item "soort woning" (linkerkant van vorm bo) aangaan, kan die volgende reëls dus neerge lê word:

(a) Indien "1" of "2" van toepassing is, moet deel 2 wel kodeer word, (met dien verstande dat waar twee of meer gesinne in een en dieselfde huis of woonstel woon, deel 2 slegs eenkeer t.o.v. die hele woning kodeer moet word, en wel op die hoofbewoner of -huurder se vorm).

(b) Indien "3", "4", "5" of "6" van toepassing is, moet deel 2 nie kodeer word nie.

(c) Indien "7" van toepassing is, sal die soort woning wat daar gespesifiseer is, die deurslag gee en deel 2 mag van toepassing wees of dit mag nie van toepassing wees nie. Indien die soort woning wat daar gespesifiseer is byvoorbeeld 'n hut of 'n tent is, is deel 2 wel van toepassing. Indien dit egter 'n gesamentlike woning soos 'n hotel, losieshuis, koshuis, hospitaal of ander inrigting is, is deel 2 nie van toepassing nie.

3. Opgawes is volgens subdistrikte in pakke gebind (een pak vir elke subdistrik). Voor in elke pak is 'n werkstaat waarop besonderhede van die verwerking van daardie pak weerspieël word. Die kodering van die volgende items is die toesighouer se taak en moet eenmalig vir die hele pak op die werkstaat gedoen word: Provinsie/gebied, ekonomiese streek, K.O.G., pleknaam, gebied, metropolitaanse gebied en subdistriknommer (kyk para

grawe Bl-7). Die balans van die kodering is die kodeerder se taak en moet op die vorm self gedoen word. Omrede die vrae op die vraelyste voorafkodeer is, kom die kodeerder se taak merendeels neer op nasien en nie op kodering nie.

4. Kodering/nasien moet in rooi balpunte gedoen word.

B. Werklike kodering

Soos reeds genoem (par. A.3) moet items 1 tot en met 7 hieronder eenmalig vir 'n pe vorms deur die toesighouer op die werkrekordstaat kodeer word.

1. Provinsie/
Gebied
(2-syfers)
2. Ekonomiese
streek

3. K.O.G.

4. Pleknaam

5. Gebied

Blank Nie-stedelik 3
Bantoe Nie-stedelik 4

6. Metropoli-
taanse
gebied
(2-syfers)

Kyk handleiding vir kodering van gebiede

7. Subdistrik-
Nommer
(4-syfers)

Die subdistrik is die eenheid van opname en die nommer wat aan 'n subdistrik toegeken is, dien die tweeledige doel om die gebied en ook die tipe gebiede te identifiseer. Die subdistrikte word deur die Distriksensuskontroleur genommer volgens die tipe gebied. Die tipe gebied en die ooreenstemmende subdistriknommers word hieronder aangedui en die toesighouer moet homself tevrede stel dat die subdistriknommer wat op die werkrekordstaat verskyn, korrek is.

A. STEDELIK

AANDAG WORD WEEREENS DAAROP GEVESTIG DAT DIE KODERING VAN DIE ITEMS WAT HIERONDER VOLG DIE KODEERDER SE VERANTWOORDELIKHEID IS. ALLE SYFERS MOET DUIDELIK LEESBAAR WEES. INDIEN 'N KODE OF GETAL GEWYSIG MOET WORD, MOET DIE OORSPRONKLIKE GETAL OF KODE DEURGEHAAL WORD EN DIE KORREKTE GETAL OF KODE NET LANGSAAN INGESKRYF WORD, BYVOORBEELD # 6.

8. Opgawe-
nommer
(4-syfers)

Indien die vorms nie agtereenvolgens genummer is nie, moet die kodeerder hulle hernummer sodat die nuwe nommers wel agtereenvolgens is.

Dit is die kodeerder se taak om die eerste en laaste nommers van die pak in die boonste regter hoek van die werkrekordstaat in te skryf byvoorbeeld 0001/0169.

9. Soort
woning
(1-syfer)

Die soort woning is alreeds op die vorm voorafkodeer. Sorg moet gedra word dat net een blokkie gemerk is. As die soort woning nie gemerk is nie, mag dit moontlik wees om dit af te lei van die adres wat ingevul is.

Indien ruimte "7" gemerk is, moet die kodeerder verseker dat die soort woning wel "7" is, en dat een van die ander blokkies nie in werklikheid van toepassing is nie. Indien wel, moet die bestaande kruisie aldus \equiv doodgetrek word en 'n nuwe kruisie in die toepaslike ruimte getrek word.

ALGEMENE NOTAS VIR BALANS VAN KODERING

(a) Daar sal opgemerk word dat sterretjies by sommige antwoord-ruimte voorkom. Hierdie sterretjies staan in verband met die masjinale verwerking van die vorms en kan deur die kodeerder ge-ignoreer word.

(b) Indien 'n antwoordsruimte heeltemal blanko gelaat is, moet die kodeerder dit so los (hy moet, m.a.w. nie 'n "O" of 'n "-" in vul nie selfs al is daar 'n sterretjie(s) by daardie antwoord-ruimte).

DEEL 1 - BESONDERHEDE VAN DIE GESIN

10. Getal
lede in
gesin

Die kodeerder moet daarop let dat die getalle onder manlik en vroulik optel na die totaal vir manlik en die totaal vir vroulik onderskeidelik.

11. Besonder-
hede van
hoof van
gesin

(i) Ras en geslag - reeds voorafkodeer

(ii) Huwelikstaat - reeds voorafkodeer

Indien dit blyk dat 'n gesin uit 'n ongehude moeder en haar kind/ kinders bestaan (nie een van die blokkies 2 tot 5 is m.a.w. van toepassing nie), moet die kode "1" op die stippellyn ná "Huwelikstaat" ingeskryf word. Sover dit die nasien van huwelikstaat aangaan, moet die kodeerder op die volgende punte let:

(a) Indien daar teenoor vraag A(i) 'n man en vrou verskyn, kan slegs blokkies 1, 3 of 5 van vraag B(i), en blokkies 2 of 5 van vraag B(ii) van toepassing wees.

- (b) Indien daar teenoor A(i) slegs 'n man verskyn, kan slegs blokkie 1, 3 of 5 van B(i), en blokkies 3 of 4 van B(ii) van toepassing wees.
- (c) Indien daar teenoor A(i) slegs 'n vrou verskyn kan slegs blokkie 2, 4 of 6 van B(i) van toepassing wees en, sover dit B(ii) aangaan kan slegs kodes 1, 3 of 4 van toepassing wees.
- (iii) Ouderdom - (2-syfers) -

Onder 18 jaar	17
18 - 97 jaar	18 - 97
98 jaar en ouer	98

Net voltooide jare word verlang en waar ouderdom in jare en maande aangetoon word, moet die maande deurgehaal word.

Indien ouderdom nie gespesifiseer is nie, moet gepoog word om met behulp van ander inligting in deel 1, die ouderdom te skat. Indien dit nie moontlik is nie moet die kode 99 teenoor ouderdom ingevul word.

12. Inkomste
(2-syfers)

Die item is reeds voorafkodeer. Sorg moet gedra word dat slegs een blokkie gemerk is.

DEEL 2 - BESONDERHEDE VAN DIE HELE WONING EN DIE HUISHOUDING

- * Aandag word weereens daarop gevestig dat deel 2 slegs op huise, woonstel en ander afsonderlike en onafhanklike woonplekke van toepassing is, en nie op hotelle, losieshuise, koshuise en inrigtings nie.

13. Ras van
hoof van
huishouding
(1-syfer)

Die item is reeds voorafkodeer.

14. Materiaal
van
buitemure
(1-syfer)

L.W. Hierdie vraag is slegs op huise (kode 1) van toepassing. Vir doeleindes van die rekenoutomaat is dit egter nodig dat 'n kode ook ingeskryf word vir woonstelle en ander soorte wonings. Indien nie een van die blokkies gemerk is nie, moet die kodeerder gevolglik die kode "6" net onder die woord "hoofsaaklik" inskryf. Indien die soewoning "huis" is en ruimte 5 is gemerk, moet die kodeerder verseker dat die materiaal wel "5" is, en dat een van die ander blokkies nie in werklikheid van toepassing is nie.

15. Getal
kamers

In elkeen van die antwoord-ruimtes mag geen syfers of slegs een syfer voorkom. Indien die getal kamers in enige blokkie 9 oorskry, moet daardie getal deurgehaal word en "9" in die plek daarvan ingeskryf word.

16. Ouderdom
van woning
(1-syfer) Die item is reeds voorafgekodeer. Indien geen blokkie gemerk is nie, m.a.w. indien ongespesifiseer, skryf 'n "7" in net bokant die woord "mening".

L.W. DIE BALANS VAN DIE ITEMS IS SLEGS VAN TOEPASSING OP WONINGS IN BLANKE STEDELIKE GEBIEDE (D.W.S. WONINGS IN OSD'S 0001 TOT 4199). INDIEN "GEBIED" OP DIE WERKREKORDSTAAT DUS AS "2", "3" OF "4" KODEER IS (KYK PARAGRAAF B5), MOET VRAE E TOT H VAN DAARDIE HELE PAK NIE VERWERK WORD NIE. INDIEN DIE VRAE EGTER WEL TEN OPSIGTE VAN EEN VAN LAAS-GENOEMDE GEBIEDE INGEVUL IS, MOET DIE KODEERDER DIE VRAE DUIDELIK DEURHAAL.

17. Eienaar-
skap Hierdie vraag is voorafkodeer en die kodeerder moet op die volgende let en die nodige regstellings doen:
- (a) Slegs (i) of (ii) moet ingevul wees
 - (b) Slegs indien die woning gedeeltelik afbetaal is (kyk (i)(a)), moet (i)(b) ingevul wees.
 - (c) Slegs indien die woning gemeubileerd of ongemeubileerd gehuur is (kyk (ii)(a)), moet (ii)(b) ingevul wees.
 - (d) Indien (i)(d.w.s. "eie woning") van toepassing is, moet die kodeerder 'n kruisie trek in blokkie 2 van (ii)(c) en ook 'n kruisie in blokkie 2 van (ii)(d).

18. Getal
gesinne
en nie-
gesinslede Die item is reeds voorafkodeer

19. Getal
persone
in woning Die item is reeds voorafkodeer. Let asseblief daarop dat die getalle onder "manlik" en onder "vroulik" optel na die totale.
- VERBAND TUSSEN VRAAG A VAN DEEL 1, VRAAG F EN VRAAG G VAN DEEL 2
- Indien deel 1 en deel 2 van 'n vorm ingevul is moet op die volgende gelet word:-
- (a) Die getal persone by vraag G mag nie kleiner wees as die getal persone by vraag A van deel 1 nie.
 - (b) Indien die getal persone by vraag G dieselfde is as die getal by vraag A van deel 1, moet (i) daar slegs een gesin en geen nie-gesinslede nie by vraag F wees en
 - (ii) die getal persone onder en oor 10 jaar by vraag A van deel 1 ooreenstem met die ooreenstemmende getalle by vraag G.

(c) Indien die getal persone by vraag G groter is as die getal by vraag A van deel 1, moet daar nie-gesinslede en/of meer as een gesin by vraag F wees.

Dit is onmoontlik om vaste reëls neer te lê vir die regstelling van vorms waarop die verband tussen bogenoemde drie vrae nie reg is nie. Elke geval sal op sy eie meriete behandel moet word en kodeerders moet enige probleemgevalle met die toesighouer bespreek.

20. Huisbediendes

Die vraag is reeds voorafkodeer en die kodeerder moet weereens op die volgende let en die nodige regstellings aanbring:

(a) die getalle onder die verskillende rasse ingevul moet optel na "Totaal" (deel (a) van vraag).

(b) In elkeen van die antwoord-ruimtes by deel (c) van die vraag mag geen syfers of slegs een syfer voorkom. Indien die getal huisbediende in enige blokkie 9 oorskry, moet daardie getal deurgehaal word en "9" in die plek daarvan ingeskryf word.

(c) Indien 'n bedrag teenoor "voltydse bediendes" (deel (b) van vraag) ingevul is, moet 'n voltydse bediende(s) getoon word onder (a)(i).

(d) Indien 'n bedrag teenoor "deeltydse bediendes" (deel (b) van vraag) ingevul is, moet 'n deeltydse bediende(s) getoon word onder (a)(ii).

HANDLEIDING VIR NASIEN EN KODERING

VAN BESONDERHEDE VIR BANTOEHUISHOUDINGS EN -WONINGS

(VORM 04)

BEVOLKINGSSENSUS, 1970

VOORSKRIFTE VIR DIE KODERING/NASIEN VAN VORM 04-
(VORM VIR BANTOEHUISHOUDINGS EN -WONINGS)

A. ALGEMEEN

1. Opgawes is volgens subdistrikte in pakke gebind (een pak vir elke subdistrik). Voor in elke pak is 'n werkrekordstaat waarop besonderhede van die verwerking van daardie pak weerspieël word. Die kodering van items 1 tot en met 7 van B hieronder moet eenmalig vir elke pak deur die toesighouer op die werkstaat gedoen word. Die balans van die kodering is die kodeerder se taak en moet op die opgawes self geskied. Omrede die betrokke vrae op die vraelyste voorafkodeer is, kom die kodeerder se taak merendeels neer op nasien, en nie op kodering nie.
2. Kodering/nasien moet met rooi balpunte gedoen word.
3. Toesighouers se aandag word daarop gevestig dat vorm 04 slegs betrekking het op wonings in (a) stedelike gebiede en (b) dorpe in Bantoegebiede. Die subdistriknommers (kyk par. 7 van B hieronder) van (a) moet dus tussen 0001 en 4199 lê (met die oorgrote meerderheid in die groep 2700 - 3999) en dié van (b) tussen 6,800 en 7,999. In hul uitsonderlike gevalle is dit moontlik dat vorm 04 ook van toepassing kon wees op 'n subdistrik met 'n nommer tussen 9500 en 9999. Indien enige subdistriknommers nie binne dié grense val nie, moet sodanige gevalle na hoër gesag verwys word.
4. Vir die doel van vorm 04 word 'n woning omskryf as 'n afsonderlike en onafhanklike woonplek soos 'n huis, woonstel, kamer (d.w.s. eenvertrek woning), woonwa, hut, tent, ens. Die vorm is dus nie van toepassing op enige gesamentlike huisvesting soos hotelle, losieshuise, kloosters, koshuise, inrigtings, ens. nie.
5. Daar sal opgemerk word dat sterretjies by vrae D en E gedruk is. Hierdie sterretjies staan in verband met die masjinale verwerking van die vorms en kan dus deur die kodeerder ge-ignoreer word.

B. WERKLIKE KODERING

Soos reeds in paragraaf A1 genoem, moet items 1 tot en met 7 hieronder eenmalig vir 'n pak vorms deur die toesighouer op die werkstaat kodeer word.

Die subdistrikte word deur die distriksensuskontroleur genommer volgens die tipe gebied. Die tipe gebied en die ooreenstemmende reekse van subdistriknommers word hieronder aangedui en die toesighouer moet homself vrede stel dat die subdistriknommer wat op die werkrekordstaat verskyn, korrek is. |

Aandag word weereens daarop gevestig dat items 8 tot 14 hieronder die kodeerder se verantwoordelikheid is. Alle syfers moet duidelik leesbaar wees. Indien 'n kode of getal gewysig moet word, moet dit deurgaah word en die korrekte kode of getal net langsaan geskryf word, byvoorbeeld # 6.

8. Opgawe-
Nommer
(4-syfers)

Vorm behoort agtereenvolgens vanaf 0001 genommer te wees. Indien dit nie die geval is nie, moet die kodeerder die vorms hernommer sodat die nuwe nommers wel agtereenvolgens is.

Dit is ook die kodeerder se taak om die eerste en laaste nommers van die pak in die boonste regter hoek van die werkstaat in te vul (bv. 0001/0216).

9. Soort
Woning
(1-syfer)

Indien die soort woning nie gemerk is nie, mag dit moontlik wees om dit af te lei van die adres wat ingevul is.

Tweedens, indien ruimte 5 gemerk is, moet die kodeerder verseker dat die soort woning wel "5" is en dat een van die ander blokkies nie in werklikheid van toepassing is nie. Indien wel, moet die bestaande kruisie aldus # doodgetrek word en 'n nuwe kruisie in die toepaslike ruimte getrek word.

10. Huistaal
van Hoof
van huis-
houding
(2-syfers)

Indien geeneen van die blokkies gemerk is nie, moet die kodeerder 'n kruisie trek by die taal wat mees dikwels in die betrokke pak vorms voorkom.

11. Materiaal
van Mure
(1-syfer)

Indien ruimte 5 gemerk is, moet die kodeerder verseker dat die materiaal wel "5" is, en dat een van die ander blokkies nie in werklikheid van toepassing is nie.

2. Getal
Kamers

In elkeen van die vyf antwoord-ruimtes mag geen syfers of slegs een syfer voorkom. Indien die getal kamers in enige blokkie 9 oorskry, moet daardie getal deurgehaal word en "9" moet in die plek daarvan ingeskryf word.

3. Getal
Bewoners

Opgelet moet word dat „manlik” en „vroulik” optel na „totaal”.

4. Maandelikse
Betaling
(4-syfers)

Indien die betaling R100 oorskry, haal die bedrag deur en kodeer soos volg: .R.99 c 99. ('n Bedrag van, byvoorbeeld R131.69 sal dus 99 99 kodeer word).
