INTRODUCTION AND CONSENT

INFORMED CONSENT

Hello. My name is \_\_\_\_\_ and I am working with the National Statistics Office. We are conducting a national survey that asks men and women about various health issues. We would very much appreciate your cooperation in this survey. This information will help the government to plan health services. The survey usually takes between 30 to 60 minutes to complete. Whatever information you provide will be kept strictly confidential and will not be shown to other persons.

As part of the survey we would first like to ask some questions about your household. All of the answers you give will be confidential. We are also taking weight and height measurements and asking women and small children all over the country to take an anemia test. Anemia is a serious health problem that usually result from poor nutrition, infection, or chronic disease. This survey will assist the government to develop programs to prevent and treat anemia. The survey is conducted under the Statistics Acts 1970 and anyone who release the information will be prosecuted.

At this time, do you want to ask me anything about the survey?  
May I begin the interview now?
