INTRODUCTION

Household budget questionnaire organized by the Statistical Office of Montenegro is used for collecting data on income, expenditures and spending of a household. Based on collected data, bases will be created for obtaining weights for calculating living cost index, and for calculating final consumption balance in the system of National Accounts. The survey will enable collecting of data required for poverty line definition, and thus measure the standard of living. **What is our standard like? How much do we allocate for food, clothes, shoes, apartment...? What measures should be undertaken to improve our standard?** The survey is to provide answers to essential questions of economic, social and demographic nature.

The experience of developed countries shows that household budget data are best collected through diary keeping. Based on accurate data from the diary it is possible to consider and respond to the above mentioned questions.

Monetary expenditures for **bought goods and services** are daily recorded in the diary during the period of one month. The diary is kept by a household member who is best familiar with the household's consumption.

Instructions how to fill out the diary

All of your procured supplies for the period of one month should be recorded in the diary, irrespective whether you pay the bought goods with your own money, loan club money, borrowed money or some other source and irrespective whether you pay in cash, by cheque, credit card, postal money order or other means of payment.

Costs should be recorded **every day**, in order to avoid the possibility of forgetting.

Costs for each individual good or service should be recorded, irrespective of their amount (**small or large** monetary amounts).

All costs, **described in details**, should be recorded in separate rows.

Record the supplies procured by other person, but with your money and on your behalf.

In addition to goods bought in domestic market, goods bought abroad should also be included.

Indicate the measure units (kg, g, pair, box, liter, piece, slice, etc.).

Values should be recorded in **euro**.

Use additional pages, if necessary.

Use receipts from shops, if possible.

Any income during the reference period is recorded in the diary.

Purchase on credit, hire-purchase and deferred payment purchase

If during the reference month you buy something **on credit or under deferred payment**, enter the whole amount of the purchase, although you will repay installments in some other period. If an installment of a previous purchase matures for payment in the month when the diary is to be filled out, such amount **should not** be recorded.

Do not forget:

If you **go on holiday or shopping abroad** during the reference period of one month, the values of bought goods should be recorded and expressed in euro, and 5 in column 6 should be circled. Relevant number for goods or services should be circled in column 6. **Supermarket** (column 6) implies a large shop or self-service grocery store (Mex, Carine, Voli and the like). **Store** is a small shop or self-service grocery. **Stall** may be in the street or market (doesn't have to be registered). **Other** may be purchases of goods and services via advertisements, internet, telephone orders, through traveling salesmen and the like.

Goods from own production are recorded in all columns of the diary except column 6. The value of goods and services from own production at market prices should be inserted in column 5.

If you **go on holiday or shopping abroad** during the reference period, take the diary with you and record all your costs on daily basis.

Remember to start a new page in the diary for every day.

At the end of every day you should check if all costs have been recorded.

Monetary expenses for food and drinks outside the household should be described in details.

Transfers, accepted and given away gifts should be described in details. Their values should be appraised (on your own or with controller's assistance).

Reminder of daily costs

Out of many various goods that can be procured in the trade network here is presented the list of goods frequently used in households, but with possibility of failure to be recorded (forgotten) in the diary. Each day you should check if you have recorded everything purchased.

Most frequent goods (food and drinks in a household):

1. Flour, sugar and salt
2. Rice
3. Condensed soups, ketchup, mayonnaise and sauces
4. Bagels, *burek* and other pastry
5. Pasta
6. *Smoki*, crisps and the like
7. Beer, wine, brandy and other alcohol beverages
8. Cigarettes
9. Newspapers, napkins, toilet paper and the like
10. Hygiene supplies (personal hygiene, and apartment hygiene)
11. Gas, parking, road tolls, taxi and city transport
12. Vitamins, medications
13. Costs for various courses (language, aerobic, driving license)
14. Tickets for cinema, theatre, matches

How to record goods procured on a single day in the reference month in the diary (see the following example)

A product should be described in details (column 2, cotton fabric, a loaf of white bread, cigarettes "Lovcen" and the like). Quantity of articles should be entered in column 3 (example: 1,2 are bolded for bread). Unit of measurement should be entered in column 4 (example: kg is entered for bread). Monetary amounts should be entered in column 5 (example: €0.60 is entered for bread). The place of purchase of the product should be indicated in column 6 (example: 1 is bolded for bread, meaning that it has been bought in a supermarket). Transaction should be indicated in column 7 (example: 1 is bolded for bread, meaning that it has been bought) and purpose in column 8 (example: 1 is bolded for bread, meaning that its purpose is personal). Monetary expenses for food and drinks outside the household should be described in details (example: two meals in a restaurant are entered in column 2). If a household receives a gift, it is entered in column 2 (example: chicken), and 4 is circled in column 7 (example: 4 is bolded for chicken, meaning that it has been received as a gift). Products from own production are entered in column 2 (example: bunch of roses), and 2 is circled in column 7 (example: 2 is bolded for a bunch of roses meaning that it is from own production).

Revenues should be described in details (column 2, monetary fee for transport), and 6 is circled in column 7.

HOUSEHOLD DEMOGRAPHIC AND ECONOMIC FEATURES

Sequence number	To be filled out for all household members						For household members over 15 years of age					
	1. First name and surname of household members	2. Presence of the member in the household	3. Reason of absence	4. Relationship of household members	5. Gender	6. Age	7. Marital status	8. Completed education	9. Main activity of members	10. Additional income	11. Number of months of work	12. Occupation
1.												
2.												
3.												
4.												
5.												
6.												
7.												
8.												
9.												
10.												

2. The number of months of presence for each household member in the previous 12 months.

3. Goes to school and resides in another location = 1

Works and resides in another location = 2
Serving military or imprisonment = 3
Abroad = 4
Other (visits, traveling, holidays, hospitalization) = 5

4. Relationship of members to the HH reference person:

HH reference person = 1
Spouse = 2
HH reference person's/spouse's child = 3
HH reference person's/spouse's parent = 4
HH reference person's/spouse's son/daughter-in-law = 5
HH reference person's/spouse's grandchild = 6
Other relative = 7
Other non-relative = 8

5. Male = 1
Female = 2

6. Full years of age for each HH member

7. Marital status for all members over 15 years of age.

Single = 1
Married = 2
Cohabiting partner = 3
Divorced = 4
Widowed = 5

8. Highest level of education successfully completed for each HH member.

No formal education = 1
Incomplete primary education = 2
Primary education = 3
One/two-year vocational education = 4

3-year secondary and skilled worker = 5

4-year secondary and highly skilled worker = 6

Secondary general = 7

Two-year post secondary = 8

High education (faculty) = 9

Master's degree-specialist = 10

Ph.D. = 11

9. Main activity of members in the previous 12 months. This is relevant only to household members over 15 years of age.

Employer = 1

Employee = 2

Individual farmer = 3

Self-employed = 4

Unpaid assisting member = 5

Unemployed = 6

Housekeeper = 7

Pupil/student = 8

Pensioner = 9

Incapacitated to work = 10
Other = 11

10. Has any of the members otherwise generated income:

No = 1
As employed/service contract = 2
Small business = 3
Other = 4

11. Number of months worked in the previous year, including unpaid leave, vacation and sick leave.

12. Enter occupation according to offered occupation codes.

13. What is the main source of income of your household	Public sector wages = 1 Private sector wages = 2 Agriculture = 3 Household business = 4 Pensions = 5 Transfers/transactions = 6 Other = 7	1 2 3 4 5 6 7 describe
14. Does the monthly income of your household meet the monthly needs	Fully = 1 Mostly = 2 Mostly doesn't = 3 Doesn't at all = 4	1 2 3 4
15. What minimum income would your household need so it could live on satisfying standard	Indicate the amount	Euro
16. If you compared your current financial position with the position from a year ago, how would you assess it:	Much better = 1 Slightly better = 2 Same = 3 Slightly worse = 4 Much worse = 5	1 2 3 4 5

Household and business (job)

17. Is the household engaged in a business (job)	Yes = 1 No = 2	1 2
18. If yes: is the business (job) registered?	Yes = 1 No = 2	1 2
19. If no, state the type of business (job)
