

**JORDAN NOW AUDIENCE EXPECTATIONS – PARIS SCHOOL OF ECONOMICS**

**June 27, 2012**

**Respondent details** (please tick appropriate box)

**Gender:** Male \_\_\_\_\_ Female \_\_\_\_\_

**Position:** Student \_\_\_\_\_  
 Professor \_\_\_\_\_  
 Other \_\_\_\_\_

**Have you ever worked in the Middle East?** Yes \_\_\_\_\_ No \_\_\_\_\_

**Your priors on treatment effects:**

Employment rates for the control group were 18% at midline, and 23% at endline. What do you think the *ITT treatment effect* was for the different treatment groups?

	Midline ITT	Endline ITT
<b>Job Voucher only group</b>	_____	_____
<b>Training only group</b>	_____	_____
<b>Voucher + Training group</b>	_____	_____

**Heterogeneity of treatment effects by stratifying variables.**

Which do you think will have occurred for the ITT job voucher impact in the endline data:

	Impact greater in Amman	Impact same for both	Impact greater outside Amman
Amman/Non-Amman			
High Ability/Low ability	Impact greater For high ability	Impact same for both	Impact greater for low ability
Mobile/Less mobile	Impact greater For mobile	Impact same for both	Impact greater for less mobile
Want to work/less interest	Impact greater For want to work	Impact same for both	Impact greater for less interest
