

## Using the Senegal Health PETS/QSDS Data Set

The Senegal PETS/QSDS data set is a survey of 151 health facilities, 99 of which are located in rural areas. The health facilities are located in 4 regions, , identified in variable 'zone'. Variable labels are in French.

All files include a variable named 'mod\_id', which represents the health facility identifier. All files can therefore be merged using that variable. Variable 'pweight' represents the sampling weight for each health facility. For health facility personnel, variable 'weight\_m1p' represents the sampling weight for each staff member in the full sample of health facility staff members in Senegal.

<b>FILE</b>	<b>DESCRIPTION</b>
Sn_Sante_Module1_personnel_V1.dta	General data on all health facility staff members.
Sn_Sante_Module1_structures_V1.dta	General data on structure, stocks and budgets
Sn_Sante_Module2_V1.dta	Detailed data collected on up to 10 staff members per health facility during an announced visit.
Sn_Sante_Module3_V1.dta	Detailed data collected on up to 10 staff members per health facility during a follow-up, unannounced visit.
Sn_Sante_Module4_V1.dta	Patient visit log
Sn_Sante_Vignette_V1.dta	Medical case simulation questionnaire dataset. Each observation contains 5 patient simulations.
