REPORTING HOUSEHOLD JOURNAL

Name of contact person:	Tel.:	SB SR office address:

Accepted by:	Date:	Signature:

Dear Household,

The Statistics Bureau of the Slovak Republic has regularly conducted statistical surveys of household accounts in the Slovak Republic since 1957. Household income and expenditure data constitute part of social statistical data collected for the purposes of acquiring current information on the standard of living of Slovak population. In addition to correct methodology and thorough preparation, the quality of the survey results depends on the selected respondents' willingness to take a responsible approach to the survey and cooperate with the Statistics Bureau.

The household accounts are aimed at acquiring information on household income, expenditure and consumption as an important source of information to evaluate the current economic situation in the Slovak Republic and to trace its development. The results are also used for international comparisons.

In the interests of ensuring the objectivity of the survey results, we ask that you complete this statistical form fully and truthfully according to the methodological notes and the directions provided by the competent SB SR staff.

The data for each individual reporting unit are confidential data that will not be disclosed and will only serve for statistical and analytical purposes. Pursuant to Act No. 540/2001 Coll., on government statistics, the Statistics Bureau of the Slovak Republic is responsible for the protection of personal information.

Please fill out this form in as much detail as possible using the appropriate tables in order to allow for correct categorization and subsequent analysis. In case the space provided in the tables is not sufficient, please use the reverse side of the form to provide any additional information.

In order to provide correct and complete data, income and expenditures have to be recorded in the Reporting Household Journal on a regular basis. Certain tables include numerical codes of purchased goods or services to facilitate the entries.

The form has to be delivered to the competent SB SR staff by 10th day of the subsequent month. For true data provided in a timely manner, the reporting unit will be evaluated in compliance with the agreed terms.

We thank you for returning the form in a timely manner and look forward to our future cooperation.

Ing. Milan Olexa, CSc., v. r.

CEO

Demography and Social Statistic Section

Household notes regarding data recorded in the statement:

III. Household in-kind income for the given month in Sk

1310. FOODSTUFFS. Information about foodstuffs consumed is recorded in this part. Consumption of foods that the household produced through its own farming – garden, private tract of land, agricultural activities, from raising domestic animals, collecting berries in woods, hunting – shall be recorded in *column No. 1*. Consumption of foods that the household obtained as a gift from persons outside of the household, allotted for the household from its own business activity or received from the employer or another organization shall be recorded in *column No. 3*.

From the total volume of production, only the part consumed by the household is monitored.

Examples:

- 5 chickens laid 80 eggs in the given month but the household only used 10 eggs; record 10 in line 16 of *column 1*.
- The household recording consumption in the month of June consumed 1.5 kg of pork lard from hog-slaughtering that took place in December and produced a total of 40 liters of lard; in such case record 1.5 in *line 10, column 1*
- The household used 3 kg of sausage produced in the preceding month. record 3 in *line 03 of column 1*;
- The household received 50 kg of sugar from its co-operative farm; it used 2 kg in the given month; record 2 in *line 26 or 27 of column 3*;
- The household collected 10 kg of raspberries in the woods and processed 5 kg to make jam and 5 kg to make wine for its own use; record raspberries in line 17 (18 or 19) of the "a" *column* and 10 in *column 3*.
- The household consumed 5 l of grape wine from home grown grapes. Record "grape wine" in *column "a"* and "5" in *column 1*.
