

SRI LANKA LABOUR FORCE SURVEY

1992

FINAL REPORT

ISBN 955 - 577 - 136 - 7

PUBLISHED IN 1995

Preface

Sri Lanka Labour Force Survey was designed to measure the Employment, Unemployment and Labourforce in Sri Lanka. In 1992 the Survey was done in twelve monthly sub-rounds and four quarterly reports have already been published.

This report which is the final report is based on data pertaining to all twelve months. The results given in this report excludes Northern and Eastern provinces. This publication which gives tabulations by district will be more useful to the Planners, who are involved in regional level planning.

Planning and the execution of the Survey was done by the staff of the Sample Survey Division under the direction of Mrs. S. Vidyaratna, Additional Director and under the supervision of Mr. M. R. N. A. Fernando, Statistician and Miss N. Arulanandan, Statistical Officer.

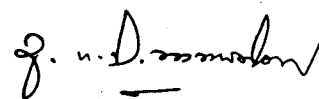

The computer tabulations were done by Mr. K. G. Tilakaratne, Statistician, and the report was organized and prepared by Mr. J. A. P. Balasuriya, Statistician under the direction of Mr. Gamini de Silva, Deputy Director.

Data Processing Division under the direction of Mrs. S. Nanayakkara, Deputy Director (In-charge) and under the Supervision of Mr. W. Sumanasiri, Deputy Director and Mr. Migara Fernando Analyst/Programmer was responsible for the Survey data entry and preparation of computer edit programmes.

District field staff of the Department who did the field work of the Survey deserve a special word of thanks.

Printing of the report was done in the Printing Division under the direction of Mr. K. D. Siripala, Deputy Director.

Finally I wish to express my appreciation to all the respondents of the survey for their co-operation.

A.G.W. Nanayakkara
Director of Census and Statistics

Sri Lanka Labour Force Survey - 1992

1. Introduction

This Survey was conducted by the Department of Census & Statistics under the National Household Survey Programme. The Survey was conducted during 1992, in twelve monthly sub-rounds.

The survey provides comprehensive information on Labour Force Characteristics. Additional background information on Demographic Characteristics of the population was also collected. The survey also provides information on hours worked, reasons for unemployment or non-participation in the labour force. The data collected were based on the respondent's activity during the previous calendar week to obtain "current" information and previous 12 calendar months to obtain "usual activity" information. The survey was confined to the household sector and hence persons living in institutions such as Armed forces, Police barracks, hostels and boarding houses with more than 5 boarders were excluded from this survey.

2. Concepts and Definitions

The concepts and definitions underlying the labour force data from this survey differ somewhat from those in previous labour force surveys. Therefore comparisons of data should be made carefully taking into account the concepts and definitions that follow:

Labour Force : The Labour force is composed of the economically active population aged 10 years and over.

Economically Active Population : The economically active population is defined as those persons who were employed or unemployed during the reference period of the survey.

Employed : Employed persons are all household members who worked as paid employees, employers, own account workers (self-employed) or unpaid family workers in family enterprises during the reference period. Also included are persons who had a job but were temporarily absent from work due to vacation, illness, bad weather, and labour management disputes etc. It should be noted that if a person has one or more jobs, that person is counted only once in this primary job.

Unemployed : Persons who were available an/or looking for work, and had no employment during the reference period, are considered to be unemployed.

Reference Period : In this survey there are two reference periods, "current" and "usual". The "current" reference period is the week preceding the week of data collection, i.e. "last week" The "Usual" reference period is the preceding 12 months, i.e. the past 12 months.

Currently Economically Active : A person who was employed or unemployed is considered to be currently economically active.

Usually Economically Active : A person whose major activity during the past 12 months was employment and/or unemployment is considered to have been usually economically active. Twenty-six weeks or more is the measure that determines the major activity of the respondent for the year.

Currently Employed : A person who works for pay, profit, or unpaid family gain for one (1) hour or more during the past week is considered to have been employed during that period. This includes persons whether paid or not, with a job but not at work for the various reasons cited above.

Usually Employed : A persons whose major economic activity during the past 12 months was employment is considered to have been usually employed.

Currently Unemployed : A person who did not work but who was looking or available for work during the past week is considered to have been currently unemployed.

Usually Unemployed : A person who was available/looking for work during the major part of the economically active period of the past 12 months is said to have been usually unemployed.

Not in Labour Force (not economically active) : Persons who were neither working nor available/looking for work are classified as not in the labour force. This group included persons engaged in own house work, going to school, unable to work because of long term infirmities, retired, and others. 'Others' include persons voluntarily idle.

MEASURES OF THE LABOUR FORCE :

The working age population is the total non-institutional household population aged 10 years or over.

The participation rate is the proportion of the labour force that is in the working age population.

The labour force is the number of persons classified as employed or unemployed according to the criterion described above.

The unemployment rate represents the number of unemployed person as a percent of the labour force.

These measures can be computed for age, sex, educational attainment and other personal or economic characteristics.

Occupation, Industry and Employment Status : These apply to the job held by the currently employed during the survey week. For persons with more than one job, it is usually the main job that is described. However, classifications are also made for the secondary job. Occupations are classified according to the International Standard Classification of Occupations (ISCO) < ILO, 1988. Industry is classified according to ILO's International Standard Industrial Classification. The employment-status classification specifies employment in the public or private sectors, and further breaks down into employees (wage and salary workers), employers, own account workers (self-employed), and unpaid family workers.

Hours of Work refer to hours actually worked during the week. If the hours actually worked are less than the hours usually worked, respondents are asked the reasons for working fewer hours, which included the following; illness or injury, strike, vacation, reduction in economic activity, off season inactivity, bad weather, mechanical or electrical failure, and shortage of raw materials.

A Household consists of all persons, related or not, who occupy a housing unit, which covers a house, an apartment, a group of rooms, or a single room when occupied as separate living quarters. Domestic Servants, boarders and lodgers who live and have their meals or share other essentials of living with the family are also treated as members of the household. Households with more than 5 lodgers (non-family members paying rent) and boarders, are considered as institutional units and are excluded from the survey. Persons, who usually live here but are temporarily away are included as members of the household, but persons who have usual residence elsewhere, but are present at the time of the interview, are excluded.

3. Sample Design

A stratified two stage probability sample design is, used with census blocks as primary sampling units (PSU's) and housing units as secondary and final sampling units (SSU's). National sample of approximately 20,000 housing units (excluding Northern and Eastern Provinces) was selected to provide reasonably accurate results at district level as well as national level.

CONCEPTS & DEFINITIONS

- Labour Force:** The labour force is composed of the economically active population 10 years of age and over.
- The economically active population:** is defined as those persons who are/were employed or unemployed during the reference period of the survey.
- Employed:** Persons, who during the reference period, worked as paid employees, employers, own account workers (self - employed), or unpaid family workers are said to be employed. This includes persons with a job but not at work during the reference period.
- Unemployed:** Persons available and/or looking for work, and who did no work, during the reference period are said to be unemployed.
- Reference period:** In this survey there are two (2) reference periods, "current" and "usual". The "current" reference period is the week preceeding the week of the survey, i.e., last week. The "usual" reference period is the preceeding 12 months, i.e., the past 12 months.
- Currently economically active:** A person who was employed or unemployed during the current reference period is considered to be currently economically active.
- Usually economically active:** A person whose major activity during the past 12 months was employment and/or unemployment is considered to have been usually economically active.
- Currently employed:** A person who worked for pay, profit, or unpaid family gain for one (1) hour or more during the past week is said to be currently employed.
- Usually employed:** A person whose major economic activity during the past 12 months was employment is said to have been usually employed.
- Currently unemployed:** A person who did no work but was looking or available for work during the past 4 weeks is said to be currently unemployed.
- Usually unemployed:** A person who was looking or available for work during the major part of the past 12 months is said to have been usually unemployed.
- Not in the labour force (not economically active):** Persons who were neither working nor available/looking for work are classified as "not in the labour force". Persons are not in the labour force for such reasons as: full-time care of the household, full - time students, retired or old age, infirmed or disabled, or are not interested in working for one reason or another. Current and usual definitions apply.
