Preface

Sri Lanka Labour Force Survey was designed to measure the levels and trends of employment, unemployment and labour force in Sri Lanka. This survey is being conducted quarterly, since the first quarter of 1990. A nationally representative annual sample of about 18,000 housing units have been selected for the survey in 2003. The present report, which is the fifty fifth in the series, is based on a sample of 4500 housing units and gives national estimates with a stipulated standard error of labour force characteristics as reported in the reference period of the fourth quarter of 2003. Districts under the Northern province are not covered in this publication.

Planning and the execution of the survey was done by the staff of the Sample Surveys Division under the direction of Mr. G.Y.L. Fernando, Director (Sample Surveys) and under the supervision of Mr. J.A.P. Balasuriya and Mrs. E.A.G. Perera, Senior Statisticians.

The computer data processing was done by Mrs. W.A.S.M.P. Gunasekara, Mr. H.T. Fonseka, and Mr. S.A.J.C.B. Satharasigha Statistical Officers, of Sample Surveys Division, under the direction of Mrs. Dharma Dissanayaka, Senior Statistician and under the supervision of Mr. P.A. Subawickrama, Statistician using Microcomputers.

This publication was organized and prepared by Mr. J.A.P. Balasuriya, Senior Statistician under the direction of Mr. G.Y.L. Fernando, Director (Sample Surveys).

The Data Processing Division under the direction of Mrs. S.V. Nanayakkara, Director (Data Processing) and under the supervision of Mr. Migara Fernando, Systems Analyst/Programmer was responsible for the survey data entry and preparation of computer edit and final tabulation programmes.

District field staff of the Department who worked on the survey deserve a special word of thanks. They include District Senior Statisticians/ Statisticians and field Statistical Officers, who worked hard at the data collection stage, to make this survey a success.

Printing of the report was done at the Printing Division, under the supervision of Mr. S.Hettiarachchie, Senior Statistician.

Finally, I wish to express my appreciation to all the respondents of the survey for their co-operation.

1. INTRODUCTION

The field work of the survey in the fourth quarter of 2003 was done in October and November 2003 and the current labour force status of persons was measured as in the reference weeks of October and November 2003. The estimates described in the following sections **will not cover only the Northern Province and it includes Eastern Province commencing first quarter 2003** in its national level estimates and the survey covers only the persons living in housing units and it excludes the institutional population.

2. Working Age Population (age 10 years & over)

◆ The survey estimated that 15.8 million persons as being in the working age population of Sri Lanka (excluding the Northern province) during the survey period.

◆ Of the working age population 49.0 percent are males and 51.0 percent are females.

Table (i) - Distribution of population by age & sex

Age (in years)	Total	Male	Female
All age groups	100.0	100.0	100.0
10 - 14	11.1	11.7	10.5
15 - 19	10.8	11.1	10.6
20 - 24	11.5	11.7	11.2

30 - 39	18.0	17.2	18.7
40 +	39.6	39.3	40.0

3. Economically Active Population

◆ The overall participation rate in the labour force is nearly 49.6 percent. It is 68.0 percent for male and 32.0 percent for females.

◆ Table (ii) shows nearly half of the working age (50.2%) population in the rural sector is economically active.

◆ It is observed that a higher participation rate is reported for higher levels of education.

4. Employed Population

◆ 7.21 million persons were estimated as being the employed population in Sri Lanka. (excluding Northern province) during the survey period. This number accounts for 92.1 percent of the total labour force.

◆ Of the employed persons 12.4 percent were residing in the urban sector and 87.6 percent were residing in the rural sector.

◆ It is observed that the majority of the employed persons are engaged in 'Services' sector activities. It is nearly sixty nine percent for urban sector and 40.7 percent for rural sector.

◆ There is no marked difference of the proportions of the females engaged in the 'Industries' sector and 'Services' sector activities in the urban and the rural areas. It is around 30 percent for both areas.

Industries

1. Manufacturing
2. Construction
3. Mining & Quarrying
4. Electricity, Gas and Water supply

Services

4.1 By level of education

- ◆ The employed persons who have passed G.C.E.(A/L) and above have reported a higher proportion (13.1 percent) in the 'Services' sector activities as compared with the other two sectors, 'Agriculture' and 'Industries'.
- ◆ The lowest proportion (2.5 percent) of the employed persons with G.C.E.(A/L) and above is reported in the 'Agriculture' sector.
- ◆ The majority of the employed persons in three major categories have educational qualifications only below gr. 10.

4.2 By employment status

- ◆ It is seen from table (vi), that a majority of the employed persons (59.2 percent) work as "employees". A similar form of trend is observed for 'Industries' & 'Services' sector activities.
- ◆ Nearly forty five percent of the persons employed in 'Agriculture' sector are reported to be "Own account workers"
- ◆ Nearly one fifth of the (20.1 percent) employed persons engaged in 'Agriculture' sector activities are unpaid family workers. It is less than five percent for 'Industries' and 'Services' sector activities.

5. Unemployed Population

◆ The survey estimated the total unemployed population as 0.61 million, of which 0.30 million are males and 0.31 million are females.

5.1 Unemployment rate

◆ Unemployment rate is reported to be 7.9 percent in the fourth quarter of 2003. That is of all economically active persons, 7.9 percent are unemployed.

◆ It is observed that the unemployment rate increases with the increase of the level of education.

◆ The table (vii) shows that the unemployment is higher among females than males.

◆ The female unemployment rate is more than two times (23.3 percent) that of the male unemployment rate (11.4 percent) among those who have passed G.C.E.(A/L) and above. It indicates that unemployed females are more educated than their male counterparts.

5.2 Duration of Unemployment

◆ Nearly 77 percent of the unemployed persons passed the G.C.E.(A/L) and above have been seeking work for a period exceeding one year. It is 63 percent for unemployed persons passed below grade 5

◆ Nearly one fourth (24.8%) of the unemployed persons passed below grade 5 has been seeking work for a period less than six months.

Table (vii) - Unemployment rate by level of education & sex

Level of education	Total	Sex

G.C.E.(A/L)	100.0	11.8	11.1	77.1

Statistical significance of the change in unemployment rate

- ◆ Estimated value of the unemployment rate in fourth quarter of year 2003 = 0.079
- ◆ Estimated value of the unemployment rate in third quarter of year 2003 = 0.084

The difference between the above estimated values is not statistically significant at 5 percent level of significance (two tail test)

7. Alternative Estimates of Employment, Unemployment and Labour Force Characteristics

◆ Official employment, unemployment and labour force characteristics are estimated at the Sri Lanka Labour Force Survey, based on the internationally comparable concepts and definitions recommended by the ILO. However the validity of the concepts and definitions used at the survey is questioned very often in some forums, for the appropriateness of these concepts and definitions in the Sri Lankan context.

The concepts and definitions, which were found to be controversial are as below.

(1) Number of Hours of Work :

A person who work **at least one hour** during the reference week, is considered **employed**, under these definitions.

(2) Working Age Population :

All persons of **age 10 years and over** are considered to be in the working age.

(3) Employment Status :

All, a) Paid employees, (those who work for wages/salaries).

b) Employers (who have at least one paid employee under them).

c) Own account workers (who carry out the economic activity without having any paid employees).

d) Unpaid family workers (who make their contribution to the economic activities carried out by their own household, without wages/salaries).

The validity of the above concepts and definitions is raised due to the following reasons.

(1) **Number of hours of Work** : Some point out that **one hour per week** is too low, to consider a person to be employed.

(2) **Working age Population** : Some point out that persons in the age group 10-14 yrs. are too young to consider to be in the working age.

(3) **Employment Status** : Some point out that 'unpaid family workers' may work in the family enterprise **without payment** because they have no other work, and so it is not appropriate to consider them as **employed**.

An attempt has been made to produce '**Alternative estimates of Employment, Unemployment and Labour Force Characteristics**,' by revising the original concepts and definitions so that the above issues are addressed as explained below.

The revisions made are,

(1) Number of Hours of Work :

Persons who work **20 hours or more per week only** are considered to be employed.

(2) Working Age Population :

Persons who are **over 15 yrs of age only** are considered to be in the working age.

(3) Unpaid Family Worker :

Unpaid family workers are **not** considered as employed. Those unpaid family workers who were reported to be seeking some other work are considered as **unemployed** and the rest of the unpaid family workers are considered as **economically inactive** (not in the labour force) so **only, a) paid employees b) employers and c) own account workers are considered to be employed.**

Following tables are based on the above alternative concepts and definitions.
