### III. – Population

[Questions 1 through 17 in this section consist of a table, with the following headers and spaces for the data of three or more separate people. Except for the question on relationship to head of household, the questions and response options for both individuals are identical and only one set is printed here. Also, since the second person formal and third person conjugations are identical in Spanish, the questions are phrased in such a way that they could be asked either directly of the person, “are you,” or about the person “is he/she.” I have chosen to translate them as asked in the second person formal unless context demands otherwise.]
