## Preface

*This volume contains the codebook and documentation for the dataset of the 1982 Third Chinese Population Census. The dataset is distributed by the China Statistics Archives (CSA) at the University of Illinois at Chicago in collaboration with the China Statistical Information and Consultancy Service Center (CSICSC).*

*Chapter One deals with "Technical Documentation" which contains the sampling design, number of domestic households and individuals, the census form and explanations of concepts and terms.*

*Chapter Two provides the codes used in the dataset.*

*Chapter Three provides the logical structure of the dataset.*

## **Chapter 1 Technical Documentation**

## 1.1 Sampling Design and Evaluation of the 1% Sample 1982 Population Census of China

There are two types of household records in the 1% Sample 1982 Population Census of China: the domestic household and the collective household. The sample of domestic household was drawn based on records of one-in-one hundred systematically selected households and individual records by taking every 100th households and all of their family members from the original 1982 Population Census of China after a random start. The sample of collective households was taken from every 100th individual in all collective households. Thus some collective households with less than 100 members were not sampled.

To estimate the population parameter the ordering of the population from which the systemic sample was drawn is important. When the population is ordered randomly the the procedure for estimating population parameter is equal to a simple random sample. In the one-in-one hundred systemic sample of the 1982 Population Census of China the population was listed in order of administrative divisions which can be considered a random order.

Equations for estimating the population mean and proportion are listed below (equations are taken from Mendenhall, Ott and Scheaffer, Elementary Survey Sampling, 1971, Belmont, California: Wadsworth Publishing Company, Inc. :

1. Estimator of the population mean  $\mu$  :

$$\mu = \bar{y}_{sy} = \frac{\sum_{i=1}^n y_i}{n} \quad (1)$$

Where  $\bar{y}_{sy}$  is the mean of systemic sample which is calculated by the sum of each sample observation divided by sample size n.

2. Estimated variance of  $\bar{y}_{sy}$ :

$$V(\bar{y}_{sy}) = ((N-n)/N) \times (s^2/n) \quad (2.1)$$

where

$$s^2 = \frac{\sum_{i=1}^n (y_i - \bar{y}_{sy})^2}{n-1} \quad (2.2)$$

3. Bound on the error of estimation:

$$2 \sqrt{V(\bar{y}_{sy})} = 2 \sqrt{((N-n)/N) \times (s^2/n)} \quad (3)$$

The quantity  $((N-n)/N)$  is called the finite population correction ( $fpc$ ). When n remains small relative to the population size N, the  $fpc$  is close to unity. In this dataset since  $n=1\%N$  and  $((N-n)/N) = .99$  the  $fpc$  can be ignored.

4. Estimator of the population proportion p:

$$\hat{p}_{sy} = \bar{y}_{sy} = \frac{\sum_{i=1}^n y_i}{n} \quad (4)$$

5. Estimated variance of  $\hat{p}_{sy}$ :

$$V(\hat{p}_{sy}) = ((\hat{p}_{sy} \times q_{sy})/(n-1)) \times ((N-n)/N) \quad (5)$$

where  $q_{sy} = 1 - \hat{p}_{sy}$ .

6. Bound on the error of estimation

$$2 \times \sqrt{V(\hat{p}_{sy})} = 2 \times \sqrt{((\hat{p}_{sy} \times q_{sy})/(n-1)) \times ((N-n)/N)} \quad (6)$$

Again we can ignore the  $fpc$ ,  $((N-n)/N)$ , in this dataset since the  $n$  is small.

# 1.3 THE THIRD NATIONAL POPULATION CENSUS FORM

(Reference Time: 00:00 a.m. July 1, 1982)

Our translation of the Third National Population Census Form includes categories of information from the original Chinese form, which are available on this computer tape. It should be noted that the original Chinese form collected the following data:

- IV. Number of births in the household 1981  
Number of male and female births (only the total number of births is available on the tape).
- V. Number of deaths in the household 1981  
Number of male and female deaths (only the total number of deaths is available on the tape).
- VI. Number of registered persons absent over one year.

## **1.4 Explanation of Concepts and Terms in the Third National Population Census Form**

### **Household**

Two kinds of households are included: domestic households and collective households. Domestic household refers to a group of individuals who are either relatives or non-relatives, live in one residential unit and are registered as one household. Collective household refers to a group of individuals who live in the same dormitory in a college (or school) or in the same living quarters for staff and workers in a factory or other organization.

### **Ethnicity**

A person's ethnicity is determined by his/her parent's ethnicities. A person's ethnicity can be identified with either his/her father's or mother's ethnicity if this person's parents have different ethnicities. The choice is made by the person if he/she is 18 years old or over, or by the parents if he/she is under 18.

### **Educational Level**

College graduate refers to those who have graduated from institutions beyond high school level, including two-year, four- or five-year colleges and universities, and postgraduate education.

Undergraduate refers to those who have studied in post high school institutions but were either not yet graduated or never graduated. The latter include those who are currently enrolled.

### **Employed Person**

Employed person refers to all those who are employed, regularly or temporarily, by state owned, collective owned, or other ownership units, and those who run their own businesses and their employees.

### **Industry**

The Industrial Classification Standards for National Economy used in the 1982 Population Census identifies 15 major industrial categories shown in the following table. The Chinese classifications are shown below in relation to the 1986 UN International Standard Industrial Classification.

#### **Industrial Classification Standards for the National Economy used in the 1982 Population Census**

#### **Relevant United Nations International Standard Industrial Classification**

1. Farming, forestry, animal husbandry, and fishing	Agriculture, hunting, forestry, and fishing
2. Mining and lumbering	Mining and quarrying
3. Production and supply of electricity, gas, and piped water	Electricity, gas, and water
4. Manufacturing	Manufacturing
5. Geological prospecting and surveying	
6. Construction	Construction

7. Transport, posts, and communications	Transport, Storage and Communications
8. Commerce, food service, material supply and marketing, and storage	Wholesale and retail trade, restaurants and hotels
9. Real estate management, public, residential and consultancy services	Financing, insurance, real estate and business service
10. Health care, sports, and social welfare	
11. Education, culture, and the arts	Community, social and personal service
12. Scientific research and polytechnical service	
13. Banking and insurance	
14. Government agencies, party agencies, and social organizations	
15. Other industries	Activities not adequately defined

#### Occupation

Occupation refers to the type of work in which a person is employed. The Standard Occupational Classification used in the 1982 Population Census distinguishes 8 categories. These categories are shown in relation to the UN 1969 Listing of International Standard Classification of Occupation.

Standard Occupation Classification used in the 1982 Census	Relevant United Nations International Standard Classification of Occupations
1. Scientific and technical staff	Professional, technical, and related workers
2. Administrators in government, parties, and social organizations, enterprises, and institutions	Administrative and managerial workers
3. Office and related workers	Clerical and related workers
4. Commercial workers	Sales workers
5. Service workers	Service workers

6. Workers in farming, forestry, animal husbandry, and fishery	Agriculture, animal husbandry, and forestry workers, fishermen, and hunters
7. Production, transportation, and related workers	Production and related workers, transport equipment operators, and laborers
8. Others not classified	Workers not classifiable by occupation

---

#### **Status of Non-Working Person**

Awaiting school enrollment refers to those who had graduated from schools but failed to be admitted to higher level schools, and who are preparing for the next entry examinations and are not seeking employment.

Awaiting government job assignment refers to those who are entitled to receive, and are waiting for, government job assignment. Those who are entitled include graduates from colleges, universities, and specialized secondary schools, and veterans who lived in urban areas before joining the armed forces.

Urban unemployed refers to persons in the working age cohort (ages 16-50 for men, 16-45 for women), who are able-bodied, have registered with local government agencies for employment, and have not yet received employment.

Other refers to other unemployables, such as the handicapped and prisoners.

#### **Marital Status**

The status "married" includes couples living together as well as those legally married.

## Chapter 2 Codebooks

## **2.1 Standard Classification of Industries**

## **2.4 Codes for Administrative Divisions**

## EXPLANATORY NOTE FOR THE CODES OF THE ADMINISTRATIVE DIVISIONS IN THE 1982 POPULATION CENSUS DATA

Codes for the administrative divisions are indicated by 6-digit numbers. The first two digits represent provinces or municipalities; the second two digits represent large cities or prefectures; the last two digits represent districts of a large city, counties or small cities.

There are certain principles in the structure of the area codes in the 1982 census data. In all provinces if the second two digits are below 21 a large city is indicated. Whereas if the second two digits are equal to or above 21 a prefecture is identified. If the third two digits are below 21 a district of large city or a small city is identified. If the third two digits are equal to or above 21 then a county is indicated. These principles are shown in Figure 1 below.

## **Chapter 3 Configuration of the Dataset**

### 3.1 Configuration of the Dataset

The dataset of the 1982 Population Census of China is a hierarchical file that contains two levels of hierarchy -- household and individual. There are two types of household, the domestic household and the collective household. For domestic households, each household observation is followed by observations of all individuals in this household. The structure of the dataset is indicated as Figure 1 below.

Figure 1. The Structure of the Dataset

The record length for both household and individual observations are 44 bytes. The record of household and individual observations are distinguished by a variable called "Recordtype". The "Record type" is an one digit variable occupying the first column of each observation (1 = Domestic Household; 2 = Collective Household; 3 = Individual). The code-book for household and individual observations are listed as Table 1 and Table 2 below.

Table 1. Codebook for Household Records

Column	Size (byte)	Question or Variable
1	1	Type of Record 1 = Domestic Household 2 = Collective Household
2-3	2	Province/Municipality/Autonomous Region*
4-5	2	City/Prefecture*
6-7	2	District/County*
8-14	7	Commune/Street Committee**

15-17	3	Household ID
18-20	3	Number of persons in the household
21-22	2	Number of birth(s) in the household in 1981
23-24	2	Number of death(s) in the household in 1981
25-27	3	Number of persons who had registered but were not living in the household in 1981

Table 2. Codebook for Individual Records

Column	Size (byte)	Question or Variable
1	1	Type of Record 3= Individual record
2-4	3	Individual ID
5	1	Relationship to the head of the household 1=Head of household 2=Spouse 3=Child 4=Grandchild 5=Parent 6=Grandparent 7=Other relative 8=Non-relative
6	1	Sex 1=Male 2=Female
7-9	3	Age
10-11	2	Ethnicity*
12	1	Registration Status 1=Residing and registered here 2=Residing here over 1 year, but registered elsewhere. 3=Residing here less than 1 year, absent from the registration place 1 year or more. 4=Living here with registration unsettled 5=Used to reside here; is now abroad with no local registration

13	1	Educational Level 1=College graduate 2=Undergraduate 3=Senior middle school 4=Junior middle school 5=Primary school 6=Illiterate or semi-literate
14-16	3	Industry**
17-19	3	Occupation***
20	1	Status of Non-Working Person 1=Student 2=Housekeeping 3=Awaiting school enrollment 4=Awaiting government job-assignment 5=Urban unemployed 6=Retired or resigned 7=Other
21	1	Marital Status 1=Never married 2=Married 3=Widowed 4=Divorced
22-23	2	Number of children ever born
24-25	2	Number of children now living
26	1	Birth order in 1981 1=First birth 2=Second birth 3=Third birth 4=Fourth birth 5=Fifth or more
