## I. Objectives

This survey was designed to achieve the following objectives:

- Assist the World Bank in gaining a better understanding of how stakeholders in Guatemala perceive the Bank;
- Obtain systematic feedback from stakeholders in Guatemala regarding:
  - Their views regarding the general environment in Guatemala;
  - Their overall attitudes toward the World Bank in Guatemala;
  - Overall impressions of the World Bank's effectiveness and results, knowledge and research, and communication and information sharing in Guatemala; and
  - Perceptions of the World Bank's future role in Guatemala.
- Use data to help inform the Guatemala country team's strategy.

## II. Methodology

In July 2012, 90 stakeholders of the World Bank in Guatemala were invited to provide their opinions on the Bank's assistance to the country by participating in a country survey. Participants in the survey were drawn from among the office of the President or Prime Minister, the office of a Minister, the office of a Parliamentarian; employees of a ministry, ministerial department, or implementation agency; consultants/contractors working on World Bank supported projects/programs; project management units (PMUs) overseeing implementation of a project; local government officials or staff; bilateral agencies; multilateral agencies; private sector organizations; private foundations; the financial sector/private banks; NGOs; community-based organizations; the media; independent government institutions; trade unions; faith-based groups; academia, research institutes or think tanks; and the judiciary branch. A total of 62 stakeholders participated in the country survey (69%).

Respondents received the questionnaires via courier. Respondents were asked about: general issues facing Guatemala, their overall attitudes toward the Bank; the World Bank's effectiveness and results; the Bank's knowledge; working with the World Bank; the Bank's future role in Guatemala, and the Bank's communication and information sharing in Guatemala:

- A. General Issues facing Guatemala: Respondents were asked to indicate whether Guatemala is headed in the right direction, what they thought were the top three most important development priorities, and which areas would contribute most to reducing poverty and generating economic growth in Guatemala.

## II. Methodology (continued)

- B. Overall Attitudes toward the World Bank: Respondents were asked to rate their familiarity with the World Bank, the Bank's effectiveness in Guatemala, Bank staff preparedness, the extent to which the Bank should seek to influence the global development agenda, their agreement with various statements regarding the Bank's work in Guatemala, and the extent to which the Bank is an effective development partner. Respondents were also asked to indicate the sectoral areas on which it would be most productive for the Bank to focus its resources, the Bank's greatest values and greatest weaknesses in its work, the most and least effective instruments in helping to reduce poverty in Guatemala, with which groups the Bank should work more, and to what reasons respondents attributed failed or slow reform efforts.
- C. World Bank Effectiveness and Results: Respondents were asked to rate the extent to which the Bank's work helps achieve sustainable development results in Guatemala, the Bank's level of effectiveness across thirty-six development areas, such as economic growth, and the extent to which the Bank meets Guatemala's need for knowledge services, financial instruments, and mobilizing additional financial resources for development.
- D. The World Bank's Knowledge: Respondents were asked to indicate how frequently they consult Bank knowledge/research, the areas on which the Bank should focus its research efforts, and to rate the effectiveness and quality of the Bank's knowledge/research, including how significant of a contribution the Bank's knowledge/research make to development results, the technical quality of the Bank's knowledge/research, and the Bank's effectiveness at providing linkage to non-Bank expertise.
- E. Working with the World Bank: Respondents were asked to rate their level of agreement with a series of statements regarding working with the Bank, such as the World Bank's "Safeguard Policy" requirements being reasonable, working with the World Bank increasing Guatemala's institutional capacity, and the Bank disbursing funds promptly.
- F. The Future Role of the World Bank in Guatemala: Respondents were asked to rate how significant a role the Bank should play in Guatemala's development and to indicate what the Bank should do to make itself of greater value in Guatemala. Respondents were also asked to rate their familiarity with the IFC, how effectively the various parts of the Bank collaborate, and how significant a role the IFC should play in Guatemala's development.
- G. Communication and Information Sharing: Respondents were asked to indicate where they get information about economic and social development issues, how they prefer to receive information from the Bank, their access to the Internet, and their usage and evaluation of the Bank's website and PICs. Respondents were asked about their awareness of the Bank's Access to Information policy, past information requests from the Bank, and their level of agreement that they use more data from the World Bank as a result of the Bank's Open Data policy. Respondents were also asked their level of agreement that they know how to find information from the Bank and that the Bank is responsive to information requests.
- H. Background Information: Respondents were asked to indicate their current position, specialization, whether they professionally collaborate with the World Bank, their exposure to the Bank in Guatemala, and their geographic location.

In addition, when possible, responses from respondents completing this year's survey were compared to responses from the 217 respondents (40% response rate) who completed the country survey in FY 2004. Notations and/or charts are included when these comparisons were possible.

### III. Demographics of the Sample

#### Current Position

- For further analyses, the small number of respondents from the office of a Minister was combined with those from the office of the President. In addition, the few consultants working on Bank-supported projects and respondents from the office of a Parliamentarian, PMUs, local government, private foundations, NGOs, and independent government institutions were included in the “Other” category. Note there were no respondents from bilateral agencies, multilateral agencies, the financial sector/private banks, CBOs, trade unions, faith-based groups, or the judiciary branch.

### III. Demographics of the Sample (continued)

#### Area of Primary Specialization

### III. Demographics of the Sample (continued)

#### Geographic Location

- Nearly all respondents indicated that they were located in Guatemala City. Because of there were too few respondents from the Eastern and Western parts of the country, analyses comparing geographic locations could not be conducted.

### III. Demographics of the Sample (continued)

#### Professional Collaboration with the World Bank

#### Exposure to the World Bank

### III. Demographics of the Sample (continued)

#### Familiarity with the World Bank

- Across all respondents, familiarity with the Bank received a mean rating of 6.4 on a 10-point scale with 1 being not familiar at all and 10 being extremely familiar. This was statistically similar to the FY '04 survey, in which familiarity with the Bank received a mean rating of 6.8 across all respondents.
  - Although it was not a significant difference, respondents from the office of the President/Minister indicated the highest levels of familiarity with the Bank whereas respondents from the media and private sector indicated the lowest familiarity levels.
  - It should be noted that respondents' ratings of familiarity with the Bank were significantly, strongly correlated with their impressions of the Bank's overall effectiveness in Guatemala as well as significantly, strongly correlated with their perceptions of the Bank's ability to help achieve sustainable development results and the Bank's relevance to Guatemala's development.

## IV. General Issues facing Guatemala

### Headed in the Right Direction

- When asked whether Guatemala was headed in the right or wrong direction, the vast majority of respondents indicated that Guatemala was headed in the right direction, significantly more than in the FY '04 country survey.
  - The vast majority of employees of ministries and respondents from the Office of the President/Minister, private sector, academia/research institutes, and other organizations indicated that Guatemala was headed in the right direction; however, respondents from the media were equally split between Guatemala being headed in the right direction and being headed in the wrong direction.

## IV. General Issues facing Guatemala (continued)

### Development Priority

- Over half of all respondents indicated that poverty reduction was the most important development priority in Guatemala. Rural development and basic education were also considered top priorities. Respondents from academia/research institutes also indicated that basic infrastructure was a top priority.
  - In the FY '04 country survey\*, reducing poverty (42%), education (25%), employment (24%), and investment/business climate (22%) were considered the most important development priorities for Guatemala.

\*Not all of the response options provided in the FY '13 survey were provided in the FY '04 survey.

## IV. General Issues facing Guatemala (continued)

  - Employees of ministries and respondents from other organizations gave the highest ratings for the Bank's effectiveness at food security and basic education whereas respondents from the office of the President/Minister, the private sector, the media, and academia/research institutes gave significantly lower ratings for the Bank's effectiveness in these areas.
  
- Responses across all stakeholder groups and both country surveys can be found in the Appendix.

## VI. Sectoral Effectiveness (continued)

### Specific Areas of Effectiveness (continued)

- Respondents in this year's country survey gave significantly higher ratings for the Bank's effectiveness at water and sanitation compared to respondents in the FY '04 country survey. Respondents across both country surveys gave statistically similar ratings for the Bank's effectiveness at the other areas that could be compared.

## VI. Sectoral Effectiveness (continued)

### Drivers of Effectiveness

To determine the key drivers of respondents' ratings of the Bank's overall effectiveness and ratings of its ability to help achieve sustainable development results in Guatemala, bivariate correlational analyses were conducted using respondents' ratings of the thirty-six specific areas of effectiveness.

Correlational analyses, however, are not able to tell us exactly what is causing respondents' ratings of the Bank's overall effectiveness or ratings of its ability to help achieve sustainable development results. Rather, these analyses tell us that as ratings of effectiveness in one area increase, respondents' ratings of the Bank's overall effectiveness increase, or as ratings of effectiveness in one area increase, ratings of the Bank's ability to help achieve sustainable development results increase. Thus, it can be inferred that respondents' perceptions of effectiveness in one specific area are related to, or drive, respondents' perceptions of the Bank's overall effectiveness or perceptions of the Bank's ability to help achieve sustainable development results.

- **Overall Effectiveness:** Those specific areas with the highest Pearson Product-Moment correlations were determined to be the most closely related to perceptions of the Bank's overall effectiveness, suggesting that ratings of effectiveness in those specific areas are drivers of perceptions of the Bank's overall effectiveness in Guatemala. The areas determined to be key drivers from these analyses were:
  - The Bank's effectiveness at transport;
  - The Bank's effectiveness at law and justice;
  - The Bank's effectiveness at basic education; and
  - The Bank's effectiveness at poverty reduction.
  
- **Achieving Sustainable Development Results:** Those specific areas with the highest Pearson Product-Moment correlations were determined to be the most closely related to perceptions of the Bank's ability to help achieve sustainable development results in Guatemala, suggesting that ratings of effectiveness in those specific areas are drivers of perceptions of the Bank's ability to help achieve sustainable development results. The areas determined to be key drivers from these analyses were:
  - The Bank's effectiveness at anti-corruption and
  - The Bank's effectiveness at basic education.

## Appendix E: Guatemala FY 2013 Questionnaire

### **World Bank Client Survey FY13 – Guatemala**

The World Bank is interested in gauging the views of clients and partners who are either involved in development in Guatemala or who observe activities related to social and economic development. The following survey is meant to give the World Bank's team that works in Guatemala, greater insight into how the Bank's work is perceived. This is one tool the World Bank uses to assess the views of its critical stakeholders. With this understanding, the World Bank hopes to develop more effective strategies, outreach and programs that support development in Guatemala. The World Bank commissioned an independent firm to oversee the logistics of this effort in Guatemala. This ensures anonymity and confidentiality. We hope you'll be candid. To complete the survey, please circle/check the response that most accurately reflects your opinion. **If you prefer not to answer a question, please leave it blank.**

**PLEASE NOTE: IN SOME CASES THE SURVEY WILL ASK FOR A SPECIFIC NUMBER OF RESPONSES. PLEASE DO NOT CHOOSE ANY MORE THAN REQUESTED. IF MORE RESPONSES ARE CHOSEN, DATA CANNOT BE INCLUDED IN ANALYSIS.**
