1970 CENSUS OF POPULATION AND HOUSING

THIS FORM IS FOR YOUR HOUSEHOLD

This census is authorized by Commonwealth Act No. 591, which empowers the Bureau of the Census and Statistics to collect data on population and all phases of the Philippine socio-economic life. The last census was in 1960.

The 1970 Census of Population and Housing will not only take a count of the number of inhabitants in the country but will also determine their various characteristics, such as geographic distribution, age, sex, marital status, education, housing conditions and facilities.

An analysis of these information will provide facts regarding the growth, distribution and composition of the population and their habitation. These facts will be used in the assessment of current and future population and housing growth as basis for policy and action.

The law requires that the census questions be answered. Estimates may be made where exact answers are not known. The law guarantees that the information you furnish will be accorded CONFIDENTIAL treatment. Your census report cannot be used for purposes of taxation, investigation, or law-enforcement procedures.

Your whole-hearted cooperation is hereby requested to ensure the success of this undertaking.

Thank you.
