We are conducting research on families in all regions of Russia, which touches on various aspects of life, and is conducted in order to understand how the economic reforms influence the daily life of Russian citizens.

Your family, as well as four thousand other families in Russia, was chosen randomly by computer.

All information collected in the course of the research will be used only in synthesized form. No one, except myself and the organizers of the survey, will know about our discussions.

We understand that you will spend some of your free time on the interview. Besides this, answering these questions is, of course, work. Therefore, we will pay you as much as our resources allow.

Participation in our research is voluntary and you always have the right to refuse to answer the questions.
