## PREFACE

Household Income and Expenditure Survey 1990/91 was undertaken by the Department of Census and Statistics to obtain detail information on household income and expenditure.

This was the sixth survey conducted by the Department under the National Household Survey Programme. The survey was done in twelve monthly rounds and was conducted from June 1990 to May 1991.

This report which is the final report is based on all twelve months data and gives information on Demographic Characteristics, Household Income and Expenditure at national level and province/district level. Although this survey was planned to cover the entire island, due to disturbances prevailed, field work could not be carried out in Northern and Eastern provinces. As such, the result given in this report excludes these two areas.

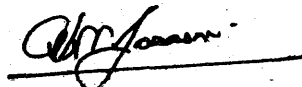

Planning of the survey, execution and analysis of data were carried out by the Sample Survey Division and data collection was done by the Statistical Investigators of the Department under the direct supervision of district Statisticians/Statistical Officers.

The report was organized and prepared by Mrs.S.M.Rajapakse and Mr.K.G.Tilakaratne Statisticians under the guidance of Mrs.D.B.P.S.Vidyaratne Additional Director and Mr.A.P.G.de Silva Deputy Director.

Manual editing, coding and correction of errors through computer edits were done by the Statistical Investigators under the supervision of Statistical Officers attached to the Sample Survey Division. Overall supervision and coordination of above work was done by Mr.K.G.Tilakaratne Statistician, assisted by Mrs.K.A.P.D.Susantha, Mrs.I.R.Bandara Statistician and Mrs.D.Dissanayake Statistical Officer.

Acknowledgements are also due to Mrs.S.V.Nanayakkara and Mr.W.Sumanasiri Deputy Directors, Mr.H.O.Chandrathilaka and the other Programmer/System Analysts and the other staff of the Data Processing Division for all data processing work done and to Mr.K.D.Siripala Deputy Director and the staff of the Printing Division for printing the report.

Finally, I wish to express my appreciation to all the district staff and all the respondents of the survey for their cooperation for the successful completion of the survey.

## 1. SURVEY METHODOLOGY

### INTRODUCTION

This survey is the **sixth** in the series of surveys conducted by the Department of Census and Statistics under the National Household Survey Programme. The survey was conducted during the period from **June 1990 to May 1991**, in twelve monthly rounds.

This survey provides comprehensive information on household income, individual income, household expenditure, per capita expenditure which are required to study the living conditions of the different segments of population. Additional background information on Demographic characteristics of the population was also collected.

### SCHEDULE

#### Introduction

The survey schedule which was canvassed to households comprised of three sections. The first page of the schedule collected the identification information of the household giving the District, Electorate, Assistant Government Agent's division, Grama Sevaka division and if situated in an Urban Sector, the name of the M.C., U.C. or T.C. and if in the Rural or Estate sector name of the village or estate respectively. The census block number to which the household belongs and the number of households within that housing unit were also recorded.

In the control data section, information was sought on the date of visit to household, result of the visit and the time taken to fill the schedule on each visit. The total number of visits made by an interviewer to a household was expected to be not more than four visits. A code indicated the result of the visit in the following manner:

completed	1
partly completed	2
no competent respondent at home	3
refused	4
household is temporarily closed	5
household is demolished	6
other	9

As a schedule had to be completed at least up to the control data for each of the selected households, these data not only control the flow of the schedules, but also enable to compute the different non-response rates such as refusal rate, demolished cases etc.

The three major sections of the schedule are Section 1, which deals with demographic characteristics of the household members, Section 2, which deals with the household expenditure incurred during different reference periods and Section 3 which deals with all sources of income received by the household members.

## Section 1

Demographic characteristics of all the members of the household, ownership and cultivation of land were collected in this section.

### Sub Section 1.1

Collected information were age, sex, relationship to head of household, race, religion, level of education (for persons 5 years of age and over), marital status (for persons 10 years of age and over).

### Sub Section 1.2

Individual economic activities of the household members including boarders, lodgers and domestic servants whose age was 10 years and above were collected in this section. These information were used as a guide to collect income from each activity of the respective member.

### Sub section 1.3

Total extent of paddy land and highland (including home garden) owned and/or cultivated by all the member (excluding boarders, lodgers and servants) of the household were collected in this section.

## Section 2

The section collected information on all expenditure incurred by the household during the given reference periods. Having considered various factors such as the pattern of usage, durability of items, the convenience of collecting information etc., the items in this section were classified into four main groups, having different recall periods.

### Sub Section 2.1

Collected information on daily consumption expenditure of the household members on food, drink and tobacco. Number of persons present for meals each day was also recorded. The quantity and the value of the items (items are grouped together under 19 sub groups) that are actually consumed (whether they consumed within the household or outside the household) were recorded for seven consecutive days, except condiments which was collected for total seven days, due to the difficulty of obtaining the small quantities consumed daily.

### Sub Section 2.2

This sub section collected information on expenditure incurred by the household for housing, clothing, fuel and light, non-durable goods and services and consumer durables etc., Different reference periods such as one month, six months, twelve months, calendar year were used for different groups having considered the buying patterns of the items in each of these groups.

### Sub Section 2.3

This section collected information on expenditure incurred by boarders, lodgers and domestic servants for major expenditure groups.

### Sub Section 2.4

This sub section collected information on indebtedness, other receipts and disbursements only for the members of the main household (excluding boarders, lodgers, servants) during the last year.

## Section 3

Information in income was collected in this section.

### Sub section 3.1 (Income - Part 1)

Collected information on income received from employment (salaries, commissions, overtime, bonus etc.), separately for principal and secondary occupations, and all other cash receipts such as pension, disability payments, relief payments, property rents, food stamps, dividends, interests etc. The information on income in kind such as meals, food items, housing, clothing, medical facilities, warrants, passes etc. provided by the employers, relations or any others were also collected.

### Sub Section 3.2 (Income - Part 2)

Collected information on agricultural activities and non-agricultural activities carried out by the household members as employers and/or own account workers. Total output, cost of production and amount consumed by the household for each activity were recorded separately for each such person. The information on agricultural activities were collected in two blocks viz. income from major agricultural activities such as paddy, other cereals and tobacco in one block and other agricultural activities in another. Monthly gross rental value of owner occupied house was also collected on the basis of housing rents prevailing in that locality.

## **SAMPLE DESIGN**

A two stage stratified random sample design was used in this survey. Each domain for which separate estimates were required was made a separate stratum. As such each sector (Urban, Rural, Estate) within each district was considered as a separate stratum.

### **Sample Size**

In this design the first stage units (FSU) were the census blocks prepared at the 1981 Census of Population and the second stage units (SSU) were the housing units. It was decided to select 10 housing units from each selected census block. Thus, a first stage sample of about 2,500 census blocks have to be selected from the entire island.

### **Sample Allocation and Method of Selection**

The allocation of 2,500 census blocks to each district was made proportional to the square root of the population ( as at 1981 Census ) in that district. These values have been rounded to multiples of twelve. The allocation thus arrived at, is given in following table.

It was decided to over sample the urban sector in each district in comparison to the rural and estate sectors with the objective of allocating roughly by one-third of the total sample. Allocation between the rural and estate sectors in each district was proportional to 1981 population. Within each stratum, the assigned number of FSU's were selected with probability proportionate to size (using the Census or adjusted housing unit counts ) with replacement.

The lists of census units prepared for the Census of Population and Housing 1981, of each selected block were updated to include new housing units and to exclude ones which are no longer in existence. This updating operation was also staggered over a period of twelve months starting from May 1990 to April 1991. For each FSU, updating was done about one month prior to the scheduled interviewing.

## Household Income and Expenditure Survey 1990/91

## Allocation of the sample HOUSING UNITS for districts and provinces

Province/ District	Urban	Rural	Estate	Total
National	9,380	14,380	1,320	25,080
Colombo M.C	1,000	-	-	1,000
Western				4,080
Colombo (remainder)	800	500	20	1,320
Gampaha	1,000	560	0	1,560
Kalutara	600	560	40	1,200
Central				3,240
Kandy	440	860	140	1,440
Matale	200	580	60	840
Nuwara Eliya	160	280	520	960
Southern				3,120
Galle	580	600	20	1,200
Matara	280	780	20	1,080
Hambantota	180	660	0	840
* Northern				3,060
Jaffna	960	240	0	1,200
Mannar	140	340	0	480
Mulativu	200	260	0	460
Vavuniya	100	360	0	460
Kilinochchi	180	280	0	460
* Eastern				2,400
Batticaloa	460	380	0	840
Ampara	260	580	0	840
Trincomalee	500	220	0	720
North Western				2,300
Kurunegala	120	1,200	20	1,340
Puttlum	280	680	0	960
North Central				1,800
Anuradhapura	180	900	0	1,080
Polonnaruwa	120	600	0	720
Uva				1,800
Badulla	200	640	240	1,080
Monaragala	40	660	20	720
Sabaragamuwa				2,280
Kegalle	200	800	80	1,080
Ratnapura	200	860	140	1,200

\* Although the sample was allocated, survey could not be done due to prevailing conditions.

### Non-Response

Of a sample of 25080 housing units selected only 19,401 households were covered in the survey. Northern and Eastern provinces were excluded in the survey due to the prevailing conditions in the area.

An analysis of the result codes of the final visit recorded in the control data section of the schedule is given below.

Results of Household Interview by Sector

Result	Sri Lanka		Urban		Rural		Estates	
	Number	%		%		%		%
Total	19401	100.0	6664	100.0	11469	100.0	1268	100.0
Completed	18462	95.2	6222	93.4	11009	96.0	1231	97.1
No competent respondent at home	39	0.2	21	0.3	16	0.1	2	0.2
Refused	30	0.2	25	0.4	5	0.0	-	-
Household is temporarily away	251	1.3	100	1.5	140	1.2	11	0.9
House is demolished/vacant	132	0.7	44	0.7	82	0.7	6	0.5
Other	487	2.5	252	3.8	217	1.9	18	1.4

A schedule is considered as completed if its sections Demographic characteristics, Income and Expenditure are duly filled by the interviewer. Table shows that the schedules obtained from 95 percent the households were fully completed while 0.2 percent have refused.

Sector wise completion rates show that Urban sector had 93 percent, Rural sector 96 percent and the Estate sector 97 percent.

# ESTIMATION PROCEDURE

Let  $X_{jk}$  be the estimates of any given characteristic for  $j^{\text{th}}$  district for the  $k^{\text{th}}$  month. This could be given by,

$$\hat{X}_{jk} = \frac{1}{m_{jk}(u)} \sum_{h(u)=1}^{m_{jk}(u)} \frac{1}{P_h(u)} \frac{N_h(u)}{n_h(u)} \sum_{i(u)=1}^{n_h(u)} X_{hi}(u)$$

$$+ \frac{1}{m_{jk}(r)} \sum_{h(r)=1}^{m_{jk}(r)} \frac{1}{P_h(r)} \frac{N_h(r)}{n_h(r)} \sum_{i(r)=1}^{n_h(r)} X_{hi}(r)$$

$$+ \frac{1}{m_{jk}(e)} \sum_{h(e)=1}^{m_{jk}(e)} \frac{1}{P_h(e)} \frac{N_h(e)}{n_h(e)} \sum_{i(e)=1}^{n_h(e)} X_{hi}(e)$$

Where

$m_{jk}(u)$  = Number of blocks selected from the urban sector of the  $j^{\text{th}}$  district for the  $k^{\text{th}}$  survey month.

$P_h(u)$  = Selection probability of the  $h^{\text{th}}$  block in the urban sector.

$$P_h(u) = \frac{S_{jh}(u)}{\sum_{h=1}^{M_{jh}(u)} S_{jh}(u)}$$

### Category 1 and 2

These were considered as fully accounted for as a schedule was completed to the extent required by the situation at the time of interview and therefore, no adjustment was necessary.

### Category 3

This is incomplete and therefore, a non-response adjustment was made for this category.

The assumption made here for the adjustment of non-response was the proportion of households in category 3 is the same as the corresponding proportion for sample household in category 1. This assumption is applied on a block by block basis separately for urban, rural and estate sectors.

$N^h$

The block weight before adjusting for unit non-response was -----

$n^h$

Where

$N_h$  = Total number of housing units listed in block h.

$n_h$  = Number of housing units selected in block h.

$N_h \quad n'_h - n_{h2}$

The revised weight should take the form, -----

$n_h \quad n_{h1}$

Where

$n_{h1}$  = number of sample households in category 1.

$n_{h2}$  = number of sample households in category 2.

$n'_h$  = total number of households in all categories  
(category 1, 2 and 3.)

## CONCEPT AND DEFINITIONS

### Census Units :

Census Units are the units listed in the pre-listing form at the Census of Population and Housing - 1981

(i) Housing unit :

A housing unit is a place of residence.

(a) Where there are walls or partitions separating it so that the occupants could live separately from other persons.

(b) has independent access.

(ii) Living quarters other than housing units :

A building or a group of buildings where a number of persons generally not related, reside under the supervision of a person in-charge.

e.g. hospital, police barrack, boarding house etc.

(iii) Non-housing unit: A building or a part of a building which is not a place of residence and does not form a part of housing unit.

e.g. office, petrol filling station etc.

### Household

A household is a single person or a group of persons who normally live together and have common cooking arrangements. It is not necessary that they be related to each other. Domestic servants, boarders, lodgers who live and have their meals with the family are also members of the household. Persons who usually live here but are temporarily away on holiday or vacation, visiting relations, out on business or receiving treatment in a hospital should be included. Those who have a usual residence elsewhere but present at the time of interview should be excluded.

### Head of Household

The head of household may be in most instances the principal bread winner of the household. In certain instances a household may recognise a senior member as the head irrespective of his contribution to the household income. The head of household could be a male or a female member who is acknowledged as such by other members of the household.

### Literacy

A person who can both read and write with understanding a short statement is considered as "literate". A person who can read and write only his own name, figures or a memorised phrase should be considered as "illiterate".

## Marital Status

The marital status of a person refers to the current "defacto" conjugal status of the person.

A person claiming to be married according to custom or repute should also be treated as married, although the marriage has not been registered according to law.

"Separated" refers to a person who has been granted a decree of separation by law and not to a person merely living in separation.

## Employed

If (s)he works as a paid employee, employer, own account worker or unpaid family worker in any economic activity is said to be employed.

## Unemployed

Persons 10 years of age and above, who did not work last 4 weeks, had no job or enterprise and were available for work are considered as "unemployed".

## Household Worker

Activities such as preparing food for household consumption, keeping house, making, mending and washing clothes, looking after children and older members of the household etc; which are carried out for the maintenance of the household are considered as household work.

## Retired/Unable to work

Persons not employed or unemployed as defined above, who had retired from employment and/or were unable to work due to disability or ill-health.

## Employer

A person who operates an enterprise or a person who operates an enterprise in partnership with others with the aid of one or more paid employee is considered as an employer.

## Employee

- (i) **Government Employee** : (S)he is an employee of the government who is paid by the government. Employees of all government departments, ministries, government schools are government employees. Persons employed by a contractor doing a contract job for the government such as constructing buildings, repairing and maintaining equipment should not be considered as government servants.

(ii) **Semi Government Employee** : (S)he is a person employed by any state corporation, a state board and the following state banks, National Savings Bank Bank of Ceylon, People's Bank, State Mortgage Bank and also all state owned business undertakings and local government authorities. e.g. Cement Corporation, Building materials Corporation, Sugar Corporation, Tea Board, Janatha Estate Development Board, Mahaweli Development Board, Universities, Local Bodies, etc.

(iii) **Other Employee** : Any "Other Employee" is any person who is an employee of an institution other than a government or semi government institution employees of private banks and other private sector institution.

### Own Account Worker

A person who operates an enterprise or a person who operates an enterprise in partnership with others, without the aid of an employee is considered as an own account worker. However, (s)he may get the assistance of unpaid family worker and household servants.

### Unpaid family worker

Class Number	339.22
Accession	11733

A person who works in an enterprise operated by a member of his household or by a group of persons including atleast one member from his household without a payment in cash or in kind.

### Main Occupation :

Main occupation is the occupation on which she/he usually works most of the time. If she/he is engaged in only one occupation then it should be the main occupation. e.g. English typist, Science teacher.

### Secondary Occupation

Any activity undertaken by the respondent for pay profit or family gain in addition to the main occupation is considered as the secondary occupation.

### Industry

The nature of the work done by the institute or the workplace/enterprise where a person works is referred to as the "Industry". If more than one activity is performed by the institute, nature of the work done by the division where this person works should be given here.

e.g. If a typist works in the advertising division of a firm where there are two divisions, namely advertising and legal services, the industry in respect of this person is advertising. If he does typing for both divisions give a note to say that he works in both advertising and legal services division.

## 2 DEMOGRAPHIC CHARACTERISTICS

### Household Population

Household Income and Expenditure survey conducted in 1990/91 reveals that the estimated household population in Sri Lanka(excluding Northern and Eastern provinces)is 14.3 million. According to the latest Census of Population and Housing held in 1981 in Sri Lanka household population was 97.7 percent of the total population. Rest of the population consists of institutional population such as people living in boarding houses, police barracks, army camps etc. The sector-wise distribution of the population was 3.0 million in Urban sector, 10.3 million in Rural sector and 1.0 million in Estate sector. The provincial distribution of the population shows that most populous is the Western province with 4.3 million and the lowest in the North-Central province with 1.0 million. Population distribution by provinces is shown in Table 2.1.

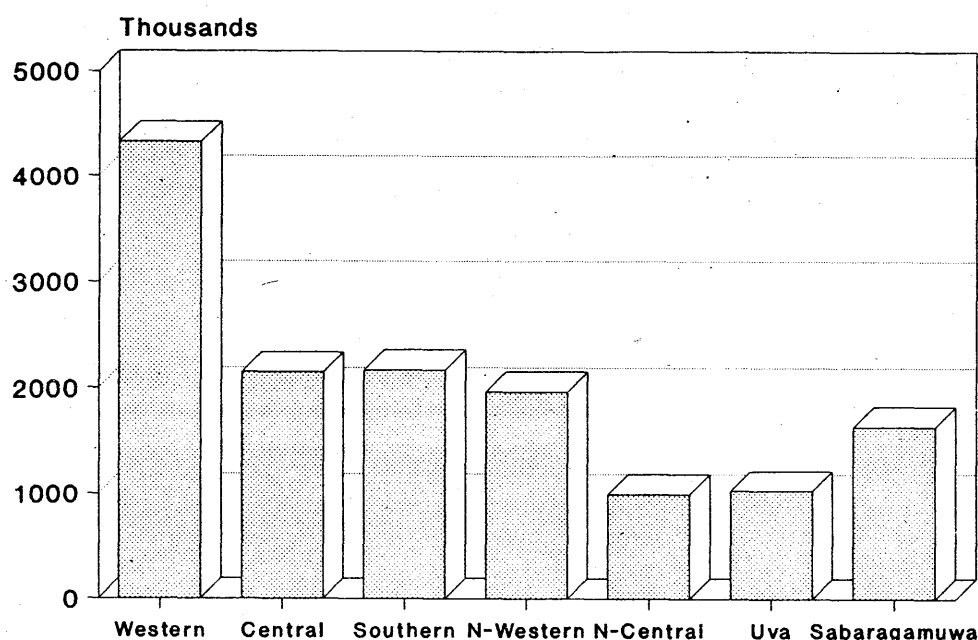

Table 2.1 - Population Distribution by Province and District

EXCLUDING NORTHERN AND EASTERN PROVINCES.

Province / District	Total	Male	%	Female	%
Sri Lanka	14,288,869	7,109,986	49.8%	7,178,883	50.2%
Western	4,328,736	2,146,667	49.6%	2,182,069	50.4%
Colombo	1,922,959	945,529	49.2%	977,430	50.8%
Gampaha	1,487,868	749,966	50.4%	737,902	49.6%
Kalutara	917,909	451,172	49.2%	466,737	50.8%
Central	2,149,832	1,058,360	49.2%	1,091,472	50.8%
Kandy	1,218,450	592,280	48.6%	626,170	51.4%

Above population comes from 2.9 million households. Of this 0.6 million households are in Urban sector, 2.1 million are in Rural sector and 0.2 million are in Estate sector.

Figure 2.1 Population by Province  
1990/91

### Population Distribution by Age and Sex.

Percentage of population by five year age groups and sex is shown in fig 2.2b. Highest percentage of population is in 10 - 14 age group for both males and females. Figure 2.2a shows the population distribution in 1985/86. When compared the two distributions it appears that the percentage of population in age groups 0 - 4 and 5 - 9 in 1990/91 population pyramid are getting shrunk.

EXCLUDING NORTHERN AND EASTERN PROVINCES.

: distribution of Sri Lanka (excluding Northern and  
aces) shows that 83.79 percent of the population is  
percent is Sri Lanka Tamils, 4.13 percent is Indian  
percent is Sri Lanka Moors and other groups consist

tion

e years and above population was estimated to be  
r 92 percent of the total population in Sri Lanka  
rthern and Eastern provinces). Of this 28.5 percent  
el, passed grade 9 and above. No schooling rate was  
the island and it was 12 percent in 1985/86. Only 0.9  
ed degree and above level. No schooling rate was  
Western province while the highest was recorded by  
ce, rates being 6 percent and 14 percent. District  
ows that Gampaha district had the lowest no school-  
percent while Nuwara Eliya district was the highest  
cent.

s  
on of age ten years and above were taken into ac-  
lculating the literacy rates. The survey reveals that  
rate in Sri Lanka is 86.57 percent. The highest  
e was shown in the Western province and the lowest  
Province. Comparing the age groups, 15 - 19 year age  
s the highest literacy rate both for males and  
s are generally ahead to female in literacy.

### 3 MONTHLY HOUSEHOLD INCOME

#### Introduction

To facilitate the collection of income information from the households, schedule consisted two major parts including seven sub-sections. However, obtaining the accurate income information is always difficult. This is not specific only to our country but also to most of the countries in the world.

#### Average Monthly Household Income

This survey estimated the average monthly household income of the country to be Rs.3549. Sector-wise distribution of the household income is Rs.5741 in Urban sector, Rs.3057 in Rural sector and Rs.2429 in Estate sector. Poorest 10 percent of the households get an average of Rs.661 per month while the richest 10 percent of the households get an average of Rs.12,963 per month. Lowest 50 percent of the households receives 21.2 percent of the total household income and the highest 50 percent of the households receives 78.8 percent of the total household income. In 1985/86 above percentages were 20.7 and 79.3 respectively. That indicates no significant change has been occurred over the period 1985 to 1991 in percentage share of the income. Percentage income shares received by each of the income group is given in fig. 3.1,

Table 3.1a - Percentage Income by Household Income Decile  
1990/91

D1-D5	50%		21.2%	
D6-D10	50%		78.8%	

Average household size increases from 3.4 persons in the lowest household income decile group to 5.9 persons in the highest group.

There is a considerable gap between average(mean) household income and median household income in the country. But there is no much difference shown between mean and median income within each income decile group.

Table 3.1b - Percentage Income by Household Income Group  
1985/86

Income Group	Household Percentage	Cumulative Household Percentage	Income Percentage	Cumulative Income Percentage

EXCLUDING NORTHERN AND EASTERN PROVINCES.

### Per Capita Income per Month

Per capita income per month in the country was reported to be Rs.708. It was Rs.1096 in the Urban sector, Rs.614 in the Rural sector and Rs.514 in the Estate sector.

Highest per capita income was reported from the Western province and the lowest per capita income was reported from the North-Central province as in the Table 3.2. The values are Rs.947 and Rs.551 respectively. Comparing per capita income decile groups, the persons in the lowest decile group received an average of Rs.161 per month and the highest decile group received an average of Rs.2767 per month.

Table 3.3 - Number of Households, Average Household Size and Average Per Capita Income by Per Capita Income Decile - Sri Lanka

Type of Information & Area	Per Capita Income Decile (Rs)									
	1	2	3	4	5	6	7	8	9	10

Per Capita Income (Rs.)	161	258	332	405	481	568	676	836	1,137	2,767

Average household size has been decreased from 5.5 persons in the lowest per capita income decile to 4.0 persons in the highest per capita income decile.

#### Income Receiver's Income.

Among the 14.3 million population in seven provinces of Sri Lanka (excluding Northern and Eastern provinces) 5.9 million reported to be income receivers. There were 2.9 million households and the average number of income receivers per household was calculated to be 2.0 persons. Of this 5.2 million of income receivers are in 10 - 64 years age group, 0.6 millions of income receivers are in 65 years and above age group while 0.1 million of income receivers are in below 10 years age group as seen in table 3.4.

Table 3.4 - Total Number of Income Receivers and Their Monthly Average Income by Income Receiver's Income Decile and Age - All Island

10th	3451 & above	188	0.2	14982	537,182	10.4	7228	47,657	7.8	6519

Average monthly income of the income receiver per month was Rs.1778 in Sri Lanka. Average income of the income receiver in the Western province was Rs.2382 which was the highest among all the provinces. An average income of the income receiver in the Sabaragamuwa province was Rs.1325 and that was the lowest.

## Introduction

Household expenditure data were collected in two major parts of the schedule. In part 1 information were collected on food expenditure. To capture the reliable information on food expenditure, information were recorded for seven consecutive days. Respondents were requested to complete a daily consumption sheet provided by the Department. Interviewers made two visits during that period and had a discussion with the respondents to get the information into the schedule.

Expenditure on Non-food were collected in part 2 of the schedule. Reference periods vary according to each item or group of items.

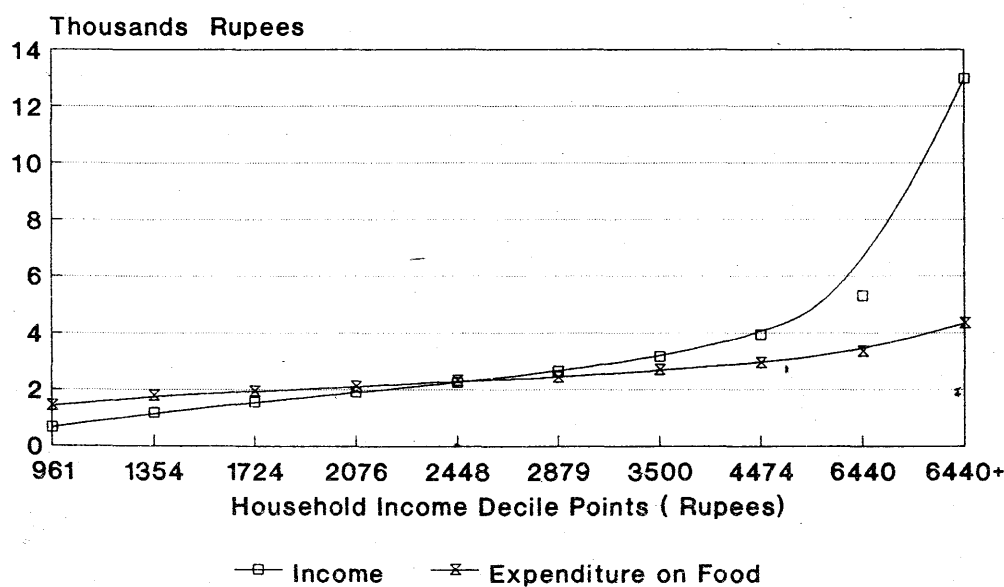

## Monthly Household Expenditure

All island average household expenditure per month was Rs.3905. Monthly household expenditure on food was Rs.2524. Poorest 50 percent of the households were not receiving sufficient income to cover their food expenditure as shown in Fig.4.1.

Table 4.1 - Difference between Average Monthly Household Income and Expenditure on food by Household income Decile

Figure 4.1 Average Monthly Household Income and Average Monthly Household Expenditure on Food by Household Income Decile

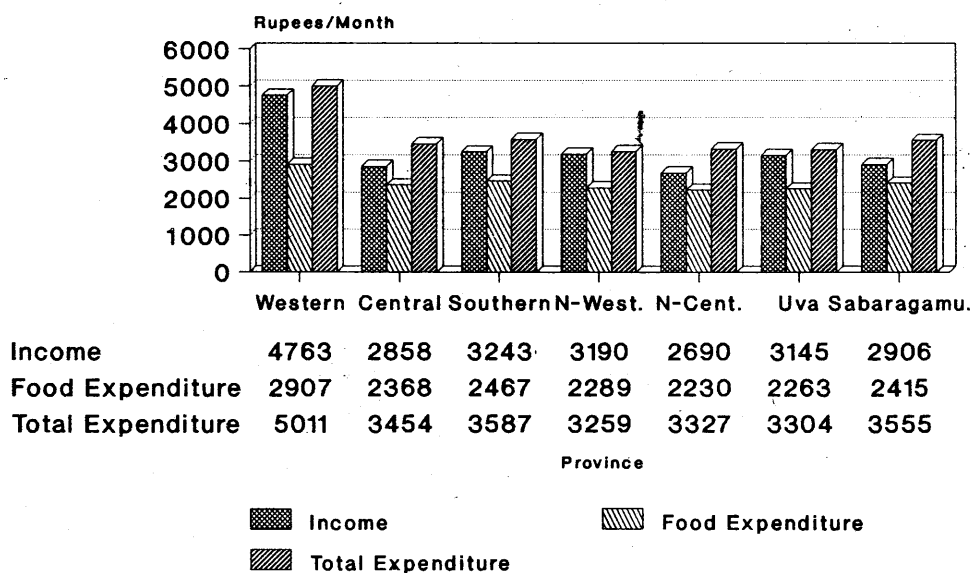

Households have spent 71 percent of the household income on food items in Sri Lanka. The pattern of spending differs from province to province. In the Western province percentage of food expenditure to income was 61 percent which was the lowest. In the Central North-Central and Sabaragamuwa provinces, the figure was 83 percent which was the highest. See the table 4.2 and fig.4.2.

## Food consumption

Table 4.4 shows that Urban sector constituted the highest number of members in a household which was 5.1, while Rural and Estate sectors were 4.8 and 4.6 respectively. Other feature shown in the table is the average household size which increases as the group increases.

In Urban sector percentage of household in each expenditure group shows a steady increase with the size except in the seventh group. A completely reverse trend is observed in the Rural sector starting from 11.6 percentage in the lowest expenditure group to 6.6 percentage in the highest expenditure group. In the Estate sector percentage of households vary differently among the expenditure groups. The highest number of households are concentrated in the middle groups.

Average monthly household consumption of some of the major food items were as follows.

Rice 44.31kg, wheat flour 2.6kg, bread 9.85kg, sugar 5.8kg, 39.3 coconuts and 10.9 eggs. (shown in Table 4.3b.)

### Consumption of Rice

When comparing the rice consumption pattern among the sectors, Rural shows the highest consumption in the lowest seven household expenditure groups while the Estate sector consumes highest quantities in the highest 3 expenditure groups. On the whole Urban sector had consumed the lowest quantity of rice while the Rural had consumed the highest quantity being 35.9kg and 46.5kg respectively. Estate sector had a quantity of 45.9kg.

### Consumption of Wheat flour

The consumption of wheat flour in Estate sector shows a wide variation. It varies from 3.73kg in lowest expenditure group to 29.75kg in highest expenditure group. Households in Estate sector consumes a marked quantity of wheat flour. On the average a household in this sector consumes 16.93kg of wheat flour per month as compared to 1.53kg in Urban sector and 1.48kg in Rural sector.

Table 4.6 Average Monthly Household Consumption of Wheat flour by Household Expenditure Group and Sector

### Consumption of Bread

Assuming a loaf of bread weigh 454g an average household had consumed loaves weighing 9.85kg per month. Highest quantity of bread was consumed by the households in the Urban sector; 17.25kg bread per month. Respective quantities for Rural and Estate sector were 8.28kg and 5.08kg respectively. See Table 4.7

Table 4.7 Average Monthly Household Consumption of Bread by Household Expenditure Group and Sector

6617 & above	19.04	205	33.40	250	14.97	162	11.91	134

### Consumption of Sugar

Household consumption of sugar per month was 5.8kg in the country. The sectorial consumption pattern shows that the Urban sector consumed 6.87kg, the Rural sector 5.65kg, and the Estate sector 4.34kg. Although the average sugar consumption in the Urban sector is higher than the Rural sector, households in first nine household expenditure groups of the Rural sector consumed a higher quantity of sugar than the households in the Urban sector

Table 4.8 Average Monthly Household Consumption of Sugar by Household Expenditure Group and Sector

## Consumption of Coconuts

Average monthly household consumption of coconuts was 39.3 nuts in the island. It varies from 21.22 nuts in lowest household expenditure group to 52.82 nuts in highest group. Rural sector households consumed the highest quantity of coconuts.

Table 4.9 Average Monthly Household Consumption of Coconuts by Household Expenditure Group and Sector

## Non-food Expenditure

According to the survey, average monthly non-food expenditure per household was Rs.1384 in the country. It was 35 percent of the total household expenditure. Highest percentage of non-food expenditure was reported from the Western province. Colombo district data have dominated the Western province averages, especially in expenditure on housing, fuel and light, transport, education and maintenance of private vehicle etc.

# SUPPLEMENTARY TABLES

## Definitions for Supplementary Tables

## Poor (one)

Those households spending more than 50 percent of their total household expenditure on food but whose adult equivalent monthly food expenditure level is less than the average per adult equivalent monthly food expenditure level observed for those households in the bottom two expenditure quintiles and having a per adult equivalent calorie consumption level between 2475 and 2750.

The average adult equivalent monthly food expenditure of those households in the lowest two per capita expenditure quintiles, and having per adult equivalent calorie consumption between 2475 and 2750 is known as the Minimum Required Adult Equivalent Monthly Food Expenditure.

## Poor (two)

Every thing would be same as Poor (one) except the minimum required adult equivalent monthly food expenditure which in this case will be the average adult equivalent food expenditure of those households in the lowest two quintiles whose adult equivalent calorie consumption is between 2200 and 2750.
