I. Objectives

This survey was designed to assist the World Bank Group (WBG) in gaining a better understanding of how stakeholders in Djibouti perceive the WBG. The survey explored:

- *General Issues Facing Djibouti*
- *Overall Attitudes toward the World Bank Group*
- *World Bank Group's Effectiveness and Results*
- *The World Bank Group's Knowledge Work and Activities*
- *Working with the World Bank Group*
- *The Future Role of the World Bank Group in Djibouti*
- *Communication and Information Sharing*
- *Background Information*

II. Methodology

From February to May 2015, 304 stakeholders of the WBG in Djibouti were invited to provide their opinions on the WBG's work in the country by participating in a country opinion survey. Participants were drawn from the office of the President/Prime Minister; office of a minister; office of a parliamentarian; ministries/ministerial departments; consultants/contractors working on WBG-supported projects/programs; PMUs; local governments; bilateral/multilateral agencies; private sector organizations; private foundations; the financial sector/private banks; NGOs/community based organizations (CBO); the media; independent government institutions; trade unions; faith-based groups; youth groups; academia/research institutes/think tanks; the judiciary branch; and other organizations. A total of 191 stakeholders participated in the survey (63% response rate).

Some respondents filled out the questionnaire with a representative of the fielding agency in person, and others received and returned the questionnaires via email or courier. Respondents were asked about: general issues facing Djibouti; their overall attitudes toward the WBG; the WBG's effectiveness and results; the WBG's knowledge work and activities; working with the WBG; the WBG's future role in Djibouti; and the WBG's communication and information sharing.

Every country that engages in the Country Opinion Survey must include specific indicator questions that will be aggregated for the World Bank Group's annual Corporate Scorecard. These questions are identified throughout the survey report.

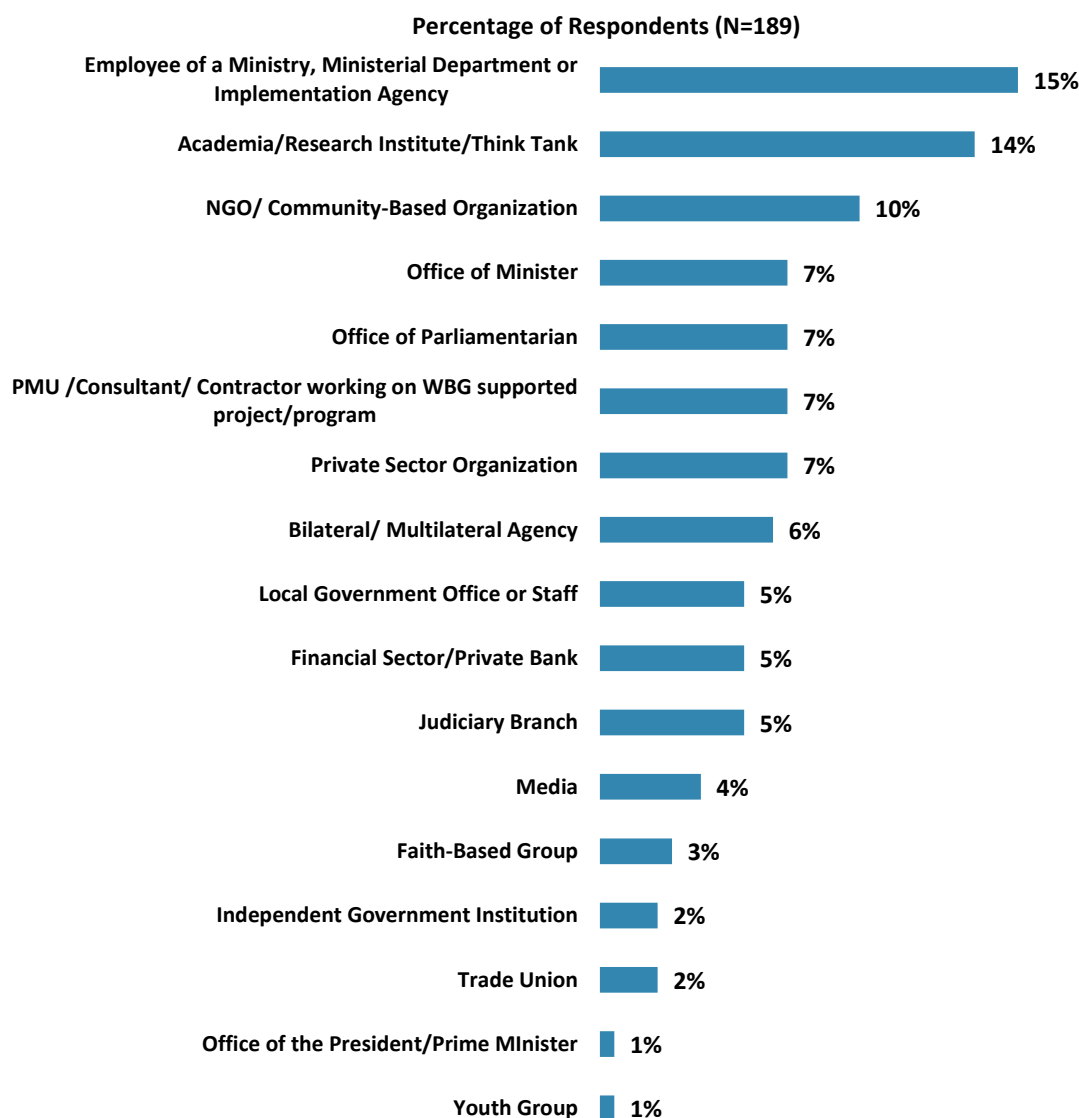

The results in this year's country survey were compared to those in the country survey conducted in FY'12 (response rate is 54%, N=118). Data were weighted to reach the same stakeholder composition in two years, which allows for year comparisons. Stakeholder groups which were not present in both fiscal years were not included in the comparison. Respondents who belonged to the "other" stakeholder category were not included either. As a result, means of the FY' 15 data and the total number of respondents in both years are slightly different from those of the original data reported in appendices A, B, C, D, F, and G. For the weighted stakeholder breakdown and year comparison results, please see appendix E (page 98).

Drivers of Effectiveness

To determine the key drivers of respondents' ratings of the World Bank Group's overall effectiveness and ratings of its ability to help achieve development results in Djibouti, bivariate correlational analyses were conducted using respondents' ratings of the twenty-nines specific areas of effectiveness.

Correlational analyses, however, are not able to tell us exactly what is causing respondents' ratings of the World Bank Group's overall effectiveness or ratings of its ability to help achieve development results. Rather, these analyses tell us that as ratings of effectiveness in one area increase, respondents' ratings of the Bank Group's overall effectiveness increase, or as ratings of effectiveness in one area increase, ratings of the WBG's ability to help achieve development results increase. Thus, it can be inferred that respondents' perceptions of effectiveness in one specific area are related to, or drive, respondents' perceptions of the Bank Group's overall effectiveness or perceptions of the WBG's ability to help achieve development results.

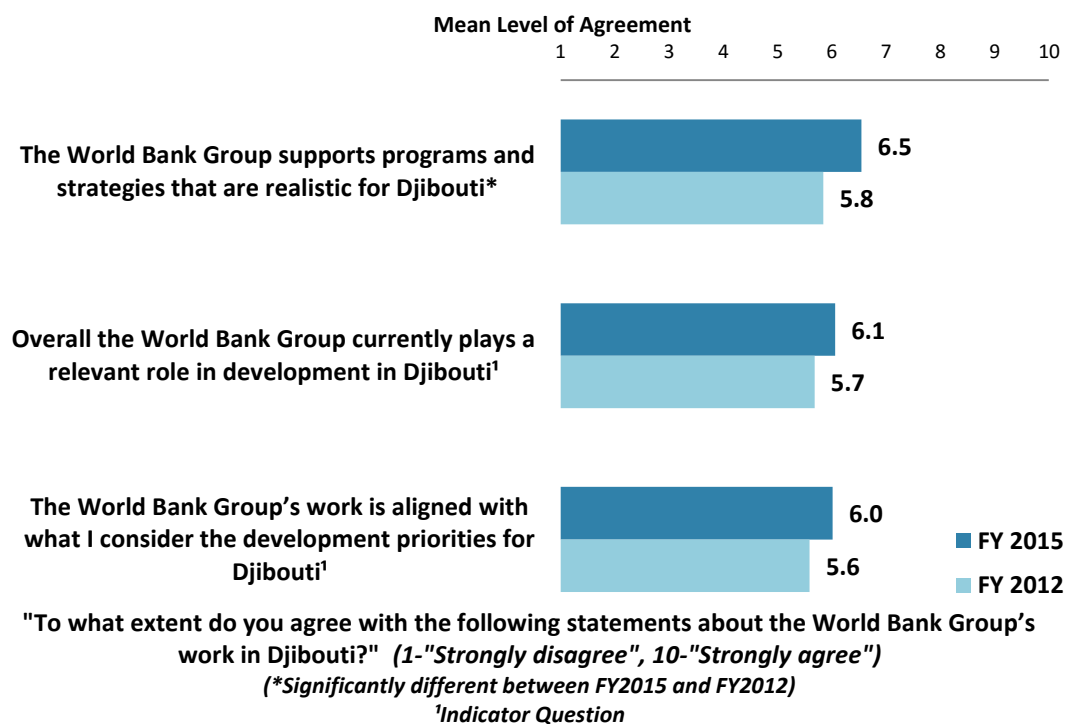

- Overall Effectiveness: Those specific areas with the highest Pearson Product-Moment correlations were determined to be the most closely related to perceptions of the Bank Group's overall effectiveness, suggesting that ratings of effectiveness in those specific areas are drivers of perceptions of the Bank Group's overall effectiveness in Djibouti. The areas determined to be key drivers from these analyses were:
 - The WBG's effectiveness at communicable/non-communicable diseases;
 - The WBG's effectiveness at environmental sustainability;
 - The WBG's effectiveness at disaster management; and
 - The WBG's effectiveness at agricultural development.
- Achieving Development Results: Those specific areas with the highest Pearson Product-Moment correlations were determined to be the most closely related to perceptions of the WBG's ability to help achieve development results in Djibouti, suggesting that ratings of effectiveness in those specific areas are drivers of perceptions of the WBG's ability to help achieve development results. The areas determined to be key drivers from these analyses were:
 - The WBG's effectiveness at global/regional integration;
 - The WBG's effectiveness at law and justice (e.g., judicial system);
 - The WBG's effectiveness at information and communications technology; and
 - The WBG's effectiveness at anti corruption.
