MTAD Database Metafile

Introduction

This document presents a guideline of the Ministry of Territorial Administration Database on socio-economic state of RA communities. It provides a description of the database and the variables included and the sources of data collection.

General description

The data are collected annually starting from 2012. The data is collected as of January 1st of the relevant year or as mentioned in the questionnaire. The sample includes all the communities (urban and rural) of the 10 regions of the Republic of Armenia.

The database includes information in the following domains:
➢ Section A: Socio-demographic characteristics
➢ Section B: Economic characteristics
➢ Section C: Infrastructure/Housing conditions
➢ Section E: Financial characteristics
➢ Section E: Assessment/Development

The information included in the MTAD Database project is either extracted from state registers or collected from face-to-face interviews with staff or officials from municipalities, relevant divisions of regional administrations or regional offices of state bodies. The detailed list of data sources is presented in Part 4 (Sources).

Definitions

Variable names
The variable names are composed of three parts:

1st character: Section number/domain (letter)

a - Socio-demographic characteristics
b - Economic characteristics
c - Infrastructure/Housing conditions
d -Financial characteristics
e - Assessment/Development

2nd character: Two-digit sequential question number

01-99

3rd character: Two-digit sequential sub-question number

00-99

4th: Two-digit sequential sub-question number or a letter at the end in case variable has been split into groups.

00-99
or
T – total
M – male
F – female
O – operating

Flags

The dataset contains no blank spaces (missing data), therefore, the following flags have been used to denominate each case.

.w – wrong value

.n – no data

.o – not applicable
