Storage						

Market prices should be indicated for farmers who used their own equipment to perform the activities but incase where actual costs were incurred write both the Market and Actual price; incase where equipment have been hired actual and market prices should be indicated.

The cost of Harvesting includes the cost of:

1. Cutting the crop, gathering, bundling and stacking when done manually. If done mechanically it is with harvester.
2. Threshing/shelling: In this process the grains are beaten to separate them from husk as in the case of peas or from the plant to which they are attached as in the case of maize. This should be manual or mechanical (thresher).
3. Cleaning/winnowing: This is the process of cleaning the grain by blowing away the chaff from it.
4. Transport costs from the field to homestead.

The Storage costs consist of one or more of the following:-

1. Weevil insecticides (morianaiTs'upa)
2. Rodenticides (Morianaoalitoeba)
3. Hired building/ store
4. Own storage and
5. Others
