**ALBANIA 1998**

Geographical scope:

Albania

Principal investigator(s):

Prof Dr Hans D Klingemann Wissenschaftszentrum Berlin Reichpietschufer 50 10785 Berlin 30  
Germany T+ 0114930 254-91320 F+ 0114930 254-91684 E-mail: Klingem@medea.wz-berlin.de  
Andrei Raichev, Kancho Stoychev Balkan British Social Surveys Sofia, Bulgaria

Data Collection Organization:

Index Albania, Ltd., Tirana

Fieldwork Period:

07-12-1998 - 14-12-1998.

Universe:

National Population, Both sexes, 18 and more years

Sample size:

999

Estimated Error:

3,2

Questionnaire:

The WVS questionnaire was in Albanese. There have been included some special variable labels such as: V56 Neighbours: Muslims and V149 Institution: The European Union. Special categories labels are: V167 Least liked groups and V203/ V204: Geographical affinity, 1. Locality or town where you live, 2. Region of country where you live, 3. Own country as a whole, 4. Europe, 5. The world as whole. Country Specific variables included are: V208: Ethnic identification, 2. Greek, 3. Macedonian; V209: Language at home: 1. Albanian, 2. Greek, 3. Macedonian. The variables political parties V210 a V212 and Region: V 234 are also included as country specific variables. The sample was designed to be representative of the entire adult population, i.e. 18 years and older, of your country. The lower age cut-off for the sample was 18 and there was not an upper age cut-off for the sample. The ethnic group of the respondent was not asked in the interview. In the cases of Eastern Europe Countries where the ethnic group is missing the language chosen for interview is the only indicator available to control the ethnic composition of the samples. Nevertheless, native language indicated in the census of 1989 and language chosen for interview are not exactly the same, since the first is rather differentiated whereas for the last the alternatives to choose between were only the national language or Russian.

### Sample:

Population: Total resident non-institutionalized population of Albania 18 years and older.

Respondents were selected by a stratified quota sample. Stratification criteria were (1) region and (2) type of residence. A total of 115 sampling points were randomly selected proportional to the distribution of population in the regions. Within each sampling point households were selected by method of random route. The respondent was selected by a quota procedure using gender and age as selection criteria. Selection is done: 49% Male and 51% Female. 48% Urban and 52 Rural %. Nationality Albanian 100%.

### Remarks about sampling:

-Final numbers of clusters or sampling points: 115 -Sample unit from office sampling: Household

### Survey procedure:

Personal Face to Face Interview

### Fieldwork:

Interviews were conducted by 34 interviewers which were trained for the study. 10 percent of the interviews were checked by follow-up visits to ensure quality of fieldwork.

Questionnaire:

The WVS questionnaire was in Armenian and Russian. There have been included some special variable labels such as: V56 Neighbours: Kurds, Esids and V149 Institution: The European Union. Special categories labels are: V167 Least liked groups: 1. Kurds/Esids; V179: Religion: 10. Armenian Apostolic Church, 11. Esid, 12. Witness of Jehova, 13. Pagan, 14. Bibleist, 15. Baptist, 17. Old Believers, 18. Apostolian, 19. Xarismatic; V203/ V204: Geographical affinity, 1. Locality or town where you live, 2. Region of country where you live, 3. Own country as a whole, 4. Europe, 5. The world as whole. Country Specific variables included are: V208: Ethnic identification, 2. Russian, 3. Representative of a national minority, 4. Citizen of Armenia first and a member of some ethnic group second; V209: Language at home: 2. Russian, 3. Kurd/Esid, 4. Greek, 5. Jewish. The variables political parties V210 a V212; Ethic group: V 233 and Region: V 234 are also included as country specific variables. The V 206 Born in this country and the V 232 Size of Town are also different in Armenia. The sample was designed to be representative of the entire adult population, i.e. 18 years and older, of your country. The lower age cut-off for the sample was 18 and there was not any upper age cut-off for the sample.

Sample:

Population: Total non-institutionalized population of Armenia, 18 years and older. Five-stage area probability sample: (1) The country is divided into 11 strata. For each stratum the desired number of respondents is defined proportionally to population size. (2) Within each stratum the primary sampling units (communities) are selected at random, with probability proportional to size. (3) Within each primary sampling unit 3-4 secondary sampling units (voting districts) are randomly selected. The total number of secondary sampling units was 100. (4) Within each secondary sampling unit houses (third sampling unit) are selected to serve as starting point for the interviewer to follow the random route procedure to select a household (fourth sampling unit). (5) Within each household the respondent is randomly selected using the (next) birthday method (fifth sampling unit). Selection is done: 47% Male and 53% Female. 68% Urban and 32 Rural %. Nationality Armenian 99% and Russian 1%.

Remarks about sampling:

-Final numbers of clusters or sampling points: 100 -Sample unit from office sampling: Household

Survey procedure:

Personal Face to Face Interview

Fieldwork:

Interviews were conducted by 59 interviewers which were especially trained for the study. 400 randomly selected addresses were checked to ensure quality of fieldwork. The length of interviews was between 36 and 180 minutes. The number of interviews was between 47 and 2 and the average 29.

Response rate:

$(1831/2025) \times 100 = 90.4\%$

## BANGLADESH 1996

Geographical scope:

Bangladesh

Principal investigator(s):

Dr.Q.K. Ahmad Bangladesh Unnayan Parishad (BUP) Dhaka, Bangladesh E-mail:

Qka.bup@drik.bgd.toolnet.org

Data Collection Organization:

Bangladesh Unnayan Parishad (BUP)

Fieldwork Period:

01-08-1996 - 31-08-1996.

Universe:

National Population, Both sexes, 18 and more years

Sample size:

1525

Estimated Error:

2,6

Questionnaire:

The WVS questionnaire was in Bengali. There have been included some special variable labels such as: V56 Neighbours: People with different religion and V149 Institution: South Asian Association for Regional Cooperation (SAARC). Special categories labels are: V167: Least liked groups; V179: Religion; V203/V204 Geographical affinity; V217 Education. Country Specific variables included are: V208: Ethnic identification; V209: Language at home; V210 to V212: Political Parties; V 227: Family income; V233: Ethnic group; V234: Region and V235: Interview Language. Some variables have been excluded from the WVS: V95,V96,V134,V152,V176,V197,V198, V199,V206,V207,V209,and V236 Reasons for exclusion: V96: The questions could not be used because of social unacceptability V134: Not relevant for Bangladesh V152: this question could not be operationalised for understanding by the respondents V176: Bangladesh doesn't provide aid to any country V199: questions not socially acceptable V207: inadvertently not asked V209: In the National Identity survey, it was found that all in the sample speak Bengali at home. Hence this question was not asked V 236: Could not be operationalised Before launching the survey the questionnaire was pretested, interviewing a number of men and women belonging to various professions in both urban and rural areas and were then adjusted on the basis of the results obtained.

Sample:

The respondents were picked from among voting age men and women, applying a multistage random sampling procedure. The predetermined sample size was first distributed between urban and rural areas on the basis of rural and urban population distribution, giving a slightly higher weightage to the urban areas to reflect the fact that awareness is relatively more widespread in the urban areas. The rural sub-sample was then distributed to 60 districts of the country according to population. (Out of a total of 64 districts, the other four were excluded because of accessibility problem). One thana was chosen from each district randomly and, then, two unions from each of those thanas and two villages from each selected union were picked randomly. The respondents were then randomly identified from those villages. The urban sub-sample was also distributed to various urban areas according to population and, then, the respondents randomly selected for interview. Care was taken to ensure an appropriate representation of men and women. However, the experience has been that because of shyness and relatively lower awareness on the part of some women, male-female ratio in a sample tends to be somewhat higher than in the population in the surveys so far conducted and this was the case with the present survey as well. Only one respondent was interviewed from each household. The respondents include men and women from various professions such as government and private service-holders, teachers, business people, politicians, lawyers, doctors, engineers, industrial labourers, day labourers, farmers and farm workers, housewives, and students.

#### Survey procedure:

Personal Face to Face Interview

#### Fieldwork:

The fieldwork dates was done in August, 1996 The interview language was Bengali and English. . During the field work a back-check of about 15 per cent was conducted.

#### Response rate:

Number of respondents: 1525 Rural 64% Male 55% Urban 36% Female 45%

Universe:

National Population, Both sexes, 18 and more years

Sample size:

1196

Estimated Error:

2,9

Questionnaire:

The WVS questionnaire was in Croatian. There have been included some special variable labels such as: V56 neighbors: Muslims and V149 Institution: The European Union. Special categories labels are V203/V204 Geographical affinity. Country Specific Variables are: V210 a V212 Political Parties. The variable 206 born in this country is also different. The sample was designed to be representative of the entire adult population, i.e. 18 years and older, of your country. The lower age cut-off for the sample was 18 and there was not any upper age cut-off for the sample. The ethnic group of the respondent was not asked in the interview. In the cases of Eastern Europe Countries where the ethnic group is missing the language chosen for interview is the only indicator available to control the ethnic composition of the samples. Nevertheless, native language indicated in the census of 1989 and language chosen for interview are not exactly the same, since the first is rather differentiated whereas for the last the alternatives to choose between were only the national language or Russian.

Sample:

For the purpose of this survey research the design of stratified random sampling was applied. First, the territory of the Republic of Croatia was divided into 7 distinct geographic regions or sets of regions, and these were: 1. Istra; 2. Rijeka and surrounding; 3. Dalmacija; 4. Slavonija and Podravina;

5. Zagreb, Zagorje and Prigorje; 6. Medimurje and Moslavina; 7. Zumberak, Kordun, Banija and Lika. Each of the regions covers various number of small, medium, and large cities/settlements (small with less than 2000 inhabitants; medium with 2000-30.000; and large with more than 30.000 inhabitants). So, two-way stratification: by region, and by size of cities/settlements, was used. By the data from the Census 91 outside of ex-occupied regions of The Republic of Croatia there live 4.390.651 of inhabitants. The geographic distribution of all the inhabitants is supposed to be known from the Census. The people live in 5979 cities/settlements of Croatia: 1.703.962 of them live in large cities, 967.621 live in medium size cities/settlements, and the rest of 1.719.068 live in small ones. It is obvious that 39% of inhabitants live in large, 22% in medium, and 39% in small cities. In each region the number of inhabitants, as well as the number of cities of a certain size varies, and the distribution of inhabitants by size of city for many reasons differs a lot. But, the population to be sampled for this survey consists only of adult persons (older than 18) and is of the size  $N=3.590.366$ . There is the assumption that the geographic distribution of adult persons is the same as the distribution of all the persons. The planned fixed size of the entire stratified sample was  $N=1200$  of adult persons, for what the proportionate allocation of units, according to the Census data, was constructed. The cities were sampled at random using random digit generator with probabilities proportionate to the size (the measure of size being the number of inhabitants) to ensure that in the further stage of the sampling procedure every person has got the same probability of selection. The number of cities sampled was determined considering the relevant traveling costs. It was decided that every large city (with more than 30.000 inhabitants) has to be included in the sample by imperative. In the regions without such cities, the same rule for the medium size of city/settlement was applied.

Survey procedure:

Personal Face to Face Interview

Response rate:

The interviewers contacted 1495 persons and 306 of them refused to participate in the survey. The refusal rate was 20.4%, which is an approximately usual rate in such kind of survey in Croatia.

Weighting:

The post-stratification technique was used for the variable "education" combined by variable "sex".

The basis for forming of the weights were Census 1991 data corrected by the exclusion of the population from the occupied territories, as well as by the application of the trend method using Census data from 1971 and 1981. The education level was divided in three categories: 1 primary school or less 2 secondary school 3 graduates (2 or 4 years) and more. Weights for the three educational levels: male female total

1	0.191573	0.281446	0.473019
2	0.234819	0.179323	0.414142
3	0.062980	0.049714	0.112694

Questionnaire:

The WVS questionnaire was in Chinese. There have been included some special categorical labels such as: V 167 Least liked groups: include only categories 2 Capitalist 4 Immigrant, 5 Homosexuals and 6 Criminals. V203/V204 Geographical affinity: 3 stands for China and 4 for Asia. Country Specific variables included are: V208: Ethnic identification: is missing; V209 Language at home: all answers, except 2 are 1 (Chinese); V233 Ethnic group is 100% Chinese (code 4); V234 Region: 1 North, 2 Center, 3 South and 4 East. V235 Language at home is 100% 1 Chinese except 2 cases with code 6. The following variables were not asked: V56, V117 to V124, V135 to V145, V151 to V166, V170, V179 to V191, V210 to V213. V106, V107: do not include category 4 (Free Speech) This is important for those working with post-materialist indexes.

Sample:

Random sample of Central China, containing 68% of population The sample was designed to be representative of the entire adult population, i.e. 18 years and older, of your country. The lower age cut-off for the sample was 18 and there was not any upper age cut-off for the sample.

Survey procedure:

## Personal Face to Face Interview

### Fieldwork:

The fieldwork was done in the Fall 1995

## DOMINICAN REPUBLIC 1996

Geographical scope:

Dominican Republic

Principal investigator(s):

Josefina Zaiter Marcos Villaman Julio Valeiron Centro Poveda Pina 210-A (Ciudad Nueva) Santo Domingo Dominican Republic T+ 1-809-689-5689

Data Collection Organization:

Centro POVEDA (Santo Domingo)

Fieldwork Period:

01-04-1996 - 30-04-1996.

Universe:

National Population, Both sexes, 18 to 49 years

Sample size:

417

Estimated Error:

4,9

Questionnaire:

The WVS questionnaire was in Spanish. There have been included some special variable labels such as: V56 Neighbours: Haitianos and V149 Institution: OEA (Organización de Estados Americanos). Special categories labels are: V167 Least liked groups: 1. Comunistas de línea, 2. Los capitalistas, 3. Los narcotraficantes, 5. Los homosexuales, 6. Los delincuentes, 7. Extremistas de derecha y 9. No sabe/No contesta. V179: Religion: has different codes. V203/ V204: Geographical affinity: 3 stands for Region and 4 stands for El Caribe. V203/V204 has different structure. However, there is no need to recode since the equivalence is respected assuming Region means the Dominican Republic as a whole. Country Specific variables included are: The variables political parties V210 a V212; Ethnic group: V 233 and Region: V 234 are also included as country specific variables. The V 206 Born in this country and the V 232 Size of Town are also different in Armenia.

Sample:

Two methods were used for the sample design: Four communities were chosen as representatives of the four main regions: Central South and Santo Domingo, Western South (Barahona), East (San Pedro de Macorís) and North or Cibao (Santiago). For the sample distribution, we proceeded according to the census projections of that time, giving Santo Domingo the 60% of the sample, and proportionally dividing the rest among the other Provinces. Thus, Santo Domingo 275; Santiago,

Barahona and San Pedro de Macorís 60 each one respectively, in total 455 individuals. 38 incomplete questionnaires were eliminated, leaving the distribution as follows: Santo Domingo 274, Santiago 46, Barahona 55 and San Pedro de Macorís 42. In total 417 questionnaires. For the respondents selection, neighborhoods of the low class, middle class and upper class were taken into account. The streets and houses were systematically changed, and the individuals were randomly chosen between the ages of 18 and 50 years old. Instructions were given to the interviewers so that the age proportions remained as follows: Younger than 30 years = 50% Between 31 and 40 years = 30% Between 41 and 50 years = 20% These four population groups are representative of the national population. The sample was distributed among the urban sector and the marginal-urban sector. The age rank was established between 18 and 50 years, however, a few individuals were under and over this limit.

Survey procedure:

Personal Face to Face Interview

Response rate:

$(1831/2025) \times 100 = 90.4\%$

Center for Social Studies in Eastern Europe (Tallinn).

Fieldwork Period:

20-10-1996 - 23-11-1996.

Universe:

National Population, Both sexes, 18 and more years

Sample size:

1021

Estimated Error:

3,1

Questionnaire:

The WVS questionnaire was in Estonian and Russian. There have been included some special variable labels such as: V56 Neighbours: Muslims and V149 Institution: The European Union. Special categories labels are: V203/ V204: Geographical affinity, 1. Locality or town where you live, 2. Region of country where you live, 3. Own country as a whole, 4. Europe, 5. The world as whole. Country Specific variables included are: V208: Ethnic identification, 2. Russian, 3. Representative of a national minority, 4. Citizen of Estonia first and a member of some ethnic group second; V209: Language at home: 2. Russian, 3. Bilingual. The variables political parties V210 a V212; Ethnic and Region: V 234 are also included as country specific variables. The V 206 Born in this country is also different in Estonia.

Sample:

The sample was designed to be representative of the entire adult population, i.e. 18 years and older, of your country. The lower age cut-off for the sample was 18 and there was not any upper age cut-off for the sample. Population: Total non-institutionalized population of Estonia (citizens and non-citizens), 18 years and older. One-stage random sample: random selection of the respondents from

the National Population Register. 44% Male and 56% Female. 65% Urban and 35% Rural. Nationality 59% Estonian and 41% Russian + other. The ethnic composition of the population of Estonia has changed since 1989, but no other official statistics are available. Ethnic identification of the respondent is not available in the data. The language chosen for the interview is not completely comparable to the language indicated in the census of 1989. Among those who indicated another language than Estonian or Russian in the census some may have chosen Estonian and some Russian as language of interview.

Survey procedure:

Personal Face to Face Interview

Fieldwork:

Interviews were conducted by 63 interviewers which were especially trained for the study. The length of interviews was between 60 and 240 minutes.

Response rate:

$(1021/1300) \times 100 = 78.5\%$

Questionnaire:

The WVS questionnaire was in Georgian and Russian. There have been included some special variable labels such as: V56 Neighbours: Muslims and V149 Institution: The European Union. Special categories labels are: V167 Least liked groups: Muslims. V179: Religion: 10. Gregorian, 11. Esid, 12. Witness of Jehova, 13. Pagan, 14. Bibleist 15. Baptist, 16. Old Believers, 17. Apostolian, 18. Xarismatic. V203/ V204: Geographical affinity, 1. Locality or town where you live, 2. Region of country where you live, 3. Own country as a whole, 4. Europe, 5. The world as whole. Country Specific variables included are: V208: Ethnic identification, 2. Russian, 3. Representative of a national minority, 4. Citizen of Georgia first and a member of some ethnic group second. V209: Language at home: 2. Russian, 3. Armenian, 4. Azerbaijan, 5. Jewish, 6. Mengrelian, 7. Lezid, 8. Lazian, 9. Greek, 10. Osetian 11. Asirien. The variables political parties V210 a V212 and Region: V 234 are also included as country specific variables. The V206 Born in this country and the V 232 size of the town are also different in Georgia.

Sample:

Total non-institutionalized population of Georgia, 18 years and older, without citizens living in Abkhazia and Samachablo. Five-stage area probability sample: (1) The country is divided into nine

strata. For each stratum the desired number of respondents is defined proportionally to population size. (2) Within each stratum the primary sampling units (communities) are selected at random, with probability proportional to size. (3) Within each primary sampling unit 3-4 secondary sampling units (voting districts) are randomly selected. The total number of secondary sampling units was 110. (4) Within each secondary sampling unit houses (third sampling unit) are selected to serve as starting point for the interviewer to follow a random route procedure to select a household (fourth sampling unit). (5) Within each household the respondent is randomly selected using the (next) birthday method (fifth sampling unit). Selection is done: 45% Male and 55% Female. 56% Urban and 44 Rural %. Nationality: Georgian 76%, Russian 9%, Armenian 7%, Azeri 3% and Other 5%. The sample was designed to be representative of the entire adult population, i.e. 18 years and older, of your country. The lower age cut-off for the sample was 18 and there was not any upper age cut-off for the sample.

#### Remarks about sampling:

-Final numbers of clusters or sampling points: 110 -Sample unit from office sampling: Household

#### Survey procedure:

Personal Face to Face Interview

#### Fieldwork:

Interviews were conducted by 84 interviewers which were especially trained for the study. 400 randomly selected addresses were checked to ensure quality of fieldwork. The length of interviews was between 30 and 150 minutes. The number of interviews was between 40 and 9 and the average 24.

Questionnaire:

The WVS questionnaire was in Hungarian. There have been included some special variable labels such as: V56 Neighbours: Gypsies and V149 Institution: The European Union. Special categories labels are: V167 Least liked groups: Gypsies and V203/ V204: Geographical affinity, 1. Locality or town where you live, 2. Region of country where you live, 3. Own country as a whole, 4. Europe, 5. The world as whole. Country Specific variables included are: V209: Language at home: 2. German, 3. Slovakian, 4. Serbo-Croatian, 5. Romanian, 6. Bulgarian 7. Gypsy and 8. Other. The variables political parties V210 a V212; and Region: V 234 are also included as country specific variables. The V 206 Born in this country is also different in Hungary. The ethnic group of the respondent was not asked in the interview. In the cases of Eastern Europe Countries where the ethnic group is missing the language chosen for interview is the only indicator available to control the ethnic composition of the samples. Nevertheless, native language indicated in the census of 1989 and language chosen for interview are not exactly the same, since the first is rather differentiated whereas for the last the alternatives to choose between where only the national language or Russian.

Sample:

Population: Total non-institutionalized population of Hungary, 18 years and older. Selection is done: 46% Male and 54% Female. 61% Urban and 39 Rural %.

Survey procedure:

Personal Face to Face Interview

Data Collection Organization:

Foundation for the Advancement of Sociological Studies, Riga

Fieldwork Period:

25-10-1996 - 19-11-1996.

Universe:

National Population, Both sexes, 18 and more years

Sample size:

1200

Estimated Error:

2,9

Questionnaire:

The WVS questionnaire was in Latvian and Russian. There have been included some special variable labels such as: V56 Neighbours: Muslims and V149 Institution: The European Union. Special categories labels are: V203/ V204: Geographical affinity, 1. Locality or town where you live, 2. Region of country where you live, 3. Own country as a whole, 4. Europe, 5. The world as whole. Country Specific variables included are: V208: Ethnic identification, 2. Russian, 3. Representative of a national minority, 4. Citizen of Latvia first and a member of some ethnic group second; V209: Language at home: 2. Russian. The variables political parties V210 a V212; Ethnic group: V 233 and Region: V 234 are also included as country specific variables. The V 206 Born in this country is also different in Latvia.

Sample:

The sample was designed to be representative of the entire adult population, i.e. 18 years and older, of your country. The lower age cut-off for the sample was 18 and there was an upper age cut-off for the sample: 85 years older. Population: Total non-institutionalized population of Latvia (citizens and non-citizens), 18 to 85 years. Five-stage area probability sample: (1) Proportional to population size the country is divided into 64 strata (types of communities). (2) Within each stratum the primary

sampling units (communities) are selected at random. (3) Within each primary sampling unit secondary sampling units (the districts of the communities) were divided into subdistricts according to types of houses and the distance to the district centers) are randomly selected. The total number of secondary sampling units was 81. (4) Within each secondary sampling unit houses (third sampling unit) are randomly selected (random route) as starting points for the selection of households (fourth sampling unit). (5) Within each household the respondent is randomly selected using the (next) birthday method (fifth sampling unit). The ethnic composition of the population of Latvia has changed since 1989, but no other official statistics are available. Ethnic identification of the respondent is not available in the data. The language chosen for the interview is not completely comparable to the language indicated in the census of 1989. Among those who indicated another language than Latvian or Russian in the census some may have chosen Latvian and some Russian as language of interview. Selection is done: 44% Male and 56% Female. 69% Urban and 31 Rural %. Nationality 59% Latvian and 41% Russian and Other.

#### Remarks about sampling:

-Final numbers of clusters or sampling points: 81 -Sample unit from office sampling: Household

#### Survey procedure:

Personal Face to Face Interview

#### Fieldwork:

Interviews were conducted by 56 interviewers which were trained especially for the study. 3 percent of randomly selected respondents were called back by phone to ensure quality of fieldwork. The length of interviews was between 30 and 150 minutes.

#### Response rate:

$(1200/1853) \times 100 = 64.7 \%$

Questionnaire:

The WVS questionnaire was in Macedonian. There have been included some special variable labels such as: V56 Neighbours: No specific Religious Group Identified and V149 Institution: The European Union. Special categories labels are: V167 Least Liked Groups: 1. Gypsies and V203/ V204: Geographical affinity, 1. Locality or town where you live, 2. Region of country where you live, 3. Own country as a whole, 4. Europe, 5. The world as whole. Country Specific variables included are: V208: Ethnic identification, 2. Albanian, 3. Turk, 4. Roma, 5. Serbian, 6. Jewish and 7. Citizen of Macedonia first and a member of some ethnic group second. V209: Language at home: 2. Albanian, 3. Turkish, 4. Roma, 5. Serbian and 6. Jewish. The variables political parties V210 a V212; Ethnic group: V 233 and Region: V 234 are also included as country specific variables. The V 206 Born in this country is also different in Macedonia.

Sample:

The sample was designed to be representative of the entire adult population, i.e. 18 years and older, of your country. The lower age cut-off for the sample was 18 and there was not an upper age cut-off.

Population: Total resident non-institutionalized population of Macedonia 18 years and older. Respondents were selected by a stratified random sample. Stratification criteria were region and type of residence (urban vs. rural). 100 sampling points were randomly selected proportional to the distribution of population in 22 settlements in seven regions. Within each sampling point households were selected by method of random route. Within each household the respondent is randomly selected using the "Kish selection grid": all family members 18 years and older are listed in a certain order, first males from the oldest to the youngest, and then females from the oldest to the youngest. The respondent is randomly by a selection key which is randomly composed for each possible type of household composition. Selection is done: 52% Male and 48% Female. 62% Urban and 38 Rural %. Ethnicity: 72% Macedonian, 21% Albanian, 2% Turkish 5% Other.

Remarks about sampling:

-Final numbers of clusters or sampling points: 100 -Sample unit from office sampling: Household

Survey procedure:

Personal Face to Face Interview

Fieldwork:

Interviews were conducted by 41 interviewers which were trained for the study. 20 percent of the interviews were checked by follow-up visits to ensure quality of fieldwork.

Response rate:

$(995/1107) \times 100 = 89.9 \%$

Questionnaire:

The WVS questionnaire was in Serbo-Croatian and Albanian. There have been included some special variable labels such as: V56 Neighbours: Gypsies and V149 Institution: The European Union. Special categories labels are: V203/ V204: Geographical affinity, 1. Locality or town where you live, 2. Region of country where you live, 3. Own country as a whole, 4. Europe, 5. The world as whole. Country Specific variables included are: V208: Ethnic identification, 2. Yugoslav, 3. Serb, 4. Montenegrin, 5. Muslim, 6. Albanian, 7. Hungarian, 8. Croat, 9. Other; V209: Language at home: 1. Serbian, 2. Serbo-Croatian, 3. Bosnian, 5. Montenegrin, 6. Hungarian, 7. Albanian, 8. More than one equally. The variables political parties V210 a V212. The V 206 Born in this country is also different in México.

Sample:

The sample was designed to be representative of the entire adult population, i.e. 18 years and older, of your country. The lower age cut-off for the sample was 18 and there was not any upper age cut-off for the sample. Total non-institutionalized population of Republic of Serbia and Republic of Montenegro, 18 years and older (Albanians from the Province of Kosovo boycotted the research).

Three stage area probability sample: 1) Proportional to region the country was divided in urban and non-urban subsample regions; each subsample being mutually proportional, except for the Montenegrin subsample which was purposively doubled. 2) Within each subsample region counties were randomly selected based on cumulative frequencies of their population in the region in question. 3) Within the counties the place of interview, that is local community or place of residence was randomly selected . Selection is done: 49% Male and 51% Female. 56% Urban and 44 Rural %.

Survey procedure:

Personal Face to Face Interview

Fieldwork:

The fieldwork was done in October 1996. Interviews were conducted by permanent research network of the Institute of Social Science consisting experienced interviewers. Each respondent was personally interviewed by a field research fellow.

## NEW ZEALAND 1998

Geographical scope:

New Zealand

Fieldwork Period:

24-11-1998 - 01-12-1998.

Universe:

National Population, Both sexes, 18 and more years

Sample size:

1201

Estimated Error:

2,9

Questionnaire:

The WVS questionnaire was in English, Maori, Pacific, Chinese and Japanese. There have been included some special variable labels such as: V56 neighbours: There were three versions for different minorities but none was included in the original file and V149 Institutions: This variable was asked and referred to "CER with Australia" but was excluded in the original file because New Zealand assumed it should refer to the European Union. Special categories labels are: V167 Least liked Groups and 203/ V204: Geographical affinity. The variable V217 Education is not compatible with codebook. Country Specific variables included are: V208: Ethnic identification, 1. Maori, 2. Pakeha 3. European, 4. Pacific 5. Asian, 6. Other; V209: Language at home: 1. English, 2. Maori, 3. Pacific, 4. Chinese, 5. Japanese and 6. Other. The variables political parties V210 and V212; V232 Size of Town; V 233 Ethnic Group and Region: V 234 are also included as country specific variables. The V 206 Born in this country is also different in New Zealand.

Sample:

The sampling frame used was an electronic version of New Zealand electoral Roll. In law enrolment is compulsory, but is rarely if ever enforced. The defined age range was 18-90 years. A simple systematic sample of 1749 was drawn from the Maori electorates. A systematic sample of 225 was drawn from the Maori electorates. This represents an approximate double oversample, in an effort to increase the Maori response rate. A systematic sample of 25 was drawn from a small number of Census mesh blocks in South Auckland and Porirua (Wellington suburb) which are extremely low household income areas. Again, this was an attempt to increase the response rate from people who traditionally are low responders to surveys.

Survey procedure:

Postal interview

**Fieldwork:**

It is based on a self-administered postal survey. It was posted out to 2024 people throughout New Zealand about 24 September 1998. Along with a cover letter it included the incentive of a NZ\$1.00 coin. Approximately two weeks later a reminder letter and a new questionnaire was sent to those that had not responded.

**Response rate:**

65.3%

## **NIGERIA 1995**

Fieldwork Period:

01-03-1997 - 30-09-1997.

Universe:

National Population, Both sexes, 21 and more years

Sample size:

733

Estimated Error:

3,7

Questionnaire:

There have been included some special variable labels such as: V56 Neighbours: Christians and V149 Institution: SAARC. Special categories labels are: V167 Least like Groups not asked and V179 Religion. Country Specific variables included are: V208: Ethnic identification, 1 Above all, I am a Punjabi Pakistani, 2. Above all, I am a Sindhi Pakistani, 3. Above all, I am a Balochi Pakistani, 4. Above all, I am a Pathan Pakistani, 5. I am a Pakistani First and 9 DK.; V209: Language at home: 1. English, 2. Urdu, 3. Punjabi. The variables political parties V210 and V212 was not asked; Ethnic group: V 234 Region was not asked.

Sample:

This is a random sample of the Province of Punjab, which contains 68% of Pakistan's population. The rural sample is half the size of the urban sample (the weight variable corrects the urban/rural balance).

Survey procedure:

Personal Face to Face Interview

Fieldwork:

The fieldwork was done during the period March-September 1997.

Weighting:

Yes. The weight variable corrects the urban/rural balance.

## PERU 1996

Geographical scope:

Peru

Principal investigator(s):

Catalina Romero Instituto Bartolome de las Casas Belisario Flores 687 Lima 14 Peru F+ 5114 820028 E-mail: Jromero@pucp.edu.pe Alfredo Torres, Gerente de Apoyo, S.A.

Data Collection Organization:

Apoyo, Opinión y Mercado, S. A. Gerente: Alfredo

Fieldwork Period:

10-05-1996 - 13-05-1996.

Universe:

National Population, Both sexes, 18 and more years

Sample size:

1211

Estimated Error:

2,9

Questionnaire:

The WVS questionnaire was in Spanish. There have been included some special variable labels such as: V56 Neighbours: Jews, Arabs, Asians, Gitanos, etc and V149 institutions: OEA (American States Organization). Special categories labels are: V167 Least liked groups, V179 Religion and V203/ V204: Geographical affinity, 1. Locality or town where you live, 2. Region of country where you live, 3. Own country as a whole, 4. Europe, 5. The world as whole. Country Specific variables included are: V208: Ethnic identification, 1. Solo se siente provinciano, 2. Más provinciano/limeño, 3. Tan provinciano como Peruano, 4. Más Peruano que provinciano, 9. No sabe.; V209: Language at home: 1. Español, 2. Quechua, 3. Aynara 9. No contesta. The variables political parties V210 a V212; V232 Size of town; Ethnic group: V 233 and Region: V 234 are also included as country specific variables.

Sample:

The sample was designed to be representative of the entire adult population, i.e. 18 years and older, of your country. The lower age cut-off for the sample was 18 and there was not an upper age cut-off for the sample Universe of 18 and more persons of both sexes, from any socioeconomic level. Distribution of the sample was done by town size. The sampling method was polietapic and stratified by town districts within urban scope. In towns with more than 250,000 habitants, the sample was selected proportionally to the town size by districts and socioeconomic level. In towns of less than

250,000 habitants, the sampling was random systematic. Within each town, sampling was polietapic, with computer selected squares and systematic selection of housings within each square. Finally, the selection of the respondent was made using non probabilistic sex and age quotas using universe figures for these variables.

Survey procedure:

Personal Face to Face Interview

Fieldwork:

A structured questionnaire was used, precoded almost in its entirety, and coordinated with the survey responsible. After survey completion, 30% of the interviews carried by each interviewer were supervised. 100% of the questionnaires were also fully controlled at the Editing Department. Interviews were conducted by 80 interviewers which were trained especially for the study. 10 percent of the interviews were checked to ensure quality of fieldwork.

## PHILIPPINES 1996

Sample size:

1153

Estimated Error:

2,9

Sample:

Population: Total non-institutionalized population of Poland, 18 years and older. Stratified random sample. Stratification was done by a combination of twelve macro-regions and three groups of cities of different size (20,000 and less inhabitants, 20,000-100,000 inhabitants, more than 100,000 inhabitants). Within each stratum a three-stage sampling procedure was applied. (1) random selection of towns and villages, (2) random route selection of household within dwelling units, (3) random selection of respondent within household. Selection is done: 46% Male and 54% Female. 59% Urban and 41 Rural %. Nationality 100% Polish The sample was designed to be representative of the entire adult population, i.e. 18 years and older, of your country. The lower age cut-off for the sample was 18 and there was not an upper age cut-off for the sample. The ethnic group of the respondent was not asked in the interview. In the cases of Eastern Europe Countries where the ethnic group is missing the language chosen for interview is the only indicator available to control the ethnic composition of the samples. Nevertheless, native language indicated in the census of 1989 and language chosen for interview are not exactly the same, since the first is rather differentiated whereas for the last the alternatives to choose between were only the national language or Russian.

Survey procedure:

Personal Face to Face Interview

**Fieldwork:**

Interviews were conducted by 156 interviewers which were specifically trained for the study. 10 percent of the interviews were checked by follow-up visits and 5 percent by call-ups to randomly selected respondents to ensure quality of fieldwork.

**Response rate:**

$(1153/1500) \times 100 = 76.9 \%$

## PUERTO RICO 1995

Geographical scope:

Puerto Rico

Principal investigator(s):

Prof. Angel Rivera-Ortiz Department of Political Science University of Puerto Rico Rio Piedras,  
00931-3345 Puerto Rico F+ 809-763-5599

Data Collection Organization:

Fieldwork Period:

15-09-1995 - 31-10-1995.

Universe:

National Population, Both sexes, 18 and more years

Sample size:

1164

Estimated Error:

2,9

Questionnaire:

The WVS questionnaire was in Spanish. There have been included some special variable labels such as: V56 Neighbours: North American and V149 Institution: NAFTA o TLC. Special categories labels are: V 179 Least liked groups and V203/ V204: Geographical affinity. Country Specific variables included are: V208: Ethnic identification; V209 Language at home; The variables political parties V210 a V212; Ethic group: V 233 and Region: V 234 are also included as country specific variables. The V 206 Born in this country is also different in Puerto Rico.

Sample:

The sample was designed to be representative of the entire adult population, i.e. 18 years and older, of your country. The lower age cut-off for the sample was 18 and there was not an upper age cut-off for the sample. 1,164 questionnaires were effectively administered among able persons 18 years old and older, using the Kish selection method in each household (date of next birthday) and planning up to two more visits in different time schedules or by previous appointment in order to reach the selected person. The obtained sample was similar to the population universe in educational, economic and demographic terms, according to the data provided by the Federal Census Bureau and the Commonwealth Planning Board. The questionnaires were administered in a face to face basis using a structured random sample model in three stages (multi-stage structured random sample).

First, all Puerto Rican towns and cities were organized and classified according to their geographical position and population density. Accordingly, the Island was divided in six sections: north, south, central highlands, east, west and San Juan metropolitan region. Three towns or cities were randomly selected in each section. Second, all residential communities in each of the selected towns or cities were classified in three socio-educational categories (upper, middle and low) using schooling and family income data from the last population census of 1990, and one community was randomly selected in each category. In a third stage, after conducting a thorough "block listing process" in which commercial and inhabited residences were crossed out, random samples were conducted among the households in each selected community using a criterion of p.01, for a total sample of 1,650 (intended contacts).

Survey procedure:

Personal Face to Face Interview

Fieldwork:

A standardized public opinion survey research questionnaire was developed in two stages. First, in order to obtain an adequate conceptualization and definition of the variables included in the internationally designed interview, in agreement with the Puerto Rican political culture, three focus groups were conducted in February of 1995; one in the metropolitan area of San Juan, one in the central highlands and one in the western region of the Island. Second, a pre-test was conducted in the metropolitan area of San Juan, distributing the questionnaire among 100 subjects according their availability and using age and sex as selection criteria. Interviews were never held on Sundays nor on holidays, nor at any time which would violate the visiting time rules established by tradition and culture (between 8:00 a.m. till 8:00 p.m. in urban settings and between 7:30 a.m. until 7:30 p.m. in rural zones).

## ROMANIA 1998

Questionnaire:

The WVS questionnaire was in Russian. There have been included some special variable labels such as: V56 Neighbours: Jews and V149 Institution: The European Union. Special categories labels are: V203/ V204: Geographical affinity, 1. Locality or town where you live, 2. Region of country where you live, 3. Own country as a whole, 4. Europe, 5. The world as whole. Country Specific variables included are: V208: Ethnic identification, 2. Ukrainian, 3. Tatarian 4. Komi 5 Mordovia, 6 Karbadian 7 Balkarian; V209: Language at home: 2. Ukrainian, 3. Tatarian 4. Komi 5 Mordovia, 6 Karbadian 7 Balkarian; The variables political parties V210 a V212; Region: V 234 and V206 Born in this country are also included as country specific variables. The ethnic group of the respondent was not asked in the interview. In the cases of Eastern Europe Countries where the ethnic group is missing the language chosen for interview is the only indicator available to control the ethnic composition of the samples. Nevertheless, native language indicated in the census of 1989 and language chosen for interview are not exactly the same, since the first is rather differentiated whereas for the last the alternatives to choose between where only the national language or Russian.

## Sample:

The sample was designed to be representative of the entire adult population, i.e. 18 years and older, of your country. The lower age cut-off for the sample was 18 and there was not an upper age cut-off for the sample. Population: Total non-institutionalized population of the Russian Federation, 18 years and older, without citizens living in the Far North and in inaccessible regions of Siberia. Five-stage area probability sample: (1) The country is divided into 4 strata. For each stratum the desired number of respondents is defined proportional to population size. (2) Within each stratum 50 primary sampling units (administrative districts) are selected at random proportional to size. (3) Within each primary sampling unit secondary sampling units (towns and rural Soviets as administrative sub-districts) are selected randomly (4) Within each secondary sampling unit third sampling units (voting districts in the towns, villages belonging to a rural Soviet in the rural areas) are randomly selected. The total number of third sampling units was 186. (5) Within each third sampling unit households were selected at random from a household register (fourth sampling unit). (6) Within each household the respondent is randomly selected using the "Kish-selection-grid": all adult family members are listed in a certain order, first males from the oldest to the youngest, then females from the oldest to the youngest; the respondent is selected by a selection key which is randomly composed for each possible type of household composition (fifth sampling unit). Selection is done: 41% Male and 59% Female. 75% Urban and 25 Rural %. Universe: The universe includes the adult population of Russia residing in 89 regions and republics. The Far North and inaccessible regions of Siberia, military bases and prisons are not included. Primary sampling units: Administrative rayons in regions, krais and republics are used as the primary sampling units (PSUs). Each rayon is a geographically localized territory which in general contains both urban and rural settlements. Either a town or a rural settlement may be a center of rayon. Usually, but not always, it is the largest settlement in a rayon. If a rural settlement is the center of a rayon itself generally consists only of rural settlements and is referred to the category of rural rayons. Separate towns which are considered by official statistical institutions as rayons are also included in the set of primary sampling units. These towns are not part of rayons though they are situated in the rayon's territory. Sometimes they may also include some suburbs. So separate towns and rural rayons may be considered as two poles of a scale which contains all various rayons of Russia (primary sampling units, PSUs). On the continuum between these poles there are rayons of mixed type containing urban and rural settlements of different sizes. Population size of different rayons may vary from 4-5 thousand to several hundred thousand or even several million of people in cities considered as separate rayons. If population size is less than 10,000 the rayon is linked to an adjacent one in a stratum. All PSUs are presented in the form of data base of more than 2,000 records with each record corresponding to one rayon or separate town (later referred to as rayons). The record for each rayon (PSU) contains the following data: - unique identification number and rayon title, - code and title of a region, - central town population size, - rayon population size. All data are based on annual statistical reports (Chislennost RSFSR na 1 yanvarya 1990) and 1989 census information. Primary sampling units stratification: PSUs stratification is based on two variables: geographical placement and status of the rayon center. All primary sampling units are grouped in strata consisting of homogeneous rayons. Strata are formed so that each stratum has approximately the same population size. They may consist of from one to several

dozen PSUs depending on PSUs population size. In this sample the stratum population size is equal approximately 3.000 thousand (tab.1). Two cities in Russia Moscow and St. Petersburg have population size exceeding stratum population size. They form so called self-representing strata. The geographic placement of a rayon is defined by corresponding economic and geographic zone. According to statistical institutions Russia is divided into 11 economic and geographic regions. But for sample construction this division seems to be too fractional and can prevent forming strata of equal size in each zone. The main goal for using the geographic factor as a stratification variable is the uniform spreading of PSUs through Russia territory. For these reasons economic and geographic regions in Russia were grouped in four zones: - Zone 1 - North and Center of European part of Russia (unites Northern, North-Western+Kaliningrad obl., Central and Volgo-Vjatsky regions of Russia). - Zone 2 - South of European part of Russia (unites Tsentralno-Chernozjemny, Povolzhsky and North-Caucasian regions of Russia). - Zone 3 - Ural and West Siberia (two economic regions) - Zone 4 - East Siberia and Far East (two economic regions). For economic and geographic division in Russia seven factors are used: nature and resources, population, industry, power engineering, area industry distribution, agriculture, transport and communications ( Ekonomicheskaya geographiya SSSR. Moskva, Vishaya shkola, 1983). 11 regions were aggregated in four zones on the basis of two first factors: nature and resources and population. The second variable of PSUs stratification is the status of the rayon center. It is formed on officially accepted statistical classification by type and population size: - rural settlement, - urban settlement with population size: - below 20.000 - between 20.000 and 50.000 - between 50.000 and 200.000 - between 500.000 and 1000.000 - more than 1000.000

Remarks about sampling:

-Final numbers of clusters or sampling points: 186 -Sample unit from office sampling: Household

Survey procedure:

Personal Face to Face Interview

Questionnaire:

The WVS questionnaire was in Slovak and Czech. There have been included some special variable labels such as: V56 Neighbours: Gypsies and V149 Institution: The European Union. Special categories labels are: V 167 Least liked groups: 8. Muslims and 9. Gypsies; V203/ V204: Geographical affinity, 1. Locality or town where you live, 2. Region of country where you live, 3. Own country as a whole, 4. Europe, 5. The world as whole. Country Specific variables included are: V209: Language at home. The variables political parties V210 a V212; V233 Ethnic group and Region: V 234 are also included as country specific variables. The V 206 Born in this country is also different in Slovakia.

Sample:

The sample was designed to be representative of the entire adult population, i.e. 18 years and older, of your country. The lower age cut-off for the sample was 18 and there was not an upper age cut-off for the sample. Population: Total non-institutionalized population of Slovakia, 18 years and older. The survey is based on proba Population: Total non-institutionalized population of Slovakia, 18 years and older. The survey is based on probability sampling. The sample is drawn from AISA's own data-base of about 95 thousand names and addresses collected originally from the 1994 October election lists

which were continually updated by lists provided by local administration. This database was established using a four-stage cluster random sample proportional to size based on approximately 250 sampling units spread over Slovakia. The sample for this particular survey was drawn from this database as follows: (1) About 1,400 names and addresses were selected from the data-base by a random procedure; (2) Addresses were assigned to about 113 sampling points; (3) Selection of respondents within households used the last birthday rule. Any replacement of the target person was strictly forbidden. Selection is done: 50% Male and 50% Female.

Remarks about sampling:

-Final numbers of clusters or sampling points: 113 -Sample unit from office sampling: Household

Survey procedure:

Personal Face to Face Interview

Fieldwork:

The Fieldwork Institute is AISA Prague. Fieldwork was conducted by 154 regularly trained AISA interviewers. All interviewers obtained the instruction and they had a possibility to consult all unusual problems which might occur during the fieldwork with their regional supervisors. One interviewer was assigned to each sampling point. Each interviewer had to complete 8 interviews in the selected households. The interviewer had to conduct at least three visits in each selected household (at least one in the evening and at least one during the weekend) unless successfully completing the contact with the selected prospective respondent sooner. 20 percent of completed interviews were controlled by AISA employees by calling back. No serious mistakes were found.

Response rate:

$(1095/1251) \times 100 = 87.5 \%$

Sample size:

1007

Estimated Error:

3,2

Questionnaire:

The WVS questionnaire was in Slovenian. There have been included some special variable labels such as: V56 Neighbours: Muslims and V149 Institution: The European Union. Special categories labels are: V203/ V204: Geographical affinity, 1. Locality or town where you live, 2. Region of country where you live, 3. Own country as a whole, 4. Europe, 5. The world as whole. Country Specific variables included are: V208; V209: Language at home. The variables political parties V210 a V212 and Ethic group: V 233 are also included as country specific variables. The V 206 Born in this country is also different in Slovenia.

Sample:

The sample was designed to be representative of the entire adult population, i.e. 18 years and older, of your country. The lower age cut-off for the sample was 18 and there was not an upper age cut-off for the sample. Population: Total non-institutionalized population of Slovenia, 18 years and older. Respondents were selected by a three-stage probability sample. (1) At the first stage 140 districts were randomly selected. (2) At the second stage three primary sampling units were randomly selected in each of the 140 districts. (3) At the third stage nine respondents were randomly selected in each of the 420 primary sampling units from the central register of citizens. Each interviewer was given five addresses. This sampling procedure generated a sample of about 2,100 potential respondents. If all five addresses could not be reached, the interviewer got two more addresses. If

these could not be reached either, the interviewer got another two before he was allowed to drop the sampling point. The sample was split-half by a random procedure. One half (about 1,050 interviews) were used for the study under consideration. Selection is done: 46% Male and 54% Female. 54% Urban and 46 Rural %.

Survey procedure:

Personal Face to Face Interview

Fieldwork:

The fieldwork was done during November-December 1995. Interviews were conducted by 140 interviewers which were trained for the study. All respondents got a control letter to confirm participation in the study and thus to ensure quality of fieldwork.

Response rate:

$(1007/1050) \times 100 = 95.9 \%$

Questionnaire:

The WVS questionnaire was in Spanish. There have been included some special variable labels such as: V56 Neighbours: Muslims and V149 Institution: The European Union. Special categories labels are: V203/ V204: Geographical affinity, 3 stands for Spain and 4 stands for Europe. Country Specific variables included are: V208: Ethnic identification, 1. Only (Rs region) 2. More (Rs region) than Spanish, 3. As (Rs Region) as Spanish, 4. More Spanish than (Region), 5. Only and ) 9 dk; V209: Language at home: 1. Spanish 2. Catalan, 3 Vasco, 4. Gallego, 5. Valenciano 6. English 7 French 8 Other 9 missing. The variables political parties V210 a V212; Ethic group: V 233; Region: V 234 and V235 Interview Language are also included as country specific variables.

Sample:

Stratified polietapic sampling, built from 1986 census data. Proportional distribution of the sample

was done by Autonomous Communities and town size. All towns with more than 500.000 habitants were sampled. The remaining towns were randomly selected. Selection within towns uses random selection of census sections. Selection of the house was done using random route method. Selection of individuals was done using sex/age quotas. The sample covered national plus Balears and Canary Islands. The number of sampling points was 135 and the number of routes was 162 The sample was designed to be representative of the entire adult population, i.e. 18 years and older, of your country. The lower age cut-off for the sample was 18 and there was not an upper age cut-off for the sample.

Questionnaire:

The WVS questionnaire was in Ukrainian and Russian. There have been included some special variable labels such as: V56 Neighbours: Not specific religious group identified and V149 Institution: The European Union. Special categories labels are: V203/ V204: Geographical affinity, 1. Locality or town where you live, 2. Region of country where you live, 3. Own country as a whole, 4. Europe, 5. The world as whole. Country Specific variables included are: V208: Ethnic identification, 2. Russian, 3. Representative of a national minority, 4. Citizen of Ukraine first and a member of some ethnic group second; V209: Language at home: 2. Russian. The variables political parties V210 a V212; Ethnic group: V 233 and Region: V 234 are also included as country specific variables. The V 206 Born in this country is also different in Ukraine.

Sample:

Population: Total non-institutionalized population of Ukraine, 18 years and older. Two-stage random sample: (1) random selection of 200 primary sampling units (electoral districts) from the list of total number of electoral districts of the March 1994 parliamentary election which were weighted

proportionally to size. (2) random selection of 3,304 respondents (proportionally to size of electoral district) from the corrected list of citizens entitled to vote in the 1994 parliamentary election (corrections were made in June 1996 for the elections to the local Soviets, the lists were additionally verified by the fieldwork institute: Selection is done: 40% Male and 60% Female. 69% Urban and 31 Rural %. Nationality 59% Ukrainian 45% Russian and Other 55% The sample was designed to be representative of the entire adult population, i.e. 18 years and older, of your country. The lower age cut-off for the sample was 18 and there was not an upper age cut-off for the sample. Ethnic group of the respondent is not available in the data. The language chosen for the interview is not completely comparable with the language indicated in the census of 1989. Among those who indicated another language than Ukrainian or Russian in the census some may have chosen Ukrainian and some Russian as language of interview.

#### Survey procedure:

Personal Face to Face Interview

#### Fieldwork:

Interviews were conducted by 165 interviewers which were trained especially for the study. 10 percent of the interviews were checked by follow-up visits to randomly selected respondents to ensure quality of fieldwork.

#### Response rate:

$(2811/3305) \times 100 = 85.1 \%$

**V66.-** Some people feel they have completely free choice and control over their lives, while other people feel that what they do has no real effect on what happens to them. Please use this scale where 1 means "none at all" and 10 means "a great deal" to indicate how much freedom of choice and control you feel you have over the way your life turns out.

	TOTAL	Freedom of choice about control over life										NA	DK	Base mean
		None at all	2	3	4	5	6	7	8	9	A great deal

**V86.-** Imagine two secretaries, of the same age, doing practically the same job. One finds out that the other earns considerably more than she does. The better paid secretary, however, is quicker, more efficient and more reliable at her job. In your opinion, is it fair or not fair that one secretary is paid more than the other?

**V125.-** Now I'd like you to tell me your views on various issues. How would you place your views on this scale? 1 means you agree completely with the statement on the left; 10 means you agree completely with the statement on the right; and if your views fall somewhere in between, you can choose any number in between. Statement 1. Incomes should be made more equal Statement 2. We need larger income differences as incentives for individual effort

**V128.-** Now I'd like you to tell me your views on various issues. How would you place your views on this scale? 1 means you agree completely with the statement on the left; 10 means you agree completely with the statement on the right; and if your views fall somewhere in between, you can choose any number in between. Statement 1: Competition is good. It stimulates people to work hard and develop new ideas Statement 2: Competition is harmful. It brings out the worst in people

Country	TOTAL	Competition is good or harmful										NA	DK	Base mean

**V178.-** Here are two statements which people sometimes make when discussing good and evil. Which one comes closest to your point of view? A. There is absolutely clear guidelines about what is good and evil. These always apply to everyone, whatever the circumstances. B. There can never be absolutely clear guidelines about what is good and evil. What is good and evil depends entirely upon the circumstances at the time.

**V227CS.-** Here is a scale of incomes. We would like to know in what group your household is, counting all wages, salaries, pensions and other incomes that come in. Just give the letter of group your household falls into, before taxes and other deductions. Country specific (when income scale used) Note: Some countries did not apply currency scale but unlabelled 1-10 scale where 10 is high and 1 stands for low income.

**Y001.- Materialism/Postmaterialism (12-item index)** The MatPMat12 values index used here is created as follows from V104 to V109: V104. People sometimes talk about what the aims of this country should be for the next ten years. On this card are listed some of the goals which different people would give top priority. Would you please say which one of these you, yourself, consider the most important? CODE ONE ANSWER ONLY UNDER "First Choice." V105. And which would be the next most important? CODE ONE ANSWER ONLY UNDER "Second Choice." First ChoiceSecond Choice 1 A high level of economic growth11 Making sure this country has strong defense forces22 \*Seeing that people have more say about how things are done at their jobs and in their communities 33 Trying to make our cities and countryside more beautiful 44 Don't know [DO NOT READ OUT] 99 V106. If you had to choose, which one of the things on this card would you say is most important? CODE ONE ANSWER ONLY V107. And which would be the next most important? CODE ONE ANSWER ONLY First ChoiceSecond Choice Maintaining order in the nation11 \*Giving people more say in important government decisions22 Fighting rising prices 33 \*Protecting freedom of speech44 Don't know [DO NOT READ OUT] 99 V108. Here is another list. In your opinion, which one of these is most important? CODE ONE ANSWER ONLY V109. And what would be the next most important? CODE ONE ANSWER ONLY First ChoiceSecond Choice A stable economy 11 \*Progress toward a less impersonal and more humane society22 \*Progress toward a society in which ideas count more than money 33 The fight against crime44 Don't know [DO NOT READ OUT] 99 MatPMat12 index is constructed by summing the number of Postmaterialist items chosen as either first or second choice in its group (these five items are designated with an asterisk above). This produces an index that runs from 0 (no Postmaterialist items are given high priority) to 5 (all five Postmaterialist items are given high priority). SPSS code used to build V1000 is as follows: COMPUTE V1001=0. COMPUTE V1002=0. COMPUTE V1003=0. COMPUTE V1004=0. COMPUTE V1005=0. IF (V104=3 OR V105=3) V1001=1. IF (V106=2 OR V106=4) V1002=1. IF (V107=2 OR V107=4) V1003=1. IF (V108=2 OR V108=3) V1004=1. IF (V109=2 OR V109=3) V1005=1. COMPUTE V1010=9. IF NOT (V104=0 & V105=0 & V106 =0 & V107=0 & V108=0 & V109=0) V1010=V1001+V1002+V1003+V1004+V1005.

**Y003.-** Autonomy Index is a computed variable based on the Children qualities battery. It uses only four variables: V22= Children qualities: Religious Faith V24= Children qualities: Obedience V15= Children qualities: Independence V21= Children qualities: Perseverance Only variables with answers to all v22,v24,v15,v21 have an index. The SPSS like formula is: Compute Y003=-5. if v22>=0 and v24>=0 and v15>=0 and v21>=0 then Y003=(v22 + v24)-(v15 +v21).
