ARGENTINA 1991

Geographical scope:

Argentina

Principal investigator(s):

Marita Carballo de Cilley Gallup Argentina, Cordoba 883-Pº12 1054 Buenos Aires Argentina T+011541 312-7541 F+011541 312-7543 E mcarballo@gallup.com.ar

Data Collection Organization:

Instituto Gallup Arentina (Buenos Aires)

Fieldwork Period:

01-02-1991 - 01-04-1991.

Universe:

National Population, Both sexes, 18 and more years

Sample size:

1002

Estimated Error:

3,2

Questionnaire:

Broad topics covered are work, the meaning and purpose of life, family life, and contemporary social issues. Respondents were asked to rate the importance of work, family, friends, leisure time, politics, and religion in their lives. They were also asked how satisfied they were with their present lives, whether they discussed political matters, and how they viewed society.

Sample:

Sampling was limited to the urbanized central portion of the country, where about 70 per cent of the population is concentrated, and which also has above-average incomes. Within this region, 200 sampling points were selected, with approximately five individuals being interviewed in each sampling point through multi-stage probability sampling moving through zones, sections and dwellings to individuals.

Sample:

In Chile, the sample covers the central portion of the country, which contains 63% of the total population; the income level of this region is about 40% higher than the national average. El procedimiento de muestreo es trietápico. Las etapas son las siguientes: 1) En primer lugar se seleccionan según sorteo aleatorio simple, conglomerados (subdistritos) al interior de distritos censales (unidad territorial definida por el Instituto Nacional de Estadística) los que tienen una población aproximada de 2000 habitantes. 2) En segundo lugar se genera una forma de selección del domicilio en forma aleatoria, es decir se definen, previo al terreno, rutas al interior de los subdistritos y números terminales aleatorios de las viviendas. De esta forma solo se realizan entrevista en aquellas viviendas que se encuentran en la ruta y cuyos números terminales correspondan a los números que se solicitan. 3) En tercer lugar, se calculan las cuotas de edad, sexo y sector pasivo de la población.

CHINA 1990

Geographical scope:

China

Principal investigator(s):

Jiang Xingrong Xiang Zongde Prof. Ronald Inglehart Institute for Social Research University of Michigan Ann Arbor MI 48106-1248 USA T+ 1-734-763-1346 F+ 734-764-3341 E rfi@umich.edu

Data Collection Organization:

China Statistical Information & Consultancy Service Centre (Beijing)

Fieldwork Period:

01-07-1990 - 31-12-1990.

Universe:

National Population, Both sexes, 18 and more years

Sample size:

1000

Estimated Error:

3,2

Questionnaire:

The WVS questionnaire was in Chinese. Broad topics covered are work, the meaning and purpose of life, family life, and contemporary social issues. Respondents were asked to rate the importance of work, family, friends, leisure time, politics, and religion in their lives. They were also asked how satisfied they were with their present lives, whether they discussed political matters, and how they viewed society. The sample was designed to be representative of the entire adult population, i.e. 18 years and older, of your country. The lower age cut-off for the sample was 18 and there was not an upper age cut-off for the sample.

Sample:

The Chinese survey used stratified multi-stage random sampling, first stratifying the provinces according to three levels of economic development, with several provinces being randomly selected within each of these strata. Within each province, approximately 20 sampling points were selected randomly, with five individuals being interviewed at each point. The population was stratified according to rural-urban residence, sex, age, occupation and education, and within these sampling points, each stratum was sampled by quota, with a 10 per cent subsample of illiterate persons. The method used was stratified multiple-stage random sampling stratification by region and also by urban-rural criteria, sex, age, occupation and level of education. Each strata sampled by quota.

Selection is done: 600% Male and 40% Female. 70% Urban and 30 Rural %.

Eric de Costa V.P. Madhok Prof. Ronald Inglehart Institute for Social Research University of Michigan Ann Arbor MI 48106-1248 USA T+ 1-734-763-1346 F+ 734-764-3341 E rfi@umich.edu

Data Collection Organization:

Indian Institute of Public Opinion (New Delhi)

Fieldwork Period:

01-07-1990 - 31-12-1990.

Universe:

National Population, Both sexes, 18 and more years

Sample size:

2500

Estimated Error:

2,0

Questionnaire:

Broad topics covered are work, the meaning and purpose of life, family life, and contemporary social issues. Respondents were asked to rate the importance of work, family, friends, leisure time, politics, and religion in their lives. They were also asked how satisfied they were with their present lives, whether they discussed political matters, and how they viewed society.

Sample:

In India the survey was stratified to cover 14 states representing different geographic and socioeconomic regions of the country, with 2500 interviews distributed among these states in proportion to their population. Within these 14 states, about 10 percent of the Parliamentary Constituencies were selected and 50 interviews allocated to each one. The interviews were then stratified according to town size, allocating 90% of the interviews to be carried out with the literate part of the public. Within this segment, interviews were stratified according to education. Interviews were carried out in the eight most widely-spoken languages of India, but the rural 10 percent of the sample was conconfined to the five Hindi-speaking states in the sample. In India, the sample was stratified to allocate 90% of the respondents with literate respondents (who are slightly less than 50% of the population)

Questionnaire:

The WVS questionnaire was in Japanese. There have been included some categories and variables such as: V333, V334, V648, V649, V671-679, V711-715, V731/V732, V742 and V744. Broad topics covered are work, the meaning and purpose of life, family life, and contemporary social issues. Respondents were asked to rate the importance of work, family, friends, leisure time, politics, and religion in their lives. They were also asked how satisfied they were with their present lives, whether they discussed political matters, and how they viewed society.

Sample:

Sample design is that of stratified multi-stage random sampling. The country was stratified by both region (5 classes) and city size (5 classes) based on the 1985 Census data. From each stratum such administrative units as cities towns and villages were randomly drawn. Then the enumeration districts of the Census were randomly drawn from those units. The total number of the enumeration districts drawn was 162, within which 1,620 (162 x 10) individual names and addresses were systematically pre-selected using the resident cards maintained by local government agencies.

Survey procedure:

Missing

Remarks about non-response:

A total of 1,011 personal interviews were completed out of the pre-selected sample of 1,620

MEXICO 1990

Geographical scope:

Mexico

Principal investigator(s):

Miguel Basanez Instituto Tecnológico Autónomo de México Prof. Ronald Inglehart Institute for Social Research University of Michigan Ann Arbor MI 48106-1248 USA T+ 1-734-763-1346 F+ 734-764-3341 E+ rfi@umich.edu

Data Collection Organization:

Market and Opinion Research International [Mori de Mexico] (Mexico City)

Fieldwork Period:

01-06-1990 - 31-07-1990.

Universe:

National Population, Both sexes, 18 and more years

Sample size:

1531

Estimated Error:

2,6

Sample:

The sample framework departs from the list of cities over 50,000 inhabitants. The country was divided in four great regions: Metropolitan Zone (ZM), North (N), Center (C) and South (S). Two states take part in the ZM (Distrito Federal and Mexico); 16 states in the zone N (Jalisco, Nuevo León, Guanajuato, Coahuila, Chihuahua, Aguascalientes, Sonora, Durango, Nayarit, Zacatecas, Colima and Baja California Sur). The zone C is formed by 6 states (Michoacán, Guerrero, Querétaro, Morelos, Hidalgo and Tlaxcala); and, finally, in the zone S were considered 8 states (Puebla, Yucatán, Veracruz, Tabasco, Chiapas, Campeche Oaxaca and Quintana Roo). The ZM's population is 18.7 millions (22.2%) and it has 93% of urban population. The C's population is 13.6 millions (16.1%) with 45% urban. The zone S has 20.2 millions (24%) with 38% urban; and the N's population is 31.7% millions (37.7%) with 64% urban. Country's estimated total population is 84.287 millions, 72 % and 28% rural. There are 73 cities in the list, but only 42 cities were randomly selected in the sample. These cities have the number of starting points according to the total population divided for the total number of cities to have an interval. For each starting point were applied 20 questionnaires. So, cities with one, two or three starting points have 20, 40 or 60 questionnaires taken. The additional numbers of interviews in the Mexico City area (+85) come from an over-sampling of 160 questionnaires that we took in order to have a closer view of the city for our local questions (Q745-753). Those questionnaires are identified by numbers over the 1500 'folio'. Those 160 questionnaires

are included in the tape. In sum the sample was taken from a list of 73 cities with population larger than 50,000 and 42 cities were chosen: 5 from the ZM zone, 7 from C, 11 from S and 19 from N. There were 75 starting points, and so 1500 questionnaires. The total urban population is 72% and 28% rural, proportionately, surveyed.

Universe:

National Population, Both sexes, 18 and more years

Sample size:

2736

Estimated Error:

1,9

Questionnaire:

The WVS questionnaire was available in 8 languages: English, Afrikaans, Zulu Xhosa, North Sotho, South Sotho Tswana and Shangaan.

Sample:

The universe and the sample size was 1236 whites throughout South Africa, urban and rural. 600 were blacks living in the PWV, Durban, Port Elizabeth East London and Cape Town, including squatters. 200 Coloureds, living in Cape Town and 200 Asians, living in Durban. The samples for Blacks, Coloureds and Asians were firstly stratified by city and township. Within each stratum sampling points were selected at random. From each sampling point 5 plots were determined according to a random selection, marked on maps which were given to the interviewer. For each plot the interviewer had to establish the number of households situated on this plot. One household was selected, again according to a random procedure. Within the qualifying households all males/females 16 years and older were listed and the qualifying respondent selected according to a random system. If the selected person could not be interviewed, even after 3 calls, including evening calls, the person was substituted by someone of the same sex, age, working status, living in the same street. The sample was stratified by race overrepresenting minority races. A second part of the Social Value Study a sample of 500 RURAL Blacks, stratified as follows: 100 Transkei, 100 Lebowa, 100 KwaZulu, 100 Gazankulu and 100 Bophuthatswana.

Survey procedure:

Missing

Fieldwork:

All interviewers were personally briefed by their Field Manager or Field Supervisor. In the case of Blacks, Coloureds and Asians, interviews were conducted on a personal face to face basis. In the case of Whites, the questionnaire was filled in by respondents. The questionnaire was available in 8 languages: English, Afrikaans, Zulu, Xhosa, North Sotho, South Sotho, Tswana and Shangaan. The questionnaire was conducted in whatever language respondent preferred. A minimum 20% back-check was administered on each interviewer's work.

Remarks about non-response:

A random sample of 2500 was selected. Of these, 1086 participated in the survey and returned the questionnaire. Since young people were under-represented in the final sample (as is often the case in panel surveys), an additional 150 personal interviews were conducted with the missing age group, bringing the total sample to 1236.

Weighting:

Yes A weighing variable was added
