Universe:

National Population, Both sexes, 18 and more years

Sample size:

1280

Estimated Error:

2,8

Questionnaire:

The WVS questionnaire was translated from the English questionnaire by a member of the research team. The translated questionnaire was not back-translated into English; however the translated questionnaire was pre-tested. There have been some optional WVS questions and country-specific questions included since we carried out the fourth wave in early 1999 and we did not want to lose trends we included some items that were asked in the previous wave. Nevertheless, a number of questions were omitted: V145A/B/C/D/E/F and V237 Agreement/disagreement with Television is my most important form of entertainment. The reason was because we did not receive those questions at the moment we launch this wave in Argentina.

Sample:

The sampling method applied was stratified according to criteria and Random Multi- Stage in the selection process of the sampling units. After stratifying the nation geographically and by size of community in order to insure conformity of the sample with the latest available estimates by National Census of the distribution of the adult population, 262 different sampling locations or areas were selected on a random basis. The interviewers had no choice whatsoever concerning the part of the city in which they conduct their interviews. Approximately five interviews were conducted in each such randomly selected sampling point. Interviewers were given maps of the area to which they were

assigned, with a starting point indicated; they were required The selection of the final sample unit was selected according predetermined age and sex quotas. These quotas were established according the distribution of these variables in each locality/ city. The procedures described above, were designed to produce samples approximating the adult civilian population (18 and older) living in private household (that is, excluding those in prisons, hospitals, hotels, religious, and educational institutions and those living on reservations or military bases). Also substitution was permitted. There was a specified direction, interviewers should follow. After a successful interview, the interviewer should leave 4 households and make an interview at the 5Th household. If there was a refusal or it was out of target, they tried in the household immediately after the one selected by the probabilistic sample. Geographical stratification was used: division of the country in Regions and Population density.

Remarks about sampling:

-Final number of clusters or sampling points: 262. -Sample unit from office sampling: household.

Survey procedure:

Personal Face to Face Interview

Fieldwork:

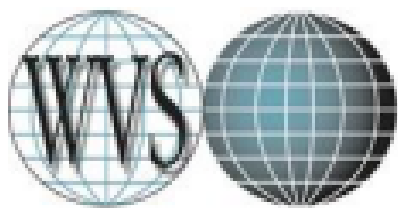

Interviewers were paid according to performance. Approximately 20% of the interviews were supervised. Approximately 20% of the interviews were back-checked.

Response rate:

Rate of non response: 25%

Weighting:

Yes The data were weighted by size of locality/stratum.

V84.- Now I would like to ask you something about the things which would seem to you, personally, most important if you were looking for a job. Here are some of the things many people take into account in relation to their work. Regardless of whether you're actually looking for a job, which one would you, personally, place first if you were looking for a job?

Argentina 1999(N=1280)

Ahora me gustaría preguntarle sobre las cosas que a Ud. personalmente le parecerían más importantes, si estuviera buscando un trabajo. Aquí hay algunas de las cosas que la gente toma en cuenta en relación a su trabajo. Independientemente de que Ud. esté o no buscando trabajo actualmente, cuál consideraría primero si estuviera buscando un empleo?

V180.- Some people believe that certain kinds of problems could be better handled by the United Nations than by the various national governments. Others think that these problems should be left entirely to the respective national governments; while others think they would be handled best by the national governments working together with coordination by the United Nations. I'm going to mention some problems. For each one, would you tell me whether you think that policies in this area should be decided by the [NATIONAL: i.e., "French," "Japanese," "Brazilian"] governments, by the United Nations, or by the national governments with UN coordination?
