EGYPT 2001

Geographical scope:
Egypt

Principal investigator(s):
Abdel-Hamid Abdel-Latif Professor of Sociology Womens's College Ain Shams University, Cairo, Egypt T+ 202 419 9398 F+ 202 419 9021 E-mail: latif@aucegypt.edu or wvscairo@aucegypt.edu

Data Collection Organization:
Emac Research and Training Center & Ain Shams University

Fieldwork Period:
01-07-2000 - 01-01-2001.

Universe:
National Population, Both sexes,16 and more years

Sample size:
3000

Estimated Error:
1,8

Questionnaire:
The WVS questionnaire was translated from the English questionnaire by a member of the research team. The translated questionnaire was also pre-tested. The questionnaire was administered to 300 individuals. Some questions included caused particular problems: Variable 133-136, Variable 182, Variable 196, and Variable 199. We had to re-phrase some questions to fit the Egyptian situation. All problems were solved consequently. The sample was designed to be representative of the entire adult population, i.e. 18 years and older, of your country. The lower age cut-off for the sample was 16 and there was not any upper age cut-off for the sample.

Sample:
There were different stages in the sampling procedure: First Stage: Stratification of Primary Sampling Units (PSUs) identification of 26 Governorates Second Stage: sample of Census Blocks in each governorate to be included Third Stage: Dividing Sample According to Educational Levels Fourth Stage: Choosing Persons to be interviewed in each household. A random sample of households in each PSUs was first selected. Eligible individuals who were 16 years of age and over with certain educational level were then selected for interviews. Substitution was permitted in case the selected household did not exist for any reason at the specified address, a different household from the same census block was selected. The design provides for at least 4 calls, however. The primary stage of

sampling Egyptian households was divided into 26 governorates based on boundaries in the Egyptian local governance system. Because these governorates are not homogeneous, the 1996 Census divided these governorates into four different areas: -Urban areas include governorates, which are urban as a whole, dominated by trade, industry, and business. This category includes Governorates of Cairo, Alexandria, Port Said, and Suez. In Urban-Rural areas, each governorate has some small towns but most inhabitants live in villages and works in agricultural activities. -Northern urban-rural areas include the northern part of the Nile valley: Domiat, Ismailia, Dakahlia, Sharkia, Kaluobia, Gharbia, Menoufia, Kafr Elll Shheikh, and Behera. -Southern urban areas include the southern part of the Nile valley governorates: Giza, Bani Sowief, Fayom, Assiout,m Kena, and Aswan. -Border Areas include desert outside the Nile Valley, including North and South Sinai, New Valley, and Matrouh. There were some limitations when the survey was realized. It was the high proportion of housewives who were present at the time of the interview.

Remarks about sampling:
-Final numbers of clusters or sapling points: 9 -Sample unit from office sampling: Household

Survey procedure:
Personal Face to Face Interview

Fieldwork:
The fieldwork was done by Emac Research and Training Centre-Cairo Egypt in Collaboration with Ain Shams University-Department of Sociology-Womens College. The interviewers were paid according to performance. Approximately 25% of the interviews were supervised and 5% were back-checked.

Remarks about non-response:
Two hundred fifty questionnaires were rejected after the check-up due to errors as well as illogical answers All these questionnaires were replaced by different households in the same census blocks.

Weighting:
No weighting variable was added
