

ESS 2006 Data Protocol

Edition 1.4, August 2006

NORWEGIAN SOCIAL SCIENCE DATA SERVICES

Introduction

The object of the ESS 2006 Data Protocol is to offer a comprehensive document with specifications and procedures to be used in the production of national ESS data files. The underlying principle is that resources put into the planning phase of an international survey result in national data of higher quality and standardisation, which in turn will advance the release of the integrated (official ESS 2006) data files from the ESS Data web site, <http://ess.nsd.uib.no>.

In general, the Data Protocol gives specifications for the coding of data, the production and delivery of data files and other electronic deliverables. Some of the specifications, for example coding standards, are found elsewhere on the ESS Archive web site, <http://essdata.nsd.uib.no/>.

The Data Protocol defines what the national teams are required to deposit to the ESS Archive. If the content and quality of the electronic deliverables do not adhere to the specifications in the Data Protocol and the ESS Archive web site, the archive reserves the right to ask for new deliverables.

Please read all sections of this Data Protocol. The first section A describes how the communication between the archive and the data providers is organised.

Section B, "Electronic deliverables", gives an overview of the files and documents the National coordinators are asked to deliver to the archive. Section B does also describe the more practical issues concerning data delivery, such as common identifiers in the files. Please pay special attention to section B5 "Anonymised data", as this is a prerequisite for delivering data to the archive.

Section C of the Data Protocol deals with "principles of variable definitions". This section gives detailed information on the usage of missing values, how multiple responses are dealt with, as well as the rationale behind variable names, labels and categories. Please pay special attention to the coding of "Refusals" in section C1.

The use of international standards is described in section D. To avoid the use of different versions of the same international standards across countries, the national teams are required to use the standards made available from the ESS Archive web site.

Country specific variables and administrative variables are listed, explained and specified in section E, whereas section F contains tables of variable names and definitions for all data files. Section F4 is a flowchart documenting the routings in the ESS Core part of the questionnaire.

Section G refers to programmes for applying labels, categories, and formats in SPSS and SAS. The programmes are available from the ESS Archive web site.

Information about National Technical Summaries (NTS) are found in section H of the Data Protocol.

The national teams will be informed by e-mail when the Data Protocol and the ESS Archive web site are updated.

ESS Data Team at NSD
essdata@nsd.uib.no

Updates from previous editions

From Edition 1 to 1.1

F62 MARITALA version A, routing, p. 51

The routing for respondents in a civil partnership, code 02, has been corrected.

Respondents in a civil partnership, code 02, are to be asked question F63.

From Edition 1.1 to 1.2

D45-D51, RPNTYNG - RDVCYC (Most people...), p. 35

The variable labels and categories have been modified in the Data Protocol and in the programmes (according to ESS3 Alert01).

New programmes, p. 92

For data producers using question numbers rather than ESS official mnemonic variable names when preparing ESS data, programmes renaming question numbers to mnemonic names are available in the programme packages.

New as well as modified programmes are available from "Data protocol and variable definitions" at <http://essdata.nsd.uib.no/>

From Edition 1.2 to 1.3

D38a/b TOCHLD, p 34

The variable label has been modified, and the variable name changed accordingly, in the Data Protocol and in the programmes (according to ESS3 Alert02).

From Edition 1.3 to 1.4

Additional variables in Contact Form data file DEFECTCF, INTERV added in accordance with "Annotation of Variables in Contact Forms" 03.07.06.

The programmes for applying variable definitions to Contact Form data files has been updated with the new variables. The new programmes are available from "Data protocol and variable definitions" at <http://essdata.nsd.uib.no/>

A. Procedures for the collaboration between the national teams and NSD

The ESS Archive web site

The ESS Archive web site at <http://essdata.nsd.uib.no/> will be the central meeting place between NSD and the national teams during the data delivery and data processing phases of the project. One purpose of the ESS Archive web site is to give all parties in the project easy access to the common set of tools and utilities which are used in the planning and production of the data files. Another purpose is to make the data processing at NSD as transparent as possible. By using the ESS Archive web site, the national teams can control their data delivery, and audit NSD's data processing.

The NSD team and primary contact persons

The responsibility for the ESS 2006 data at NSD is shared by a team of persons who are trained in the processing of comparative survey data. Each ESS country will be assigned a primary contact person. This person will have the main responsibility for the production of the country's data files. The NSD team has a project email address, essdata@nsd.uib.no. When you send emails to your contact person, please address them to the project email address. This will ensure that your emails are read even if your contact person is out of office.

Data deposit

When electronic deliverables (see section B) are ready for delivery to the archive, the National Team are kindly asked to use the "Data deposit" option on the ESS Archive web site. When the transfer is successfully completed, the NSD team will automatically be notified by the system. The assigned contact person will shortly after get in touch with the national team confirming the delivery.

Data processing

The "View archive processing" option on the ESS Archive web site gives the national teams access to the data processing catalogue of their country's data. All programmes, data files and output used in the processing will be available for download, making the archive's work as transparent as possible. The production and cleaning of data will be based on a dialog between NSD and the national teams. Whenever the processing involves decisions not specified in the standard procedures, the national team will be notified and asked for advice. Processing will be done in two steps, each followed by a report documenting the results.

Please be aware that if (parts of) the data files or documentation deviate too much from the specifications in the Data Protocol, the national team might be asked to make a new delivery containing corrected data and/or documentation.

Data validation

When the processing of data is completed, the national team will be notified and asked to download NSD's data processing report and drafts of the country's data files for validation. Only when the processing has been approved by the national team can the files be finalised and included in the integrated files.

Please be aware that the draft file from NSD will be a trial dataset made available in confidence for the National co-ordinator, so that preliminary analyses may be undertaken as a means of 'testing' the data in advance of their widespread distribution. The file should be available only to persons who have been registered by the CCT as members of the National co-ordinator's team.

B. Electronic deliverables

The deadline for submitting *all* data and documentation files to the archive is **JANUARY 31st 2007**.

The National Teams are kindly asked to use the ESS Archive web site to deposit their files. All national data files that arrive fully documented and in adherence with the specifications of the Data Protocol, within the deadline, will be included in the first release of the integrated data file in September 2007. The processing of various country data arriving after the deadline will be executed on a "first come first served basis".

B1. Deliverables to NSD

The electronic deliverables to NSD include data files as well as text files documenting the national survey. When several files are submitted at the same time, please zip them into one file before uploading them to the ESS Archive. The data files should be delivered with variable names, labels and categories as specified in the Data Protocol (see section F and G).

Deliverables	Possible file formats	Comment
Data files		
1. Main questionnaire and Supplementary questionnaire, with additional ESS variables. 2. Interviewer questionnaire 3. Contact form	<ul style="list-style-type: none">• SPSS system file• SPSS portable file• SPSS set up, reading raw data file• SAS system file, Windows• SAS portable file• SAS set up, reading raw data file	See sections F1 - F3 and G in Data Protocol, and "Data protocol and variable definitions" under <i>Prepare data</i> on the ESS Archive web site for specifications of files
4. Parent's occupation	<ul style="list-style-type: none">• Ascii text file	See section F5 for specification of file
Documents		
5. National technical summary	<ul style="list-style-type: none">• PDF form (recommended)• Word Perfect• Word• Rich text format	See section H in Data protocol and "Survey documentation" under <i>Prepare data</i> on the ESS Archive web site
6. Population statistics 7. Main questionnaire 8. Supplementary questionnaire 9. Interviewer questionnaire 10. Contact form 11. Show cards	<ul style="list-style-type: none">• Word Perfect• Word• Rich text format (Ascii text if txt is the only possible output from the CAPI system)	In all languages fielded in the country Please compile the show cards in one file (one file for each language fielded in the country)
12. Interviewer and fieldwork instructions 13. Advance letters and other written information to the respondents	<ul style="list-style-type: none">• Word Perfect• Word• Rich text format• Portable document file	
14. If CAPI: CAPI programmes	Ascii text	

B2. Specifications and delivery of sampling data

The ESS Sampling team is responsible for the specifications and processing of the Sampling data files, and the co-operation will be organised directly between the national team and their contact person in the Sampling team.

B3. Common identifiers in data files

The four data files deposited to NSD should be prepared for merging, also with the Sampling data file deposited to the Sampling team. Therefore all files must have common identifiers, i.e. respondent's identification number and country code (see section E2). The national teams may deliver their data as separate files, or as one merged file, depending on what is most convenient in each country. Please leave out the sample data in the deposit to NSD.

B4. Checking data

The national teams are asked to check and edit the data with respect to uniqueness and consistency of identification number(s), wild codes and data consistency. The final wild code checking should be done after the Data Protocol variable names, labels and categories have been applied to the national data files (see section G).

The minimum requirement is that all data verification and editing depending on access to questionnaires or CAPI files must be done prior to delivering the data to the ESS Archive.

The National teams are asked to supply information about the cleaning procedures in the national Technical Summaries (see section H).

B5. Anonymised data

In accordance with data protection regulations in participating countries, only anonymised data will be made available to users. Before depositing data to NSD, each national team is responsible for checking their data with confidentiality in mind. The national teams will be asked to confirm in their National Technical Summary that the data have been anonymised in accordance with national or EU regulations on protection of individuals with regard to the processing of personal data (see http://ec.europa.eu/justice_home/fsj/privacy/).

The checking of anonymity has to be done under the premise that all data files will be merged. Some standard precautions should be made to ensure that the ESS data files embody as much information as possible and still comply with the demands of confidentiality:

Basic precautions

File 1. Data from Main questionnaire and Supplementary questionnaire, with additional variables.

- a. IDNO - Respondent identification number: if the number makes it possible to identify the respondent, or a geographical area with a small population, encrypt the number before deposit
- b. REGIONxx - Region (country-specific variable): the categories of the variable should cover areas of large populations, and be in accordance with the requirements specified in section E1.4.

File 2. Interviewers' questionnaire

- a. See above
- c. INTNUM - Interviewer identification number: if the number makes it possible to identify the interviewers or a geographical area with a small population, encrypt the number before deposit.

File 3. Contact forms

- a. See above
- c. See above

File 4. Sampling data

- a. See above
- d. Identification number of primary and/or secondary sampling units: if the number makes it possible to identify the interviewer(s) or the respondent or a geographical area with a small population, encrypt the number before deposit to the Sampling team.

Further precautions

Even if all individual and geographical identifiers are encrypted, the dataset contains a lot of factual information about the respondent. Combining information about gender, age, household, region of residence, citizenship, country of origin, parents' geographical origin, language, four-digit occupation code, spouse's four-digit occupation code and textual information about parents' occupation might in some cases violate confidentiality. This depends on the population characteristics of the country and its regions, and anonymity must therefore be assessed at country level by each national team.

If anonymisation beyond the basic precautions (a-d) is necessary, it is recommended to use the following procedures in the following order:

- e. Rounding
- f. Substitution
- g. Cell suppression

Please contact NSD in case precautions e, f, or g is necessary.

C. Principles of variable definitions

C1. Missing values

Analysis of item non-response is an important part of quality control of survey items, and consistent use of missing values in the questionnaire and other documentation ensures uniform coding of skips in the interview. The aim is that the ESS data files will contain detailed information on item non-response.

The missing values in the data files are defined in the following way:

Not applicable: 6, 66, 666 etc., where the respondent has been routed away from the question. This missing value might be coded in the national data files before deposit, but the coding will be overwritten by standardised procedures at NSD.

Refusals: 7, 77, 777 etc., where the respondent has explicitly refused. This should be coded by the interviewers whether they use CAPI or PAPI.

Important notice:

In some questions an explicit refusal code is available. Otherwise, "Refusal" shall not be included in the scale or the list of answer categories presented to the interviewer in the questionnaire:

1. Those using CAPI: Place "Refusal" as an option for the interviewer, for example on the top menu of the screen where "Don't know" is usually placed.
2. Those using PAPI and manual registration of the questionnaires: Instruct the interviewers to write (an abbreviation of) "Refusal" at the item. Instruct the registration operators to write in the same number of 7s as there are 8s in "Don't know".
3. Those using PAPI and optical scanning of the questionnaires: The questionnaire should have an administrative column with a "refusal" box identifiable for the scanning programme.

Don't know: 8, 88, 888 etc. These codes are almost always available. They can be included in the list of answering options presented to the interviewers, or placed in administrative columns, menus etc., depending on the routines of the survey organisation.

No answer: 9, 99, 999 etc. are codes for missing data not elsewhere explained, for example respondent/interviewer errors and production/system errors. This missing value might be coded in the national data files before deposit, but the coding will be overwritten by standardised procedures at NSD. In administrative variables and interviewer codes, 9, 99, 999 etc. are labelled "Not available".

C2. Multiple responses and missing values

In general, we think of multiple response as the result of a "mark all that apply" question, or "mention all that you think of" in open-ended questions. Examples of multiple response questions are "In which countries have you been on holiday during the last five years?" (open) and "Here is a list of voluntary organisations. Please tell me which of these organisations you are a member of" (closed).

In the ESS 2006 data files, multiple response variables will have the values 0 "Not marked" and 1 "Marked". Each group of multiple response variables will have one or more additional dichotomous variables for missing values.

One example is question F37a about what partner has been doing last 7 days, which results in the variables DWRKP, EDCTNP, UEMPLAP, UEMPLIP, DSBLDP, RTRDP, CMSRVP, HSWRKP, DNGOTHP, DNGDKP (Don't know) AND DNGREFP (Refusal). In addition, DNGNAPP (Not applicable) and DNGNAP (No answer) will be included in the data file. DNGNAPP and DNGNAP will be overwritten by standardised procedures at NSD, but can either be coded, or assigned the value 0 (zero) or system missing in the national data files. In countries where CMSRVP is not applicable, the variable should be assigned the value 0 (zero) or system missing.

If the respondent does not have a partner, all variables will be assigned the value 0, except DNGNAPP (DOING LAST 7 DAYS, PARTNER: NOT APPLICABLE), which will be assigned the value 1. Correspondingly, if the respondent refuses to answer the question, DNGREFP should be coded as 1, the rest 0.

The following questions and variables are defined as multiple responses in the ESS 2006 questionnaires. Please ensure that the PROBE/PROMPT/"Code all that apply" instructions to the interviewers are included in the questionnaire.

C25:

DSCRRCE - DSCRNA

F8a:

PDWRK - DNGNA

F37a:

PDWRKP – DNGNAP

I6:

PREWHP – PRENA

If not applicable, **F8a:** CMSRV "DOING LAST 7 DAYS: COMMUNITY OR MILITARY SERVICE" and **F37a:** CMSRVP "PARTNER DOING LAST 7 DAYS: COMMUNITY OR MILITARY SERVICE" should be assigned the value 0 (zero) or system missing.

C3. Formats

The formats of variables are defined in the tables in section F. All numeric variables in the ESS 2006 data files have the formats Fn.0, i.e. they are of width n and with no decimals. String variables have the formats An, with "n" assigning the number of characters.

The missing values often decide the format. If a routed variable have a scale from 1 to 5, there is room for "Not applicable" in value 6, and the variable will have the format F1.0. If the scale goes up to 6, the missing values have to begin at 66, and the format changes to F2.0.

C4. Variable names

The principles of variable definitions are bound by two factors: the limitations in statistical packages and the concern for user-friendly metadata. These factors limit the length of variable documentation included in the data files.

The CCT has decided to use *mnemonic* variable names in the data files. The argument is that about half of the questionnaire (the Core) will be replicated in coming rounds of the ESS, and that we foresee the replication of rotating modules later on. By using mnemonic variable names, different

data files will contain the same variable names for identical questions, making it easier for the users as well as the producers of series of cross-sectional surveys.

To ensure consistency in variable names, NSD has set up an internal guideline for abbreviations of frequently used concepts and words in questionnaires. The table below gives one example:

Concept	Abbreviation
Police	PLC
:	:
Trust	TRST/TST

Thus, question B6, "Trust in the police" becomes TRSTPLC.

In many statistical packages, the upper limit of variable names is eight characters. In order to allow for versions of a variable, the limit in ESS is seven characters, leaving space for documenting new versions of the variable with characters (A, B, C, etc.) as suffix. For example, between ESS round 1 and 2 the variable WRKCTR "Employment contract unlimited or limited duration" was changed to WRKCTRA, due to a new category that was added.

C5. Variable labels and categories

The most commonly used statistical packages allow for up to 255 characters in variable labels, but in the ESS data files variable labels will be limited to approximately 70 characters. One reason is that the user should be able to grasp the content "in one glance"; another reason is the formatting of outputs from the statistical packages.

For the same reasons, categories (value labels) are limited to approximately 40 characters.

D. Standards and classifications

The ESS Archive web site at <http://essdata.nsd.uib.no/> contains all coding standards and coding frames not documented in the source questionnaire or in the Data Protocol. All verbatim recorded questions *except F53 and F59* (see section E1.5) have to be post-coded according to international standards found on the ESS Archive web site. In addition, some questions with country-specific design and categories have to be recoded into a common ESS coding frame.

The coding frames available on the ESS Archive web site are compiled for use by the ESS 2006. They will remain fixed for the 2006 survey, and they are to be considered as the *only valid standards* to be used.

D1. International standards

International standards have to be used in the post-coding of certain questions:

D1.1 ISO 3166-1, Country

C27: CTZSHIPA "CITIZENSHIP"

C29: CNTBRTHA "COUNTRY OF BIRTH"

C34: FBRNCNT "COUNTRY OF BIRTH, FATHER"

C36: MBRNCNT "COUNTRY OF BIRTH, MOTHER"

Format: A2

Comment: Standard also used in ESS2. The documents for download from the ESS Archive web site also includes five transitional code elements added by NSD: "01" for DDR, "02" for USSR, "03" for Czechoslovakia, "04" for Yugoslavia and "05" for East Timor.

D1.2 ISO 639-2, Language

C31: LNGHOMA "LANGUAGE MOST OFTEN SPOKEN AT HOME: FIRST MENTIONED"

LNGHOMB "LANGUAGE MOST OFTEN SPOKEN AT HOME: SECOND MENTIONED"

I7: INTLNG "INTERVIEW QUESTIONNAIRE LANGUAGE"

Format: A3

Comment: Standard also used in ESS2. To simplify the coding of question C31, the most common language(s) in a country can be listed for each of the two items, and if necessary be recoded into the three-character ISO 639-2.

Example: In Slovenia, the answer "Slovenian" can be marked by a tick in the questionnaire, and then registered as "slv" or "1" ("1" later to be recoded to "slv" before deposit).

D1.3 ISCO88 (com), Occupation

F22–F24: ISCOCO "OCCUPATION, ISCO88 (COM)"

F39–F41: ISCOOP "OCCUPATION PARTNER, ISCO88 (COM)"

Format: F5.0 (4-digit coding of occupations, missing values having the format F5.0)

Comment: Standard also used in ESS2. The ESS 2006 questionnaire includes three questions to be used in the post-coding of occupation: title, description of work and qualifications needed (F22-F24 resulting in ISCOCO for respondent, F39-F41 resulting in ISCOOP for partner).

In addition, F15 and F25 should be used in the post-coding of respondent's occupation. These two questions are particularly helpful in the coding of managers in

the ISCO major group 1, distinguishing between large and small enterprises and between industries.

Notes: For an introduction, please read "A Guide for Users" (Elias and Birch 1994), available at the ESS Archive web site through "Standards for post coded variables". This does also apply to countries already familiar with the ISCO (com). Every country must ensure that the national coding frame and transition table comply with the standard found on the ESS Archive web site. The value labels/formats files described in section G can be used to check for compliance with the standard.

The ISCO (com) standard includes codes on 1, 2, 3 and 4 digit levels, while the variables in the data file should have categories on four-digit level only (except Armed forces, code 100). Where no distinction is made below the level of major, sub-major or minor group, a corresponding four-digit category should be achieved by the addition of trailing zeros (see Elias and Birch, p. 13). For example, if occupation is registered as 11 (Legislators and senior officials), the value in the data file should be 1100.

D1.4 NACE Rev.1.1 (2-digit version), Industry

F25: NACER11 "INDUSTRY, NACE REV.1.1"

Format: F3.0 (2-digit coding of industry, missing values having the format F3.0)

Comment: Standard also used in ESS2.

D2. ESS Coding frames

Common ESS coding frames apply to the following questions:

D2.1 Coding frame - Religion

C18: RLGDNM "RELIGION OR DENOMINATION BELONGING TO AT PRESENT"

C20: RLGDNME "RELIGION OR DENOMINATION BELONGING TO IN THE PAST"

Comment: Coding frame also used in ESS2. See ESS Archive web site

D2.2 ESS Coding frame (modified ISCED-97) - Education

F6: EDULVL "HIGHEST LEVEL OF EDUCATION"

Comment: Coding frame also used in ESS2. Countries should use the best possible nationally designed question(s) to establish the respondent's highest level of education. The data should then be re-coded into the common coding frame. See ESS Archive web site.

Notes: National measurements must when necessary be adjusted to ensure complete coverage of relevant categories in EDULVL.

Please read the UNESCO's Operational Manual (which can be downloaded from the ESS Archive web site) before re-coding.

F36: EDULVLP "PARTNER'S HIGHEST LEVEL OF EDUCATION"

F49: EDULVLF "FATHER'S HIGHEST LEVEL OF EDUCATION"

F55: EDULVLM "MOTHER'S HIGHEST LEVEL OF EDUCATION"

Comment: The categories of the questions about highest level of education for respondent's partner and parents in the source questionnaire are identical with the ESS coding frame for the respondent. Countries can use the frame as it is, but are strongly recommended to use national categories and to re-code these into the frame, the same way it was done for respondent's education.

E. Country-specific, identification and administrative variables

E1. Country-specific variables

E1.1 Naming and use of suffix

Country-specific variables are marked with the suffix xx in the variable name. Whenever a country-specific variable is included in a national data file, the xx suffix in the variable name should be substituted by the two-character country code of ISO 3166-1. Country specific variables in ESS3 are:

PRTVTxx (B12), (PRTVxx1- PRTVxxN if more than one national election)
PRTCLxx (B20b)
PRTMBxx (B22)
EDLVxx (F6)
REGIONxx

Table E1. Country codes for countries in ESS 2006 (including possible participants):

Austria	AT	Luxembourg	LU
Belgium	BE	Netherlands	NL
Bulgaria	BG	Norway	NO
Cyprus	CY	Poland	PL
Czech Republic	CZ	Portugal	PT
Denmark	DK	Romania	RO
Estonia	EE	Russia	RU
Finland	FI	Slovakia	SK
France	FR	Slovenia	SI
Germany	DE	Spain	ES
Greece	GR	Sweden	SE
Hungary	HU	Switzerland	CH
Iceland	IS	Ukraine	UA
Ireland	IE	United Kingdom	GB
Israel	IL	Turkey	TR
Italy	IT		

Example: In section F of the Data Protocol and in the SPSS and SAS programmes available at the ESS Archive web site, the variable name of country-specific highest level of education (question F6) is EDLVxx. The country-specific variables on respondent's highest level of education in Slovakia and Portugal should be renamed EDLVSK and EDLVPT, respectively.

The categories of the country-specific variables should be in English, but can be documented in the original languages in the National Technical Summary. The National Technical Summary should include a short description of the electoral system, political parties, the education system and properties of the variable REGIONxx (see section H).

Any change in country specific variables from ESS round 2, extra categories etc., should be documented in the National Technical Summary.

E1.2 Political party

B12: PRTVTxx "PARTY VOTED FOR IN LAST NATIONAL ELECTION"

PRTVxx1 "PARTY VOTED FOR IN LAST NATIONAL ELECTION 1"

PRTVxxN "PARTY VOTED FOR IN LAST NATIONAL ELECTION N"

Please use country-specific categories in English.

These items need to be country-specific due to differences in electoral and party systems between countries. There will be two main groups of countries using different principles of organising the data:

i. Only one single vote registered.

ia. Countries where only one national-level election takes places.

Comment: None

ib. Countries where multiple national-level elections take place.

Comment: Please ask about the last election for the **primary legislative assembly**.

⇒ **Principle 1.** Countries belonging to group i. rename PRTVTxx, and use their national list of parties as categories. PRTVxx1 – PRTVxxN are **not** included in these data files.

ii. Two or more votes registered.

ii.a. Countries where voters have **more than one vote for the same assembly** (e.g. parallel and mixed member proportional systems; double ballot systems)

Comment: Please ensure that both/all votes are supplied.

ii.b. Countries using **preferential systems** (e.g. Single Transferable Vote or Alternative Vote).

Comment: Please provide first and second preference vote.

⇒ **Principle 2.** Ranking of votes possible: These countries use the variables PRTVxx1 – PRTVxxN to register the N votes. PRTVTxx is derived from PRTVxx1 – PRTVxxN, and provided with a label documenting that the variable is derived from these variables. The national lists of parties are used as categories.

⇒ **Principle 3.** Ranking of votes **not** possible: Please use the variables PRTVxx1 – PRTVxxN to register the N votes and add their national list of parties as categories. The variable PRTVTxx is **not** included in these data files.

The overview below sums up the principles:

Number of votes registered	Ranking of votes/preference	
	Possible	Not possible
Only one	Principle 1. Only PRTVTxx included	
Two or more	Principle 2. PRTVTxx (derived) and PRTVxx1 – PRTVxxN included	Principle 3. Only PRTVxx1 – PRTVxxN included

B20b: PRCLxx "WHICH PARTY FEEL CLOSER TO"

B22: PRMBxx "MEMBER OF WHICH PARTY"

Please use country-specific categories in English.

E1.3 Education

F6: EDLVxx "HIGHEST LEVEL OF EDUCATION, [COUNTRY]"

Please provide the country-specific variable on respondent's highest level of education if possible. Only one country-specific variable is allowed in the integrated data file. If more than one country-specific variable is needed, the variables will be made available from a separate country specific file for [COUNTRY]. Please use country-specific categories in English.

All country-specific variables in the ESS main questionnaire and documented in the Data Protocol are to be included in File 1 (see section F1).

E1.4 Region

REGIONxx "REGION"

This variable is not derived from the questionnaire but should be included in File 1 (see section F1).

The units in REGIONxx should meet the following demands:

1. They should be units where it is possible to attach contextual data (from national records/registers).
2. The net sample of the geographical units must be representative and large enough for statistical analysis. Alternatively, please document how units can be grouped to fulfil this requirement in the National Technical Summary.
3. The population of each unit has to be large enough to ensure anonymity of respondents.

All countries listed in table E1 on page 13, *except Ukraine and Russia* are included in the Nomenclature of Territorial Units for Statistics (NUTS), established by Eurostat, see

http://ec.europa.eu/comm/eurostat/ramon/nuts/codelist_en.cfm

Countries included in the NUTS should use a level (or a grouping of a level) from NUTS in REGIONxx.

E1.5 Other country-specific measurements

F32: HINCTNT "HOUSEHOLD'S TOTAL NET INCOME, ALL SOURCES"

Where necessary, the measurement of F32 will be in national currency. The corresponding amounts to Euro, rounded up or down as appropriate should then be inserted in Show card 53. The conversion rate has to be documented in the National Technical Summary, by the formula
€1 = [national currency] x.xx.

The intervals of the categories in CARD 53 are:

CARD 53				
YOUR <u>HOUSEHOLD</u> INCOME				
Show card code	Approximate WEEKLY	Approximate MONTHLY	Approximate ANNUAL	Data file code
J	Less than €40	Less than €150	Less than €1800	01
R	€40 to under €70	€150 to under €300	€1800 to under €3600	02
C	€70 to under €120	€300 to under €500	€3600 to under €6000	03
M	€120 to under €230	€500 to under €1000	€6000 to under €12000	04
F	€230 to under €350	€1000 to under €1500	€12000 to under €18000	05
S	€350 to under €460	€1500 to under €2000	€18000 to under €24000	06
K	€460 to under €580	€2000 to under €2500	€24000 to under €30000	07
P	€580 to under €690	€2500 to under €3000	€30000 to under €36000	08
D	€690 to under €1150	€3000 to under €5000	€36000 to under €60000	09
H	€1150 to under €1730	€5000 to under €7500	€60000 to under €90000	10
U	€1730 to under €2310	€7500 to under €10000	€90000 to under €120000	11
N	€2310 or more	€10000 or more	€120000 or more	12

F53 and **F59**. The main questionnaire includes questions about father's and mother's occupation when respondent was 14 years old (F53 and F59). These verbatim recorded questions are not required to be post-coded, but the answers should be registered as they are (in original language) in a separate text file to be archived at NSD (see section F.5).

E2. Respondent identification number and country

IDNO "RESPONDENT'S IDENTIFICATION NUMBER"

Identifies the respondent uniquely in the national data files.

CNTRY "COUNTRY"

The categories of the variable are the two-character country codes in ISO 3166-1. In the Polish data file, for example, the variable will have the value "PL" for all respondents. Please see table E1 on page 13 for the codes of countries (possibly) participating in ESS 2006.

To be included in **all** data files (see section F).

IDNO and CNTRY together uniquely identify the respondent in the integrated data files. By sorting integrated data files by CNTRY IDNO (in that order) and thereafter using CNTRY IDNO (in that order) as “key” or “by” variables in match/merge statements, the match/merge will be correct.

E3. Administrative variables

Start of interview, main questionnaire (sections A-F):

INWDDS “START OF INTERVIEW, DAY OF MONTH”

INWMMS “START OF INTERVIEW, MONTH”

INWYYS “START OF INTERVIEW, YEAR”

INWSHH “START OF INTERVIEW, HOUR”

INWSMM “START OF INTERVIEW, MINUTE”

End of interview, main questionnaire (sections A-F):

INWDDE “END OF INTERVIEW, DAY OF MONTH”

INWMME “END OF INTERVIEW, MONTH”

INWYYE “END OF INTERVIEW, YEAR”

INWEHH “END OF INTERVIEW, HOUR”

INWEMM “END OF INTERVIEW, MINUTE”

To be included in File 1 (see table F.1i).

Administration of Supplementary questionnaire:

SPLTADMB “ADMINISTRATION OF SPLIT BALLOT AND MTMM”

The variable will identify in which design the respondent participated.

To be included in File 1 (see table F.1i).

Date of completion of Supplementary questionnaire (sections G and H):

SUPQDD “DAY OF MONTH, SUPPLEMENTARY QUESTIONNAIRE”

SUPQMM “MONTH, SUPPLEMENTARY QUESTIONNAIRE”

SUPQYR “Year, SUPPLEMENTARY QUESTIONNAIRE”

To be included in File 1 (see table F.1i).

F. Variable definitions and flowchart

Tables F1.a-i, F2 and F.3 document the official formats and contents of the variables in the ESS 2006 data files. The tables document the question number, the variable label, format and categories of each variable. The last column has information about skips, coding standards etc. Please use the tables, the flowchart in section F.4 and the source questionnaires simultaneously when setting up national questionnaires and data programmes.

F5. File 4: Parents' occupation

The main questionnaire includes questions about father's and mother's occupation when the respondent was 14 years old (F53 and F59). These verbatim recorded questions are not required to be post-coded, but the answers should be registered as they are (in original language) in a separate text file to be archived at NSD.

The text file (ascii) can have different formats, but must contain IDNO "RESPONDENT'S IDENTIFICATION NUMBER" and CNTRY "COUNTRY". Two examples of file formats:

Tab delimited format

The file has one record per respondent, IDNO<tab>CNTRY<tab>F53<tab>F59<ctrl-If>

Record delimited format

The file has three records per respondent, the first record with fixed format
IDNO (Fn.0) CNTRY (A2)<ctrl-If>F53<ctrl-If>F59<ctrl-If>

F6. Variable list, file 1 - 3

File 1: Main and supplementary questionnaires

IDNO	Respondent's identification number
CNTRY	Country
TVTOT	A1 TV watching, total time on average weekday
TVPOL	A2 TV watching, news/politics/current affairs on average weekday
RDTOT	A3 Radio listening, total time on average weekday
RDPOL	A4 Radio listening, news/politics/current affairs on average weekday
NWSPTOT	A5 Newspaper reading, total time on average weekday
NWSPPOL	A6 Newspaper reading, politics/current affairs on average weekday
NETUSE	A7 Personal use of internet/e-mail/www
PPLTRST	A8 Most people can be trusted or you can't be too careful
PPLFAIR	A9 Most people try to take advantage of you, or try to be fair
PPLHLP	A10 Most of the time people helpful or mostly looking out for themselves
POLINTR	B1 How interested in politics
POLCMPL	B2 Politics too complicated to understand
POLDCS	B3 Making mind up about political issues
TRSTPRL	B4 Trust in country's parliament
TRSTLGL	B5 Trust in the legal system
TRSTPLC	B6 Trust in the police
TRSTPLT	B7 Trust in politicians
TRSTPRT	B8 Trust in political parties
TRSTEP	B9 Trust in the European Parliament
TRSTUN	B10 Trust in the United Nations
VOTE	B11 Voted last national election
PRTVTxx	B12 Party voted for in last national election, [country]
PRTVxx1	B12 Party voted for in last national election 1, [country]
PRTVxx2	B12 Party voted for in last national election 2, [country]
CONTPLT	B13 Contacted politician or government official last 12 months
WRKPRTY	B14 Worked in political party or action group last 12 months
WRKORG	B15 Worked in another organisation or association last 12 months
BADGE	B16 Worn or displayed campaign badge/sticker last 12 months
SGNPTIT	B17 Signed petition last 12 months
PBLDMN	B18 Taken part in lawful public demonstration last 12 months
BCTPRD	B19 Boycotted certain products last 12 months
CLSPRTY	B20a Feel closer to a particular party than all other parties
PRTCLxx	B20b Which party feel closer to, [country]
PRTDGCL	B20c How close to party
MMBPRTY	B21 Member of political party
PRTMBxx	B22 Member of which party, [country]
LRSCALE	B23 Placement on left right scale
STFLIFE	B24 How satisfied with life as a whole
STFEEO	B25 How satisfied with present state of economy in country
STFGOV	B26 How satisfied with the national government
STFDEM	B27 How satisfied with the way democracy works in country
STFEDU	B28 State of education in country nowadays
STFHLTH	B29 State of health services in country nowadays
GINCDIF	B30 Government should reduce differences in income levels
FREEHMS	B31 Gays and lesbians free to live life as they wish
PRTYBAN	B32 Ban political parties that wish overthrow democracy
SCNSENV	B33 Modern science can be relied on to solve environmental problems
EUFTF	B34 European Union: European unification go further or gone too far
IMSMETN	B35 Allow many/few immigrants of same race/ethnic group as majority
IMDFETN	B36 Allow many/few immigrants of different race/ethnic group from majority
IMPCNTR	B37 Allow many/few immigrants from poorer countries outside Europe
IMBGECO	B38 Immigration bad or good for country's economy
IMUECLT	B39 Country's cultural life undermined or enriched by immigrants
IMWBCNT	B40 Immigrants make country worse or better place to live
HAPPY	C1 How happy are you
SCLMEET	C2 How often socially meet with friends, relatives or colleagues
INMDISC	C3 Anyone to discuss intimate and personal matters with

SCLACT	C4 Take part in social activities compared to others of same age
CRMVCT	C5 Respondent or household member victim of burglary/assault last 5 years
AESFDRK	C6 Feeling of safety of walking alone in local area after dark
BRGHMWR	C7 How often worry about your home being burgled
BRGHMEF	C8 Worry about home burgled has effect on quality of life
CRVCTWR	C9 How often worry about becoming a victim of violent crime
CRVCTEF	C10 Worry about becoming victim of violent crime has effect on quality of life
TRRENYR	C11 How likely terrorist attack in Europe during next twelve months
TRRCNYR	C12 How likely terrorist attack in country during next twelve months
TRRPRSN	C13 Terrorist suspect in prison until police satisfied
TRRTORT	C14 Torture in country never justified even to prevent terrorist attack
HEALTH	C15 Subjective general health
HLTHHMP	C16 Hampered in daily activities by illness/disability/infirmity/mental problem
RLGBLG	C17 Belonging to particular religion or denomination
RLGDNM	C18 Religion or denomination belonging to at present
RLGBLGE	C19 Ever belonging to particular religion or denomination
RLGDNME	C20 Religion or denomination belonging to in the past
RLGDGR	C21 How religious are you
RLGATND	C22 How often attend religious services apart from special occasions
PRAY	C23 How often pray apart from at religious services
DSCRGRP	C24 Member of a group discriminated against in this country
DSCRRC	C25 Discrimination of respondent's group: colour or race
DSCRNTN	C25 Discrimination of respondent's group: nationality
DSCRRLG	C25 Discrimination of respondent's group: religion
DSCRRLG	C25 Discrimination of respondent's group: religion
DSCRRLG	C25 Discrimination of respondent's group: language
DSCRETN	C25 Discrimination of respondent's group: ethnic group

REFVIS2	Number of visit at which a refusal occurred (2)
REFVIS3	Number of visit at which a refusal occurred (3)
RERSA1_1	Reason for refusal (1_1)
RERSA1_2	Reason for refusal (1_2)
RERSA1_3	Reason for refusal (1_3)
RERSA1_4	Reason for refusal (1_4)
RERSA1_5	Reason for refusal (1_5)
RERSA2_1	Reason for refusal (2_1)
RERSA2_2	Reason for refusal (2_2)
RERSA2_3	Reason for refusal (2_3)
RERSA2_4	Reason for refusal (2_4)
RERSA2_5	Reason for refusal (2_5)
RERSA3_1	Reason for refusal (3_1)
RERSA3_2	Reason for refusal (3_2)
RERSA3_3	Reason for refusal (3_3)
RERSA3_4	Reason for refusal (3_4)
RERSA3_5	Reason for refusal (3_5)
COOP1	Estimation of the cooperation rate at refvis1
COOP2	Estimation of the cooperation rate at refvis2
COOP3	Estimation of the cooperation rate at refvis3
AGER	Estimation of the age of respondent, by interviewer
GENDERR	Gender of the respondent recorded by interviewer
OUTINELI	Outcome ineligible
TYPE	Type of house respondent lives in
PHYS	Physical state of the buildings and dwellings in the area
LITTER	How common is litter or rubbish lying around the immediate area
VANDA	How common is vandalism, graffiti or deliberate damage to property

G. Programmes for applying Data Protocol variable names, labels and categories

To assist the data producers, and ensure data to be as consistent and harmonised as possible, NSD offers SPSS and SAS programmes with the official ESS variable names, labels, categories and formats. The variable labels in the programmes include the question numbers to facilitate cross-references between the questionnaires and the variables. The programmes can be downloaded from the “Data protocol and variable definitions” page on the ESS Archive web site at <http://essdata.nsd.uib.no>. Please apply the Data Protocol variable names, labels and categories to the data files before you submit them to the archive. The package of programmes includes the following syntax/dictionary files:

SPSS

ESS3ms.sps	Main and supplementary questionnaires, syntax
ESS3ms.sav	Main and supplementary questionnaires, dictionary, SPSS Windows 12-14
ESS3ms.por	Main and supplementary questionnaires, dictionary, SPSS portable file
ESS3i.sps	Interviewer's questionnaire, syntax
ESS3i.sav	Interviewer's questionnaire, dictionary, SPSS Windows 12-14
ESS3i.por	Interviewer's questionnaire, dictionary, SPSS portable file
ESS3cf.sps	Contact forms, syntax
ESS3cf.sav	Contact forms, dictionary, SPSS Windows 12-14
ESS3cf.por	Contact forms, dictionary, SPSS portable file
ESS3standards.sps	Value labels for international standards in ESS (see section D1).
ESS3RenameQtM.sps	Renaming variables in the Core, rotating modules and Interviewer's questionnaire from question numbers to ESS mnemonic names, syntax.

SAS

ESS3ms.sas	Main and supplementary questionnaires, syntax
ESS3ms.sas7bdat	Main and supplementary questionnaires, dictionary, SAS Windows 8-9
ESS3ms.exp	Main and supplementary questionnaires, dictionary, SAS portable file (proc cport)
ESS3i.sas	Interviewer's questionnaire, syntax
ESS3i.sas7bdat	Interviewer's questionnaire, dictionary, SAS Windows 8-9
ESS3i.exp	Interviewer's questionnaire, dictionary, SAS portable file (proc cport)
ESS3cf.sas	Contact forms, syntax
ESS3cf.sas7bdat	Contact forms, SAS Windows 8-9
ESS3cf.exp	Contact forms, SAS portable file (proc cport)
ESS3formats.sas	Definition of formats, all data files
ESS3standards.sas	Formats for international standards in ESS (see section D1).
ESS3RenameQtM.sas	Renaming variables in the Core, rotating modules and Interviewer's questionnaire from question numbers to ESS mnemonic names, syntax.

Comment to ESS3standards.*: If the survey organisation does not have procedures for automatic checking of wild codes in the variables

CTZSHIPA “CITIZENSHIP”

CNTBRTHA “COUNTRY OF BIRTH”

LNGHOMA “LANGUAGE MOST OFTEN SPOKEN AT HOME: FIRST MENTIONED”

LNGHOMB “LANGUAGE MOST OFTEN SPOKEN AT HOME: SECOND MENTIONED”

FBRNCNT “COUNTRY OF BIRTH, FATHER”

MBRNCNT “COUNTRY OF BIRTH, MOTHER”

ISCOCO “OCCUPATION, ISCO88 (COM)”

NACER11 “INDUSTRY, NACE REV.1.1”

ISCOCOP “OCCUPATION PARTNER , ISCO88 (COM)”

the value labels/formats in ESS3standards.* can be added to File 1 to facilitate proof-reading (spotting empty labels in frequency tables).

H. National technical summary

The meta data documentation is an important part of the high quality ESS data and represents one of the major strengths of the European Social Survey. The National Teams have a central role in the production of such documentation by providing the National Technical Summary (NTS).

For those who have access to the fully licenced Adobe Acrobat program, NSD has made an electronic National Technical Summary Form in PDF format, for the teams to download, fill in and deposit to the ESS Archive at NSD along with the other electronic deliverables. The form is available for download from the "Survey documentation" page at the ESS Archive web site <http://essdata.nsd.uib.no/>.

NSD encourages the use of the PDF electronic form. For users who do not have access to a fully licenced Adobe Acrobat, a version is also available in Word format.

Please save the National Technical Summary file as Ntech2006xx, where xx is the country code as specified in table E1 on page 13.
