**TAIWAN 2006**

Geographical scope:

Taiwan

Principal investigator(s):

Professor Tu, Su-hao And Professor Yun-han Chu Center for Survey Research RCHSS Academic Sinica Taipei, Taiwan E-mail: suhao@gate.sinica.edu.tw Professor Yin-hwa Chang (head of WVS group) E-mail: ethwa@sinica.edu.tw Cheng-tian Kuo Professor and Chairman, Political Science Department National Chengchi University #64, Sec. 2, Zhinan Road, Taipei, Taiwan 116. 886-2-2939-3091 ex 50770 (O), 886-2-2939-0201 (fax) ctkuo@nccu.edu.tw

Data Collection Organization:

Center for Survey Research

Fieldwork Period:

06-05-2006 - 06-07-2006.

Universe:

National Population, Both sexes, 18 and more years

Sample size:

1227

Estimated Error:

2,9

Questionnaire:

Mandarin, Taiwanese, or Hakka Some variables are not included : 1 . Dropped questions are V50-V54, V165-V167, V178, V210-214. 2 . Questions with minor changes are as follows: V255, V256, V257, V259. Reason(s) why missing: 1 . These variables doesn't fit our context. 2 . V255 is based on the size of Primary Sampling Unit (PSU) represented by ZIP code. Data transformation will be used to produce this variable. V256 is changed based on ethnicity on Taiwan. V216a is added and put next to V216. V257 is changed based on V255 to categorize PSU. V259 will be created during data analysis.

Sample:

(1) variable is based on the cluster analysis of six variables including the percentage of the population (a) in commercial sectors, (b) in industry sectors, (c) aged 15-64, (d) aged 65 or more, (e) graduated from college or higher, and (f) density in 355 townships on Taiwan during 2000 or 2004. (2) Seven strata were originally derived and representing certain degree of urbanization (3) This survey combines the strata of the lowest two levels of urbanization sampling because the number of

township in these strata is very small. Three-stage stratified sampling: First stage, PSU = Township using PPS Administrative district under township= village or precinct (Li) using PPS Registered, named individuals, using systematic sampling

#### Remarks about sampling:

A non-response bias comes from the use of household registration data in which some household members in fact do not live in the household. upper age cut-off : 85 We sent postal cards to all sampled individuals (for advance contact). Telephone contacts were conducted in three phases of interview: 1. 30% of the respondents were back-checked by supervisors 2. 20% of the respondents interviewed by supervisors were back-checked by senior supervisors. 3. 90% of all respondents were contacted for clarifying certain items in the questionnaires by research assistant of the project.

#### Survey procedure:

Mixed

#### Response rate:

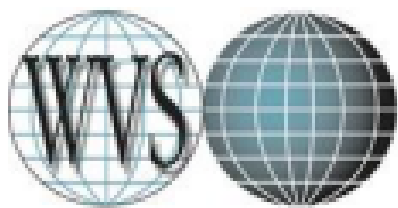

2874 A Total issued (total sample) 90 B Ineligible (address vacant, wrong ages,...) 2784 C (= A - B) Total eligible (in scope sample) 1225 D Total WVS questionnaires received 1559 E - (= C - D; = F + G + H) Total non-response 429 F Refusals (refusing to take part) 1076 G Non-contact (never contacted) 54 H Other non-response

#### Remarks about non-response:

Population registers (about 9 percents of the sampled individuals dont live at their registered address) interviewer answer the questions illegally, the respondents were not the sampled units, the questionnaires were temporarily lost.

#### Weighting:

Yes The data was weighted using an iterative proportional raking scheme. For each respondent, sample data was weighted by sex, age, area and education degree groups. Weights were then generated to match the population of Taiwan area.
