Fieldwork Period:

01-06-2006 - 31-10-2006.

Universe:

National Population, Both sexes, 16 and more years

Sample size:

2015

Estimated Error:

2,2

Sample:

In order to pick a sample of people living in cities and villages, the stages for sampling selection are:

1. First stage: We begin with selecting a sample of provinces (the primary sampling units are provinces). Because of different numbers of population between Java and Out of Java, we use sample fraction, where 6 provinces for Java and 4 provinces for Out of Java. 2. Second stage: Select a sample of Regencies or Districts within the provinces selected in the first stage (the second-stage sampling units are Regencies or Districts). 3. Third stage: Select a sample of municipalities and sub-districts within the Regencies or Districts selected in the second stage (the third-stage sampling units are Municipalities or sub-districts). 4. Fourth stage: Select a sample of Village within municipalities and sub-districts selected in the third-stage (the fourth-stage sampling units are Village), 5. Fifth stage: Select a sample of blocks within the selected Villages in the fourth-stage 6. Sixth stage: Select a sample of people within the selected families (Households). Provinces, Regencies/Districts, Municipalities/Sub-districts, Villages, Blocks and families (Households) are all clusters of elementary units and are also elements of populations from which samples are selected. In this case, we refer to all such sampling plans as multi-stage sampling units.

Remarks about sampling:

The elements of the population from which we select the sample are called sampling units. The

elements of the sample selected initially are clusters, and a subsample is taken from the selected sampling units or as first-stage sampling units. In this case, we shall concern only on probability samples. For each province, in urban areas there are 100 respondents who divided into 50 males and 50 females, and in rural areas there are 100 respondents who divided into 50 males and 50 females. By random sampling, within 30 provinces, 10 provinces are selected; they are Lampung, Banten, Jakarta, West Java, Central Java, Jogjakarta, East Java, South Kalimantan, West Nusa Tenggara and Central Sulawesi. Central Sulawesi and West Nusa Tenggara are the longest distance from Jakarta. Respondent is a member of family in a household. Respondents are divided into sex and ages. Sex category is a female and a male (50 % : 50%) who are different ages. The groups of age are 16-29, 30-49, and 50-more than 50.

Survey procedure:

Personal Face to Face Interview

**V48.-** Now I would like to ask you something about the things which would seem to you, personally, most important if you were looking for a job. Here are some of the things many people take into account in relation to their work. Regardless of whether you're actually looking for a job, which one would you, personally, place first if you were looking for a job (read out and code one answer):

**V92.-** Now, I would like to read some statements and ask how much you agree or disagree with each of these statements. For these questions, a 1 means that you “completely disagree” and a 10 means that you “completely agree.” (Code one number for each statement): Because of science and technology, there will be more opportunities for the next generation.

**V121.-** Now I'd like you to tell me your views on various issues. How would you place your views on this scale? 1 means you agree completely with the statement on the left; 10 means you agree completely with the statement on the right; and if your views fall somewhere in between, you can choose any number in between. (Code one number for each issue): People can only get rich at the expense of others

**V161.-** Many things may be desirable, but not all of them are essential characteristics of democracy. Please tell me for each of the following things how essential you think it is as a characteristic of democracy. Use this scale where 1 means “not at all an essential characteristic of democracy” and 10 means it definitely is “an essential characteristic of democracy” (read out and code one answer for each): Women have the same rights as men.
