INDIA 2006

Geographical scope:

India

Principal investigator(s):

Sandeep Shastri Director and Professor International Academy for Creative Teaching 52 Bellary road, hebbal Bangalore 560 024 INDIA. Tel: +91 8023545246, Fax +91 80 23545247 sshastri@eth.net Pradeep Chhibber Department of Political Science, Haven Hall University of Michigan Ann Arbor, MI 48109 USA F+ 1 313 764 3522 pchhibber@umich.edu

Data Collection Organization:

International academy for creative teaching with Lokniti Network

Fieldwork Period:

01-12-2006 - 31-01-2007.

Universe:

National Population, Both sexes,18 and more years

Sample size:

2001

Estimated Error:

2

Questionnaire:

The questionnaire was translated into ten Indian languages by an expert in survey research techniques . The questionnaire was back-translated into English and pre-tested. Four pre tests were made in each language. Mock interviews were conducted. Feedback secured and corrections if needed made.

Sample:

The survey was conducted in 18 of the 28 states of India and these 18 states account for 97% of the nations population. The survey was undertaken in the same 18 states in the previous round also. It was decided to conduct the survey in 40 sampled Lok Sabha (lower/directly elected house of the Indian Parliament) constituencies. These 40 seats were allotted state wise as per the population of that state. Within a state, the Lok Sabha constituency in which the study was to be undertaken was identified by circular sampling (PPS: Probability Proportion to Size). Every Lok Sabha constituency covers a specified number of Assembly constituencies (lower/directly elected House in the State) and even though the number of Assembly constituencies within a Lok Sabha constituency would vary from state to state, the number is the same within a state. Circular Sampling (PPS: Probability

Proportion to Size) was once again employed. Thus, 80 Assembly Constituencies in 40 Lok Sabha constituencies were selected. Subsequently, a polling booth area in each of the 80 sampled Assembly constituencies was selected by simple circular sampling method. The number of respondents to be interviewed in each state was determined on the basis of the proportion of the states share in the national population. This was equally divided among the polling booth areas that were sampled in a state. The number of respondents in the polling booth area was the same within a state, but varied from state to state. In a polling booth area, the respondents were selected from the electoral rolls (voters list) by circular sampling with a random first number. While drawing up the random list of respondents to be interviewed in every sampled polling booth area, the number of target respondents was increased by nearly 20 %. This was done in view of the fact that the field investigators were required to interview only those respondents whose names were included in the sample list. Replacement was permitted but two factors were specified. The replaced respondent should belong to the same family and gender as the original respondent. The investigators were told to make every effort to interview all those included in the list of respondents. In the event of the investigator not being able to complete an interview, they were asked to record the reason for the same. Such a rigorous method of sampling was followed in order to obtain as representative a national sample as possible. The sample was drawn using multistage stratified random sampling. A four stage stratified random sampling method was used. In the first stage, 40 of the 543 parliamentary constituencies in the country were sampled. The 40 sampled constituency was distributed across the 18 states, with the smallest having at least one. The second stage was the sampling of Assembly constituencies within the parliamentary constituencies. In every state, a certain number of assembly constituencies form part of a parliamentary constituency. In every parliamentary constituency sampled, two assembly constituencies were selected using the stratified random sampling method. In all 80 assembly constituencies were sampled. The third stage of the sampling was the identification of two polling stations areas within each sampled assembly constituency. A total of 160 polling stations were identified. The selection of Polling stations was done by listing all the Pss within the sampled Assembly Constituency in the serial order (as done by the Election Commission) and using a systematic random sampling procedure. The fourth and final stage of sampling was the selection of respondents. The sample was drawn from the latest electoral rolls of the selected polling stations. In every polling station 20/25 names were chosen by circular sampling with a random start. Depending on the number of interviews to be completed in a state, the respondents were asked to complete a minimum number of interviews in each polling booth.

Remarks about sampling:
-Final numbers of clusters or sampling points: 160 clusters -Sample unit from office sampling: Named individual When it was not possible to interview the respondent prescribed substitution was permitted. The rule followed was same family same gender. All; groups were covered. Would have been happier if minorities groups were covered better especially the Muslims

Survey procedure:
Personal Face to Face Interview

Fieldwork:

Face to face interviews with interviewers paid according to their performance. Minimum number of re-calls required:2 15% of interviews were back-checked.

Response rate:

The following table presents completion rate results: -Total number of starting names/addresses 2354 -Addresses which could not be traced at all 56 -Addresses established as empty, demolished or containing no private dwellings 39 -Selected respondent too sick/incapacitated to participate 29 -Selected respondent away during survey period 62 -Selected respondent had inadequate understanding of language of survey 27 -No contact at selected address 76 -No contact with selected person 31 -Refusal at selected address 34 -Full productive interviews 2002.

(N)	(2,001)	(1,137)	(861)	(3)	(446)	(984)	(569)	(2)

V46.- Some people feel they have completely free choice and control over their lives, while other people feel that what they do has no real effect on what happens to them. Please use this scale where 1 means "no choice at all" and 10 means "a great deal of choice" to indicate how much freedom of choice and control you feel you have over the way your life turns out (code one number):

India 2006(N=2001)

Comments
4 point scale instead of 10.
Categories:
'None at all' coded as 1.
'Very little' coded as 4.
'A fair amount' coded as 7.
'A great deal' coded as 10.

	TOTAL	Sex			Age			
		Male	**Female**	**No answer**	**Up to 29**	**30-49**	**50 and up**	**No answer**
Not at all	3.7	3.9	3.5	-	2.7	3.9	4.2	-

V170.- I'm going to read out another list of global problems, and goals that world leaders have set to reduce them. Indicate for each of these goals how high a priority your own country's leaders should give to it, using this card. (Read out and code one answer for each goal): About 25 percent of the world's population lives in extreme poverty—that is on less than one dollar per day. The goal is to cut this percentage in half by 2015.

	TOTAL	Sex			Age

V242.- In which profession/occupation are you doing most of your work? If you do not work currently, characterize your major work in the past! What is/was your job there?

India 2006(N=2001)

Comments

It is difficult to match these categories with the official codes. Our proposal is the following:

01 to 09: Higher professionals -> 3 (Professional worker)

10 to 18: Lower professionals -> 3

19 to 28: Managerial, Administrative and Clerical Positions -> 4 (Supervisory)

29 (Big Businessman employing more than 7 people) -> 1 (Employer 10 and more)

30 to 33, 37, 38 (Medium businessman, small, petty shop keepers, Hawkers, Vendors, Rentier and Other businessman) -> 2 (Employer with less than 10)

34 (Sales executives) -> 4 (Supervisory)

35 (Sales persons, home delivery boys) and 36 (Shop assistant, salesman) -> 5 (non-manual - office worker)

39 to 45 (Service) -> 5 (non-manual - office worker)

46 to 54 (Production Skilled Labour) -> 7 (Skilled manual worker)

55 to 60 and 62 -> 8 (Semi-skilled manual worker)
61 -> 9 (Unskilled manual worker)

63 to 69: Owner cultivators -> 10 (Farmer) ???
70 to 72: Plantation workers, agricultural labour, other agricultural workers-> 11 (Agricultural worker)

73 to 78 Farming, Forest produce, Diary farming, Shepherds, Hunters and Trappers -> 10 (Farmer)
79 (Fisherman/Fisherwoman, Other agricultural workers)->11 (Agricultural worker)
81 to 86 (Non worker) -> 13 (Never had a job) ???

V250.- In which profession/occupation does he/she work (or did work)? If more than one job, the main job? What is/was his/her job there?

India 2006(N=2001)

Comments

It is difficult to match these categories with the official codes. Our proposal is the following:

01 to 09: Higher professionals -> 3 (Professional worker)
10 to 18: Lower professionals -> 3
19 to 28: Managerial, Administrative and Clerical Positions -> 4 (Supervisory)
29 (Big Businessman employing more than 7 people) -> 1 (Employer 10 and more)
30 to 33, 37, 38 (Medium businessman, small, petty shop keepers, Hawkers, Vendors, Rentier and Other businessman) -> 2 (Employer with less than 10)

34 (Sales executives) -> 4 (Supervisory)
35 (Sales persons, home delivery boys) and 36 (Shop assistant, salesman) -> 5 (non-manual - office worker)

39 to 45 (Service) -> 5 (non-manual - office worker)

46 to 54 (Production Skilled Labour) -> 7 (Skilled manual worker)
55 to 60 and 62 -> 8 (Semi-skilled manual worker)
61 -> 9 (Unskilled manual worker)

63 to 69: Owner cultivators -> 10 (Farmer) ???
70 to 72: Plantation workers, agricultural labour, other agricultural workers-> 11 (Agricultural worker)

73 to 78 Farming, Forest produce, Diary farming, Shepherds, Hunters and Trappers -> 10 (Farmer)

79 (Fisherman/Fisherwoman, Other agricultural workers)->11 (Agricultural worker)
81 to 86 (Non worker) -> 13 (Never had a job) ???
