Yes → **ANSWER Q33**
No → **GO TO Q34**

IF DATA KEYED

33. Was keying verified?

Yes - please write in approximate level of verification %
No

EVERYONE PLEASE ANSWER

34. Were any reliability checks made on derived variables?

Yes
No

35. Were data checked/edited to ensure that filter instructions were followed correctly?

Yes
No

36. Were data checked/edited for logic or consistency?

Yes
No

37. Were data checked/edited to ensure they fell within permitted coding ranges?

Yes
No

38. Have you answered 'yes' on any or all of questions 32 to 34 above?

Yes → **ANSWER Q39**
No → **GO TO Q40**

IF DATA CHECKED/EDITED

39. Were errors corrected individually or automatically (through, for example, a 'forced' edit)?

Yes - individual correction

Yes - automatic correction

No - not corrected

EVERYONE PLEASE ANSWER

40. Did you add a weight variable?

Yes → ANSWER Q.41

No → SECTION 5

IF WEIGHT VARIABLE ADDED

41. Please describe the weighting or post-stratification strategy used.

Section 5: Characteristics of National Population

45. Each WVS member is asked to provide information on known characteristics of its national population, from census or the best available estimates from government surveys or other high-quality data-sources:

- sex distribution of the population
- age distribution of the population
- education (years of schooling) of the population
- other characteristics (PLEASE SPECIFY)

The last census was implemented in 1989. The Government announces the figure of about 28 mln population and hides the actual number of the residing population as well as its ethnic structure. This figure is based on the registered population, the actual one being about 5.5 mln people less (according to the data obtained from the surveys conducted by our Expert-center) because a great number of labour migrants working in other countries (mostly men). That is why in reality the residential population are about 23 mln with possible significant biases.

Please specify also the sources which have been used. Please note that the number of characteristics is what is minimal required. You can add as many characteristics as you like, but do not forget to specify them.

In the table below please present the information from census or from other government surveys or other high-quality data (column SOURCE 1) and the proportions obtained in your data, before and after weighting
