Questionnaire:

The WVS questionnaire was in Bengali. There have been included some special variable labels such as: V56 Neighbours: People with different religion and V149 Institution: South Asian Association for Regional Cooperation (SAARC). Special categories labels are: V167: Least liked groups; V179: Religion; V203/V204 Geographical affinity; V217 Education. Country Specific variables included are: V208: Ethnic identification; V209: Language at home; V210 to V212: Political Parties; V 227: Family income; V233: Ethnic group; V234: Region and V235: Interview Language. Some variables have been excluded from the WVS: V95,V96,V134,V152,V176,V197,V198, V199,V206,V207,V209,and V236 Reasons for exclusion: V96: The questions could not be used because of social unacceptability V134: Not relevant for Bangladesh V152: this question could not be operationalised for understanding by the respondents V176: Bangladesh doesn't provide aid to any country V199: questions not socially acceptable V207: inadvertently not asked V209: In the National Identity survey, it was found that all in the sample speak Bengali at home. Hence this question was not asked V 236: Could not be operationalised Before launching the survey the questionnaire was pretested, interviewing a number of men and women belonging to various professions in both urban and rural areas and were them adjusted on the basis of the results obtained.

Sample:

The respondents were picked from among voting age men and women, applying a multistage random sampling procedure. The predetermined sample size was first distributed between urban and rural areas on the basis of rural and urban population distribution, giving a slightly higher weightage to the urban areas to reflect the fact that awareness is relatively more widespread in the urban areas. The rural sub-sample was then distributed to 60 districts of the country according to population. (Out of a total of 64 districts, the other four were excluded because of accessibility problem). One thana was chosen from each district randomly and, then, two unions from each of those thanas and two villages from each selected union were picked randomly. The respondents were then randomly identified from those villages. The urban sub-sample was also distributed to various urban areas according to population and, then, the respondents randomly selected for interview. Care was taken to ensure an appropriate representation of men and women. However, the experience has been that because of shyness and relatively lower awareness on the part of some women, male-female ratio in a sample tends to be somewhat higher than in the population in the surveys so far conducted and this was the case with the present survey as well. Only one respondent was interviewed from each household. The respondents include men and women from various professions such as government and private service-holders, teachers, business people, politicians, lawyers, doctors, engineers, industrial labourers, day labourers, farmers and farm workers, housewives, and students.

Survey procedure:

Personal Face to Face Interview

Fieldwork:

The fieldwork dates was done in August, 1996 The interview language was Bengali and English. . During the field work a back-check of about 15 per cent was conducted.

Response rate:

Number of respondents: 1525 Rural 64% Male 55% Urban 36% Female 45%

V237D.- At the end of this interview, we would like to come back to a problem we had touched on earlier. I will read you some goals which different people consider more or less important for this country. Could you please tell me how important you consider each one of these goals to be: would you say it is very important, important, not very important or not at all important for this country? Protecting freedom of speech

Y001.- Materialism/Postmaterialism (12-item index) The MatPMat12 values index used here is created as follows from V104 to V109: V104. People sometimes talk about what the aims of this country should be for the next ten years. On this card are listed some of the goals which different people would give top priority. Would you please say which one of these you, yourself, consider the most important? CODE ONE ANSWER ONLY UNDER "First Choice." V105. And which would be the next most important? CODE ONE ANSWER ONLY UNDER "Second Choice." First ChoiceSecond Choice 1 A high level of economic growth11 Making sure this country has strong defense forces22 *Seeing that people have more say about how things are done at their jobs and in their communities 33 Trying to make our cities and countryside more beautiful 44 Don't know [DO NOT READ OUT] 99 V106. If you had to choose, which one of the things on this card would you say is most important? CODE ONE ANSWER ONLY V107. And which would be the next most important? CODE ONE ANSWER ONLY First ChoiceSecond Choice Maintaining order in the nation11 *Giving people more say in important government decisions22 Fighting rising prices 33 *Protecting freedom of speech44 Don't know [DO NOT READ OUT] 99 V108. Here is another list. In your opinion, which one of these is most important? CODE ONE ANSWER ONLY V109. And what would be the next most important? CODE ONE ANSWER ONLY First ChoiceSecond Choice A stable economy 11 *Progress toward a less impersonal and more humane society22 *Progress toward a society in which ideas count more than money 33 The fight against crime44 Don't know [DO NOT READ OUT] 99 MatPMat12 index is constructed by summing the number of Postmaterialist items chosen as either first or second choice in its group (these five items are designated with an asterisk above). This produces an index that runs from 0 (no Postmaterialist items are given high priority) to 5 (all five Postmaterialist items are given high priority). SPSS code used to build V1000 is as follows: COMPUTE V1001=0. COMPUTE V1002=0. COMPUTE V1003=0. COMPUTE V1004=0. COMPUTE V1005=0. IF (V104=3 OR V105=3) V1001=1. IF (V106=2 OR V106=4) V1002=1. Y003.- Autonomy Index is a computed variable based on the Children qualities battery. It uses only four variables: V22= Children qualities: Religious Faith V24= Children qualities: Obedience V15= Children qualities: Independence V21= Children qualities: Perseverance Only variables with answers to all v22,v24,v15,v21 have an index. The SPSS like formula is: Compute Y003=-5. if v22>=0 and v24>=0 and v15>=0 and v21>=0 then Y003=(v22 + v24)-(v15 +v21).
