TANZANIA 2001

Geographical scope:

Tanzania

Principal investigator(s):

Mari Harris Markinor, POB 213 Pinegowrie 2123 Johannesburg, South Africa T+ 27 11 462 3757 F+ 27 11 789 3764 E MariH@markinor.co.zaDr.

Gaspar K. Munishi Chairman, University Consultancy Board (UCB) Department of Political Science University of Dar es Salaam Dar es Salaam

Tanzania T+ 255 22 2410501 and 255-22-2410395 E munishi@udsm.ac.tz

Data Collection Organization:

University of dar-es-Salaam.

Fieldwork Period:

30-05-2001 - 06-11-2001.

Universe:

National Population, Both sexes, 15 and more years

Sample size:

1171

Estimated Error:

2,9

Questionnaire:

The questionnaire used for Tanzania for the WVS 2001 was the one downloaded from the website titled 1999-2000 World Values Survey Questionnaire, and adapted to the Tanzania operational environment. The WVS questionnaire was translated from the English questionnaire by a member of the research team. The translated questionnaire was not back-translated into English but it was pre-tested. There were some questions that caused problems when the questionnaire was translated especially questions related to: - Happiness because there are different perceptions about it. - Homosexuality was rejected because cause apathy. -Left-right (in politics) not clear in our society. - Income levels- definition. -Class categories because it is not easily understood in places other than urban areas. These problems were solved looking for closest equivalents and it was carefully explained. No country-specific questions were included. A number of questions were omitted because they sounded totally irrelevant for the local population or because previous surveys indicated that they did not work for this population: -For instance, the Ethnic group question was considered irrelevant because officially when one asks for ethnic identity in Tanzania the respondent seems to be evasive because it is negatively associated with tribalism favouring ones narrow/selfish interests and nepotism. Therefore responses would not be categorical and true. -The Region where the interview was conducted. This question was discarded because the Tanzania survey covers the

entire country by sampling out representative districts and respondents by the use of a Table of Random numbers. -Some concepts in the English version could hardly find a relevant equivalent (without distortions) in the language of the interview (Kiswahili). These were therefore omitted. These include some variables: Emotionally unstable people. -Some concepts were irrelevant in Tanzania: e.g. Jews. This category is difficult to identify in Tanzania as it has people too few to be bothered about. This category was however substituted with Christians and Witchdoctors and related labels. - The category known as European Union is irrelevant to Tanzania. The question was adopted and substituted with East African Cooperation. The sample was designed to be representative of the entire adult population, i.e. 18 years and older, of your country. The lower age cut-off for the sample was 18 and there was not any upper age cut-off for the sample.

Sample:

The different stages in the sampling procedure were: -Creation of sample frames of regions districts, wards and cleaned - Creation of sample frames at ward/village level and cleaned -Application of table random numbers to pick respondents -Proportionate-stratified random sampling procedures applied - Face to face questionnaire filling was then done -Each respondent unit was cleaned/edited or clarity done by a supervisor The sampled unit we got from the office sampling was the household combined with named individual and the selection method that was application of table random numbers to locate households obtained at ward (urban areas), village (rural areas) and individuals at office/factories. There were not any quota controls. Substitution was permitted in households: if husband or wife not found in house at times of visit, interview eldest household member beyond 18 years and also substitution was permitted if too many men/women picked, purposively pick more of the opposite sex. The stratification factor that was used: Selecting regions according to income levels (per capita), ethnic concentration, educational levels, Islam vs. Christian areas all to ensure adequate representation.

Remarks about sampling:

-Final numbers of clusters or sapling points: No clusters -Sample unit from office sampling: Household combined with Named Individual

Survey procedure:

Personal Face to Face Interview

Fieldwork:

Interviews were done face to face. The interview language was the Tanzanian linguafranca namely Kiswahili. The reason for the decision was that Kiswahili is spoken by about 90% of the Tanzania population, it is the official language here, and it carries relevant conceptualisation of values content relevant to Tanzania. Interviewers were not paid according to performance. Approximately 70% of the interviews were supervised. Approximately 90% of the interviews were back-checked.

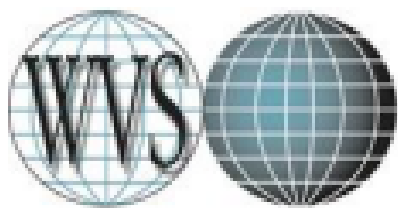

Response rate:

There were some limitations in the sample. The average rate of responses was between 3% and

15% depending on education and occupation types. Also the people in employment had little time and we had to do interviews during the night in some towns.

Weighting:

No weighting variable was added.
