Note for Commodity Specification (2.1): The type and/or brand of the good that should be the one that reflects the local use of the product. If this column is already filled in, then collect the price on the type of item specified in the column. Otherwise, the price should be collected for the type and/or brand of good that is most widely used in the local area. Farm gate price is the price that a farmer gets when selling wheat to a trader or consumer.
