generated_table_list_label_669	14.1 These labels bear the names of 5 courses that many midwives take during their studies. Imagine that, instead of being an already qualified midwife, you were about to begin your midwifery studies right now. I would like you to show me how much you would enjoy studying these courses by distributing these 20 beans between these different labels: the more beans you put on a course the more you think that you would enjoy studying it. For example, if you put 4 beans on one course and only 3 beans on a second one, this indicates that would enjoy studying the first course more than you would enjoy the second one. You can leave labels without beans, you can put all the beans on one label, or you can distribute them as you wish.

note_21aa	Now, we are going to do an exercise where the objective is for you to guess how socially acceptable other midwives will find a certain length of service in a SURE-P primary health centre. In this exercise, you will have the chance to win ₦ 10,000. However, before starting the exercise for real, let me start with an example to make sure that you will know how to do the real exercise later on. You cannot win money for this first example, but you will be able to win it for the ones that come later on. <i>Please take time to explain this to the respondent.</i> <i>Question relevant when: \${mw_phase2_mon} = 1 or \${mw_phase2_non_mon} = 1 or \${mw_phase2_both} = 1 or \${mw_phase2_control} = 1</i>			
note_21ab	The example is the following: Suppose we ask 100 people in your state whether waiting 45 minutes for a taxi in the capital of the state is: a) Very socially inappropriate? b) Somewhat socially inappropriate? c) Somewhat socially appropriate? d) Very socially appropriate? What do you think the most popular answer was? Suppose 60 people say 'b) somewhat socially inappropriate', 30 people say 'a) very socially inappropriate' and 10 people say 'c) somewhat socially appropriate'. The answer 'b) somewhat socially inappropriate' is the most popular in this example. Thus, if this exercise had been for real and you had answered 'b) somewhat socially inappropriate' then you would have guessed the most popular answer. Because you would have guessed correctly, your name would then be put in a bag together with the names of other midwives (in all PHCs) that also answered b). Finally, the name of a midwife would be taken, at random, out of the bag. That midwife (it could be you) would win ₦ 10,000, paid into her bank account. <i>Question relevant when: \${mw_phase2_mon} = 1 or \${mw_phase2_non_mon} = 1 or \${mw_phase2_both} = 1 or \${mw_phase2_control} = 1</i>			
note_21ac1	Now, we start the exercise for real. We will do this exercise in many other primary health centres in the country. Now, we will ask you to guess what your colleague midwives, who work in these primary health centres think about a series of questions described below. Your objective is to guess what the most popular answer is amongst them. In a couple of months, when the answers given by midwives are known, we will select at random one of the situations listed below. If you guess correctly the question which was randomly chosen, your name will be put in a bag together with the names of other midwives that also guessed correctly. Finally, the name of a midwife will be taken, at random, out of that bag. That midwife (it can be you) will win ₦ 10,000, paid into her bank account. This will be paid this in addition to the prizes that you might have won from the other exercises. <i>Question relevant when: \${mw_phase2_mon} = 1 or \${mw_phase2_non_mon} = 1 or \${mw_phase2_both} = 1</i>
