Acknowledgment

The Palestinian Central Bureau of Statistics (PCBS) extends its deep appreciations to all owners and managers of institutions who contributed to the success in collecting the survey data and to all staff who workers in the survey for being well dedicated in performing their duties.

The Economic Surveys Series 2010, has been planned and conducted by a technical team from PCBS and with joint funding by the Palestinian National Authority (PNA) and the Core Funding Group (CFG) for the year 2011 represented by the Representative Office of Norway to PNA and the Swiss Development and Cooperation Agency (SDC).

Moreover, PCBS very much appreciates the distinctive efforts of the Core Funding Group (CFG) for their valuable contribution to funding the project.

Team Work

- **Technical Committee**

Introduction

A comprehensive and detailed statistical database of any economic activity is a prerequisite for planning and policy making and this applies to economic activities that play a major role in most modern world economies.

The Palestinian Central Bureau of Statistics is pleased to issue the sixteenth volume of economic surveys for the Palestinian Territory, including statistical tables of findings. This edition presents the findings of the surveys conducted for 2010 as the reference year and covers most of the economic activities operating in the Palestinian Territory since 1994.

Economic surveys of various fields constitute the basic foundations for the compilation of National Accounts for Palestine. It is hoped that they will also fulfill the various needs and expectations of users in both the public and private sectors.

October 2011

**Ola Awad
President of PCBS**

Chapter One

Main Findings

The main findings of the Economic Survey for 2010 in the Palestinian Territory are as follows:

1.1 Number of Enterprises

The results of the survey show that there were 103,767 enterprises in 2010 in the activities covered in the Palestinian economy. This number was distributed as follows: internal trade activities 58.0%, services activities 25.6%, industrial activities 15.1%, transport and storage activities 0.5%, construction activities 0.4%, and information and communication activities 0.4%.

Percentage Distribution of Operation Enterprises in the Private Sector, Non Governmental Organization Sector in the Palestinian Territory by Economic Activity, 2010

**1.2 Number of Employed Persons**

There were 295,176 workers employed in economic enterprises, distributed as follows: internal trade activities 41.3%, services activities 31.4%, industrial activity 22.2%, construction activities 1.9%, transport and storage activities 1.7%, and information and communications activities, 1.5%.

Percentage Distribution of Employed Persons from Operation Enterprises in the Private Sector, Non Governmental Organization Sector in the Palestinian Territory by Economic Activity, 2010

1.3 Output

The value of output from enterprises was US\$7,365.6 million, distributed by economic activity as follows: industrial activities 36.7%, internal trade activities 30.7%, services activities 17.8%, information and communications activities, 8.0 %, construction activities 5.1%, and transport and storage activities 1.7%.

Percentage Distribution of Output from Operation Enterprises in the Private Sector, Non Governmental Organization Sector in the Palestinian Territory by Economic Activity, 2010

1.4 Value Added

The value added of enterprises was US\$4,932.7 million, distributed by economic activity as follows: internal trade 37.7 %, industrial activities 26.6%, services activities 19.7 %, information and communications activities 10.7 %, construction activities 3.6%, and transport and storage activities 1.7%.

Percentage Distribution of Value Added from Operation Enterprises in the Private Sector, Non Governmental Organization Sector in the Palestinian Territory by Economic Activity, 2010

Chapter Two

Methodology and Data Quality

This chapter describes the questionnaire used in the economic surveys series, the coverage, sampling and implementation stage, and the accuracy of the data for statistical errors and non-statistical errors in all of the survey stages that include data collection and data entry.

2.1 Questionnaire

All of the economic surveys series used the same questionnaire, with a few different characteristics for each survey. The design of the 2010 questionnaire takes into account the major economic variables pertaining to the sector examined and the needs to be met to compile the National Accounts for Palestine.

The questionnaire included these variables:

1. The persons engaged in enterprise and compensation of these employees.
2. Value of output from the main activity and secondary activity.
3. Production inputs of goods and services.
4. Payments and transfers.
5. Taxes on production.
6. Assets and capital formation.

2.2 Coverage and Sampling

2.2.1 Coverage

The sixteenth round of the economic survey series was conducted based on the Establishments Census of 2007. The economic surveys series cover activities in accordance with ISIC-4.

2.2.2 Sample Design

The sample of the economic surveys series is a single-stage stratified random-systematic sample in which the enterprise constitutes the primary sampling unit (PSU). Three levels of strata were used to draw up an efficient representative sample (i.e., economic activity, size of employment and geographical level). The sample size in 2010 was 10,476 enterprises out of the 100,863 enterprises comprising the survey frame.

2.2.3 Implementation Stage

This phase included field work operations, data processing, and tabulation:

- Field work operations: These took place following the recruitment and training of qualified interviewers responsible for data collection from the field.
- Data processing and tabulation: This included:
 - Developing a data entry program and training of data entry clerks
 - Organizing data entry processes
 - Post-data entry editing
 - Tabulation

2.3 Accuracy of the Data

2.3.1. Statistical Errors

The findings of the surveys were affected by statistical errors due to the use of sampling in conducting the surveys for the units of the target population. This increases the chances of

variances occurring from the actual values obtained from comprehensive enumeration. The variance of the key items in the survey was computed and dissemination was carried out on the level of the Palestinian Territory for reasons related to sample design and computation of the variance of the different indicators.

Variance Account of Industry Survey in the Palestinian Territory Level, 2010

Variable	Estimate		Standard Error	CV	95% Confidence interval	
	Unit	Value			Lower	Upper
Number of Employed Persons	Number	65,538	1,640.6	2.5	62,322.8	68,755.2
Output	US\$ 1000	2,700,320.0	89,419.1	3.3	2,524,977.4	2,875,555.6
Gross Value Added	US\$ 1000	1,311,975.0	43,142.6	3.3	1,227,351.5	1,396,497.7
Intermediate Consumption	US\$ 1000	1,388,345.1	56,818.7	4.1	276,959.4	1,499,724.3

Variance Account of Internal Trade Survey in the Palestinian Territory Level, 2010

Variable	Estimate		Standard Error	CV	95% Confidence interval	
	Unit	Value			Lower	Upper
Number of Employed Persons	Number	121,864	4,671.5	3.8	112,711.6	131,027.4
Output	US\$ 1000	2,258,111.1	112,762.6	5.0	2,037,114.2	2,479,214.8
Gross Value Added	US\$ 1000	1,858,777.0	103,547.4	5.6	1,655,842.1	2,061,812.5
Intermediate Consumption	US\$ 1000	399,334.2	18,942.9	4.7	362,203.1	436,471.3

Variance Account of Services Survey in the Palestinian Territory Level, 2010

Variable	Estimate		Standard Error	CV	95% Confidence interval	
	Unit	Value			Lower	Upper
Number of Employed Persons	Number	92,653	1,720.5	1.9	89,279	96,028
Output	US\$ 1000	1,313,798.1	44,012.3	3.4	1,227,473.6	1,400,122.5
Gross Value Added	US\$ 1000	971,215.6	34,809.7	3.6	902,940.9	1,039,490.4
Intermediate Consumption	US\$ 1000	342,582.4	17,506.6	5.1	308,245.5	376,919.4

The tables above illustrate the variation of the most distinct variables for institutions with activities drawn from the sample for the Palestinian Territory, namely industry, internal trade and services. Construction, transport and storage, and communications have no variation because they were subjected to a comprehensive survey. These tables show that there is not a problem in the calculation of variation for the Palestinian Territories as a whole, nor on published levels. There is a high variation in some activities, especially industry and services in terms of the value added, output, and capital formation.

2.3.2. Non-Statistical Errors

These types of error could appear in one or all of the survey stages that include data collection and data entry:

Response rate values:

- Sample size in 2010 was 10,476 enterprises (including change in economic activity) in the Palestinian Territory:
- Non-response cases: 2,547
- Over-coverage cases: 627
- Net sample: $10,476 - 627 = 9,849$
- Response rate: 74%
- Non-response rate: 26%

Response errors: This type of error is related to respondents, fieldworkers, and data entry personnel. To avoid mistakes and reduce their impact, a series of mechanisms were implemented that aimed to enhance the accuracy of the data through the process of data collection from the field and data processing.

2.4 Comparability

Published data in this report are compatible with ISIC-4 on economic activities, whereas previous reports published adhered to ISIC-3 of economic activities.

2.5 Data Quality Control

2.5.1. Fieldwork

- A specialized fieldwork team with a background in economics was selected and, trained theoretically and practically on the surveys' questionnaire.
- The main fieldwork team was selected based on skills acquired from the training course.
- Field work visits were made by both fieldwork and project management staff to monitor and follow up the data collection process and the progress of work. Around 95% of completed questionnaires were reviewed and corrected if needed; comments and notes were directed to the team accordingly.
- Different levels of supervision and monitoring took place according to the following division:
 - Fieldworkers
 - Fieldworkers supervisors
 - Fieldwork coordinator. (Each with monitoring responsibilities.)
- Project management received a daily report on progress and response rates
- A refresher training course was conducted during the stage of data collection to reinforce the main points made in training and to answer questions by fieldworkers about issues faced in the field.
- Some institutions were visited by field workers for a second time to confirm the accuracy of the data obtained in the first interview. These institutions were selected at random by withdrawing a random sample of seven percent of the original sample of the survey and these data were compared with data from the series surveys.

2.5.2 Data Processing

To ensure the quality and consistency of data, a set of measures was introduced as follows:

- Creation of a data entry program prior to the collection of data to ensure this would be ready.
- A set of validation rules were applied to the program to check the consistency of data.

- The efficiency of the program was pre-tested by entering a few questionnaires, including incorrect information, and checking its efficiency in capturing the incorrect information.
- Well-trained data entry personnel were selected and trained for main data entry.
- Weekly data files were received by project management to be checked for accuracy and consistency: correction notes were provided to data entry management for implementation.

2.6 Notes on Data

1. Differences in the results of certain indicators are due to approximation.
2. Some economic activities at second ISIC (two digits) were combined with previous activity to maintain the confidentiality of data in accordance with the Statistics Law of 2000.
3. Financial data were collected in NIS, US \$ and JD, but were converted and published in US \$.
4. There are some zero values, either because such values were low or were unavailable in some enterprises in the selected sample.
5. The services survey covers profit, non-profit enterprises, and output of non-profit enterprises in the National Accounts System 1993 (SNA 93) equal to the value of intermediate consumption and the value of employee compensation, in addition to the value of net taxes and fees on production and the value of depreciation of fixed assets.
6. There was a high percentage of non-response data in Gaza Strip in 2010.
7. The number of enterprises in the economic surveys exceeded the number in the Establishments Register for 2010 because of incomplete updating of the Establishments Register.

- **Exchange rates**

US \$ / NIS = 3.7299

US \$ / JD = 0.7090

Chapter Three

Concepts and Definitions

This chapter defines the concepts used in the preparation of the survey tools on which data collection and processing were based. These concepts and their definitions are based on international recommendations in the fields of economic statistics and national accounts, while taking into consideration the particular aspects of the Palestinian Territory.

Statistical Unit:

An economic entity that is capable, in its own right, of owning assets, incurring liabilities, and engaging in economic activities and transactions with other entities.

Employed Persons:

Males and females working in the enterprise, including owners, self-employed, unpaid family members, or waged workers who receive their compensations in cash or in kind during a specific reference period. However, this term does not include trainees, those on assignments outside the enterprises, or on long unpaid leave.

Output:

This is the value of the final products of goods and services produced by an establishment, which is used by other units as self-consumed or for the purposes of self gross fixed capital formation. Production includes two categories: Final products and the so-called under operating products. Production can be classified as follows: market outputs, outputs of private account, and other non-market outputs.

Intermediate Consumption:

The value of the goods and services consumed as inputs and used or transformed during the production process. It is measured during a specific period in time in a way similar to measuring production. Intermediate consumption is estimated by purchase price, which is defined as the producers' price plus transportation and wholesale and retail trade margins. The value of gross intermediate consumption with respect to the total economy is the same whether calculated by purchase or producers' price. However, on a detailed level, the two evaluations vary.

Value Added:

Value added is a central concept of production and refers to the generated value of any unit that carries out any productive activity. Gross value added is defined as the value of gross production less the value of intermediate consumption.

Compensation of Employees:

Compensation of employees is the total remuneration, in cash or in kind, including social security contributions, payable by an enterprise to an employee in return for work done by the latter.

Taxes on Product:

These are taxes that are compulsory cash or in kind payments payable by producers to the general government. They consist of taxes on products payable on goods and services for production, sale, or exchange and other taxes payable on production by resident producers as a result of carrying out the production process.

Assets:

These are tangible or intangible (computer software, artistic, original) and are an output of the production process. They are used frequently or continuously in other production processes for longer than a one-year period.

Depreciation:

This is the value of the assets which can be reproduced and depreciated during the year: depreciation is calculated on the current substitutive value.

Operating Surplus:

Value added minus compensation of employees, plus net taxes on production, minus subsidies and custom fees, plus depreciation.

Gross Fixed Capital Formation:

The gross fixed capital formation of an institutional unit or sector is measured largely by the value of its acquisitions, less disposals of new or existing fixed assets. Disposals do not include consumption of fixed capital. Fixed assets consist of tangible or intangible assets that have come into existence as outputs from processes of production and that are themselves used repeatedly or continuously in other processes of production over periods of time of more than one year.

Main Economic Activity:

This is the main work of the enterprise based on the (ISIC, rev4) and that contribute to the large proportion of the value added, whenever more than one activity exists in the enterprise.

Calculation of Statistical Indicators:

1. Compensation per wage employee = $\frac{\text{Compensation of Employees}}{\text{Wage Employees}}$
2. Output per employed person = $\frac{\text{Output}}{\text{Employed Persons}}$
3. Output per wage employee = $\frac{\text{Output}}{\text{Wage Employees}}$
4. Value added per employed person = $\frac{\text{Value Added}}{\text{Employed Persons}}$
5. Value added per wage employee = $\frac{\text{Value Added}}{\text{Wage Employees}}$
6. Value added to output = $\frac{\text{Value Added}}{\text{Output}} \times 100$
7. Compensation to value added = $\frac{\text{Compensation of Employees}}{\text{Value Added}} \times 100$
8. Depreciation to output = $\frac{\text{Annual Depreciation}}{\text{Output}} \times 100$
