TITLE
Protection Profiling and Monitoring 2022, May-Dec

COUNTRY

Name	Country code
Belarus	BLR

STUDY TYPE
Other Household Survey [hh/oth]

ABSTRACT
To strengthen and promote an evidence-based protection response, UNHCR and its partners have been implementing a protection monitoring exercise since May 2022 to regularly collect and analyze data about the profiles, needs and intentions of refugees from Ukraine and monitor changes over time. The exercise covers the following countries that have received refugees from Ukraine: Belarus, Bulgaria, Hungary, Republic of Moldova (5,035), Poland, Romania and Slovakia.

The protection monitoring involves household-level interviews conducted at border crossing points, reception and transit centres, collective sites, and assistance points in major cities using a structured questionnaire. Trained enumerators from UNHCR and partners collect data in face-to-face interviews. While respondents are randomly selected to reduce bias, the sample is considered a non-probability sample and results should be considered indicative, meaning they cannot be extrapolated to the population of refugees from Ukraine. The result reflects the refugees' situation and intentions at the time of data collection.

This dataset includes 1,409 household interviews conducted in Belarus between May and September 2022. It is an anonymous version of the original data collected and used for the primary analysis.

KIND OF DATA
Sample survey data [ssd]

UNIT OF ANALYSIS
Households

Version

VERSION DESCRIPTION
Version 2.1: Edited, cleaned and anonymised data.

VERSION DATE
2022-02-03

Scope

NOTES
The scope of the protection monitoring includes:
- household demographics
- refugee origin and movement
- specific vulnerabilities
- documentation
- return intentions and concerns
- information needs
- communication channels

TOPICS

Topic
Protection
Legal Assistance/Protection
Return
Basic Needs
Solutions
