TITLE
Results Monitoring Survey 2022

COUNTRY

Name	Country code
Kyrgyz Republic	KGZ

STUDY TYPE
Socio-Economic/Monitoring Survey [hh/sems]

ABSTRACT
The UNHCR Results Monitoring Survey (RMS) is a household-level survey on persons of concern (PoC) to UNHCR directly or indirectly assisted by UNHCR, including refugees and asylum seekers, internally displaced persons, returnees, stateless and others of concern. The objective of the survey is to monitor impact and outcome level indicators on education, healthcare, livelihoods, protection concerns, shelter, and water and sanitation. The results contribute to an evidence base for reporting against UNHCR's multi-year strategies to key stakeholders.

The RMS can be implemented in any operational context. A standard structured questionnaire has been developed for the RMS, which can be conducted as a stand-alone survey or flexibly integrated with other data collection exercises. The data includes indicators collected at both the household and individual (household-member) level, and results are statistically representative.

KIND OF DATA
Sample survey data [ssd]

UNIT OF ANALYSIS
Households and individuals

Version

VERSION DESCRIPTION
Version 2.1: Edited, cleaned and anonymised data.

VERSION DATE
2023-02-28

Scope

NOTES
Kyrgyzstan used a lighter version of the standard RMS questionnaire. It covers:
1. Household composition and documentation
2. Access to and utilization of healthcare
3. Education
4. Employment and income generation

TOPICS

Topic
Health and Nutrition
Health

Education
Income Generation
Livelihood and Social cohesion
