ABSTRACT
More than 900,000 Rohingya refugees are living in extremely congested camps in Cox's Bazar, Bangladesh. Since their arrival in Bangladesh, they have been dependent on humanitarian aid for their survival, including food, core-relief items, shelter and other basic services. Having provided households with initial shelter kits upon arrival, UNHCR is now supporting families providing the necessary materials to maintain their shelters and cover basic needs. From January to August 2022, UNHCR distributed Upgraded Shelter Kits (USKs) consisting of muli-type2 and borak-type* bamboo poles, rope, plastic tarpaulins, sandbags and toolkits. UNHCR conducts Post Distribution Monitoring (PDM) to collect refugees' feedback on the quality, sufficiency, utilization, and effectiveness of the assistance we provide, which helps improve and adapt the services as per the refugees' needs. UNHCR undertook a PDM to monitor this programme in Bangladesh in month YYYY. The PDM involved a mixed-methodology incorporating both qualitative and quantitative methods. This data is the anonymous version of the qualitative data collected using a structured household-level questionnaire.

Sampling

SAMPLING PROCEDURE

UNHCR generated samples for each camp based on their records of households having access to shelter distributions in 2022. The samples are stratified at camp level, achieving a 95% confidence level and 10% margin of eror; when all camps are aggregated the margin of error is less than 3%. Each camp was sampled with a 30% buffer of eligible households, to account for non-response or inelgible households. The shelter post-distribution monitoring survey will consist of a minimum of 1451 surveys.

WEIGHTING

Design weights were assigned based on probability of selction per camp.
