TITLE
STEPwise Survey for Non Communicable Diseases Risk Factor 2013

COUNTRY

Name	Country code
Mongolia	MNG

STUDY TYPE
Other Household Survey [hh/oth]

SERIES INFORMATION
This is the third STEPS conducted by Mongolia.

ABSTRACT
STEPS is a household-based survey to obtain core data on the established risk factors that determine the major burden of NCDs.

KIND OF DATA
Sample survey data [ssd]

UNIT OF ANALYSIS
Individuals

Version

VERSION DESCRIPTION
Public-use dataset

Scope

NOTES
The following topics were included in the survey: tobacco use, alcohol consumption, diet, physical activity, history of raised blood glucose, history of raised blood pressure, history of raised total cholesterol, history of cardiovascular diseases, lifestyle advice and women's health. Additionally, the following measures were taken: blood pressure, height, weight, waist circumference, hip circumference, heart rate, fasting blood glucose, total cholesterol, triglycerides, HDL cholesterol, LDL cholesterol, urinary sodium and urinary creatinine. Finally, the following optional modules were included: oral health, violence and injury and health care.

Sampling

SAMPLING PROCEDURE
A multi-stage stratified sampling process was carried out to randomly select participants from the target population.. One individual within the age range of the survey was selected per household. Please refer to page 32 of report for further information.

RESPONSE RATE
The overall response rate was 97.4%.

WEIGHTING

Analysis weights were calculated by taking the inverse of the probability of selection of each participant. These weights were adjusted for differences in the age-sex composition of the sample population as compared to the target population.

Different weight variables are available per Step:
wStep1 - for interview data
wStep2 - for physical measures
wStep3 - for biochemical measures
This allows for differences in the weight calculation for each Step of the survey as the age-sex composition of the respondents to each Step can differ slightly due to refusal or drop out. Additionally, some countries perform subsampling for Step 2 and/or Step 3. When no subsampling is done and response rates do not differ across Steps of the survey, the 3 weight variables will be the same.
