## Sampling

### SAMPLING PROCEDURE

GYTS uses a global standardized methodology that includes a two-stage sample design with schools selected with a probability proportional to enrollment size. The classes within selected schools are chosen randomly and all students in selected classes are eligible to participate in the survey.

Abuja: A total of 580 students aged 13-15 in Junior Secondary 2 and 3, and Senior Secondary 1 completed the survey.

Cross River State: A total of 349 students aged 13-15 in Junior Secondary 2 and 3, and Senior Secondary 1 completed the survey.

Ibadan: A total of 318 students aged 13-15 in Junior Secondary 2 and 3, and Senior Secondary 1 completed the survey.

Kano: A total of 420 students aged 13-15 in Junior Secondary 2 and 3, and Senior Secondary 1 completed the survey.

Lagos: A total of 712 students aged 13-15 in Junior Secondary 2 and 3, and Senior Secondary 1 completed the survey.

### RESPONSE RATE

Abuja: The overall response rate was 84.8%.

Cross River State: The overall response rate was 96.0%.

Ibadan: The overall response rate was 70.0%.

Kano: The overall response rate was 54.0%.

Lagos: The overall response rate was 89.1%.

### WEIGHTING

The weighting formula used is:

$$W=W1 * W2 * f1 * f2 * f3*f4$$

The list below shows what each variable in the formula represents.

W1 - The inverse of the probability of selecting the school

W2 - The inverse of the probability of selecting the class within the school

f1 - a school-level nonresponse adjustment factor calculated by school size category (small, medium, large)

f2 - a class adjustment factor calculated by school

f3 - a student-level nonresponse adjustment factor calculated by class

f4 - a post stratification adjustment factor calculated by gender and grade
