Nigeria	NGA

STUDY TYPE

Enterprise Survey [en/oth]

ABSTRACT

Women entrepreneurs in Nigeria face higher barriers than men do to access finance, especially in providing traditional forms of collateral for loans, since most assets that lenders accept are typically registered to men. The Nigeria We-Fi project aims to address key constraints faced by women in the access to credit by facilitating the development and delivery of innovative credit products and supporting capacity building for women-led SMEs.

This impact evaluation will measure the impact of an innovative credit product designed to surmount longstanding collateral constraints faced by women entrepreneurs by using cash flow to determine credit worthiness. It will also measure the impact of tailored outreach campaigns by banks to reach women entrepreneurs. Since evidence of the impact of large, flexible-collateral loans for women entrepreneurs is limited globally, this innovative pilot also has the potential to inform broader We-Fi programming and credit interventions for women entrepreneurs.

As part of a proof-of-concept pilot study, this baseline survey was conducted from August – December 2021 on a sample of 214 business owners across four states in Nigeria: Abuja, Lagos, Oyo, and Port Harcourt.

The instrument was designed to collect enterprise and household level data from the sampled male and female enterprise owners that have been approved for a cashflow based loan at their place of business. Survey topics include (i) household demographics, (ii) business activities and ownership, (iii) access to finance (iv) entrepreneurs' characteristics, and (v) intra-household dynamics.

KIND OF DATA

Sample survey data [ssd]

UNIT OF ANALYSIS

Households, individuals, and enterprises in Abuja, Lagos, Oyo and Port Harcourt states of Nigeria.

Sampling

SAMPLING PROCEDURE

The baseline sample is comprised of 214 enterprise owners within Abuja, Lagos, Oyo, and Port Harcourt states in Nigeria. In partnership with Access Bank PLC, the sample was defined by identifying Access Bank business banking customers who had recently applied and were pre-approved for a Cashflow business loan. Baseline surveys were conducted on a rolling basis, as newly approved Cashflow business loans were being processed by account officers and credit analysts.

Data collection

DATES OF DATA COLLECTION

Start	End	Cycle
2021-08-01	2021-12-31	Baseline

DATA COLLECTION MODE

Face-to-face [f2f]

DATA COLLECTION NOTES

The main mode of data collection was the use of a structured questionnaires. In some cases, there were open ended questions to which the respondent could provide their answers. In many cases however the respondent was provided with coded response options from which to choose. These questionnaires were administered by enumerators who visited the businesses at a time convenient for the participating enterprise owners.

questionnaires

QUESTIONNAIRES

The data consists of responses from SME owners to questions pertaining to (i) business ownership and firm performance; (ii) access to finance; (iii) noncognitive skills; (iv) women empowerment and intra-household bargaining; and (v) individual and household income. The questionnaire is provided for download.
