TITLE
COVID-19 LAC High Frequency Phone Surveys 2022

ABBREVIATION OR ACRONYM
COVID-LAC 2022

COUNTRY

Name	Country code
Suriname	SUR

STUDY TYPE
Socio-Economic/Monitoring Survey [hh/sems]

SERIES INFORMATION

This is a follow-up initiative to three waves of high-frequency phone survey (HFPS) data collection that occurred in 2020 in 13 countries (Phase 1) and another two waves of data collection in 2021 in 24 countries (Phase 2). A single wave was collected for Suriname in July 2022.

ABSTRACT

After implementing Phase 1 of the High-Frequency Phone Survey (HFPS) project in Latin America and The Caribbean in 2020, the World Bank conducted Phase 2 in 2021 to continue to assess the socio-economic impacts of the COVID-19 pandemic on households. The Phase 2, conducted in partnership with the UNDP LAC Chief Economist office, included two waves. Wave 1 covering 24 countries. Wave 2 collected between October and December 2021, covering 22 countries. Of these countries, 13 participated in Phase 1: Argentina, Bolivia, Colombia, Costa Rica, Chile, Dominican Republic, Ecuador, El Salvador, Guatemala, Honduras, Mexico, Paraguay and Peru. Countries that joined in Phase 2 are: Antigua & Barbuda and Brazil (only in Wave 1), Belize, Dominica, Guyana, Haiti, Jamaica, Nicaragua, Panama, St. Lucia and Uruguay. A single wave was collected for Suriname in July 2022. The COVID-19 LAC HFPS for Suriname provides information on the welfare impacts that households experienced with respect to food insecurity, changes in employment, income changes, access to health and education services, and coping mechanisms, among other topics.

KIND OF DATA
Sample survey data [ssd]

UNIT OF ANALYSIS
Households, adult individuals (18 years of age and older), children 0-5 years old, and children 6-17 years old.

Version

VERSION DESCRIPTION
version 2.1: Edited, anonymous dataset for public distribution.

VERSION DATE
2023-10-12

Scope

NOTES

The COVID-19 LAC HFPS for Suriname provides information on the welfare impacts that households experienced with respect to food insecurity, changes in employment, income changes, access to health and education services, and coping mechanisms, among other topics.

Sampling

SAMPLING PROCEDURE

The size of the selected global sample of telephone numbers for the Suriname survey was based on the previous procedures carried out in phase 1 of HFPS . Please see Sampling Design and Weighting document for Suriname for more detail on sampling procedures.

WEIGHTING

The Suriname HFPS has three units of analysis: households, adult individuals (18 years of age and older), children 0-5 years old, and children 6 through 17 years of age. Weights were computed for each sample unit and should be used according to the estimate of interest.

The weighting process for Suriname involved five steps:

1. Calculation of the inclusion probabilities of cell phone numbers.
2. Computation of design weights for households and individuals.
3. Weighting of data on children & adolescents.
4. Nonresponse adjustment.
5. Weight trimming and recalibration.

For a detailed description, see the sample design and weighting procedures for Suriname.

Data collection

DATES OF DATA COLLECTION

Start	End
2022-07-08	2022-07-27

DATA COLLECTION MODE

Computer Assisted Telephone Interview [cati]

SUPERVISION

The World Bank team was in charge of all supervision activities.

DATA COLLECTION NOTES

Call backs were made from July 27, 2022 until July 29, 2022.

questionnaires

QUESTIONNAIRES

Questionnaires are available for download in English, Dutch, and Sranan Tongo.
