STUDY TYPE

Labor Force Survey [hh/lfs]

SERIES INFORMATION

This survey is the third in the series of surveys conducted by the Department of Census and Statistics under the National Household Sample Survey Programme. First in the series was the Labour Force and Socio Economic Survey -1980/81. The second is the Survey of Household Economic Activities - 1984/85. The Labour Force and Socio-Economic Survey - 1985/86 will provide comprehensive information on labour force characteristics, income and expenditure. additional background information on demographic characteristics of the population was also collected as such information is needed to analyse the labour force, income and expenditure data.

ABSTRACT

The Labour Force and Socio Economic Survey - 1985/86 provides comprehensive information on labour force characteristics, Income and Expenditure and additional background information on demographic characteristics of the population.

The information on labour force are generally used to :

- (1) to study the situation and trends in employment, unemployment and under employment.
- (2) to quantify the magnitude and distribution of employment opportunities at any point of time or over a given period of time.
- (3) to monitor the performance of employment programmes and of the economy in general.
- (4) to evaluate the impact of such programmes on unemployment and under employment, income and the satisfaction of the basic needs.

The information on income and expenditure usually serve the one or more of the following objectives.

- (a) To obtain weights and other useful data for planning, price collection or the construction or revision of consumer price indexes.
- (b) To supply basic data needed for policy making in connection with social and economic planning and to facilitate determination of needs or the establishment of targets.
- (c) To provide data for assessing the impact on household living conditions of existing or proposed economic or economical measures, particularly changes in the

structure of household expenditures and in household consumption.

(d) To provide data for estimating the redistributive effects of direct and indirect taxation and of a wide range of social benefits, on the situations of the various types of family.

(e) To analyse the variations in levels of living over a periods of years and the disparities among households in socio-economic groups, geographic areas urban, rural and estates sector etc;

(f) To supplement the data availability for use in compiling official estimates of household accounts in the system of national accounts and balances.

(g) To furnish data on the distribution of household income and expenditure.

KIND OF DATA

Sample survey data [ssd]

UNIT OF ANALYSIS

Individuals from the population aged 10 years or more

Version

VERSION DESCRIPTION

v1.0: Full edited dataset, original version for internal DPD use.

VERSION DATE

2008-10-17

VERSION NOTES

v1.0: Full edited dataset, original version for internal DPD use.

Scope

NOTES

The scope of LES 1985/86 includes the following key sections:-

- 1). Identification Information & Control Data
- 2). Personal Characteristics
- 3). Persons 10 years and over
- 4). Persons age 5-14
- 5). Persons age 15-29
- 6). Persons age 15-49
- 7). Income Part 1
- 8). Other Cash
- 9). Income in kind
- 10). Monthly rental value
- 11). Income from non agricultural activities
- 12). Income from agricultural activities
- 13). Income from other agricultural activities
- 14). Expenditure
- 15). Household expenditure - housing, fuel and lighting
- 16). Expenditure of boarders, lodges etc;

Coverage

GEOGRAPHIC COVERAGE

The survey will cover all the district in Sri Lanka.

UNIVERSE

Working age population (10 years and above) living in the non-institutional households in Sri Lanka

Producers and sponsors

PRIMARY INVESTIGATORS

Name	Affiliation
Department of Census and Statistics	Ministry of Finance and Planning

Sampling

SAMPLING PROCEDURE

Sample Design

Sample design is stratified two stage design. The first step was to define the sampling domains, for each of which an estimate desired. It was decided that the final estimates are required at district level and at the same time by sectors at all island level. In addition to this, separate estimates are required for large cities such as Colombo M.C., Dehiwala -Mt.Lavania M.C. and Kotte U.C. A total sample of 25,000 housing units were decided, to have 1000 housing units for each district on the average.

Stratification

Each domain for which separate estimates are required were made a separate stratum. As such each sector within each district is a separate stratum, in addition to the three large urban cities.

Stages

„A two stage design is adopted, first stage units (PSU) being the Cens blocks prepared for 1981 Census of population and the second stage units (SSU) being the housing units. It was decided to select 10 housing units from each. selected Census Block. Thus a first stage sample of 2500 census blocks have to be selected from entire island.

DEVIATIONS FROM THE SAMPLE DESIGN

Non completion schedules in Vavuniya, Trincomalee and Kilinochchi district were high due to the disturbances.

RESPONSE RATE

The response rate at all island level was 96.4%.

Data collection

DATES OF DATA COLLECTION

Start	End
1985-04-01	1986-03-31

DATA COLLECTION MODE

Face-to-face [f2f]

SUPERVISION

The District S.Os were instructed to choose 10 housing units at random from 5 different blocks, surveyed by 5 different Statistical Investigators for re-interviewing. Households in the housing units so selected were re-interviewed by the S.O. for selected questions of the survey schedule.

In the instances where the responses so obtained were different from the original responses, they were entered in the schedule so that these entries could be clearly distinguished from those recorded at the initial interview. A summary report of his findings were sent to the Sample Survey Division each month. In this manner, weaker Statistical Investigators in performing field work were identified and were given instructions if it seemed necessary.

DATA COLLECTION NOTES

Approximately 250 Statistical Investigators, who belong to the permanent field staff of the Department of Census and Statistics were primarily involved in the listing operation prior to the survey proper, and in the survey data collection operation itself. Each S.I. is in charge of all statistical activities in an administrative geographical unit called an Assistant Government Agent Division (A.G.A. Division). Each administrative district comprises of number of such A.G.A. Divisions and there are altogether 256 A.G.A. Divisions in Sri Lanka (in the 25 administrative districts). These officers were given a thorough training before they were entrusted with the said survey operations. In each district there is a Statistical Officer (S.O.) who is in charge of the statistical activities in the district and one of his main functions is to supervise the work of the Statistical Investigators. The functions of the Statistical Investigators in the field for this survey were

(a) Updating the lists of housing units of the selected blocks (PSU's) and preparation of listing forms (LFSE- L) as described in Part 1-3. (sample design and estimation procedure).

(b) Interviewing the households in the selected housing units.

A special feature in the interviewing process of the Labour Force and SocioEconomic Survey - 1985/86 was that, it was necessary for a Statistical Investigator to make at least three visits to each household allocated for him for the survey enumeration. This procedure was sq. adopted to enable each S.I. to collect reliable information on daily consumption expenditure on Food, Drink & Tobacco, for seven consecutive days, as required 'in the sub-section 4.1.01 of the survey schedule (see annexure for the schedule). On his first visit he was expected to collect necessary information under this sub-section corresponding to the day prior to the day 'of first visit, which we may refer to as the first day of the seven consecutive days. He was expected to make his second visit to the same household on the third day after the day of first visit. On this visit he could collect the information necessary under this sub-section for the second, third and the fourth days of the seven consecutive days. On his third visit to the household which would take place on the third day after the day of the second visit he could collect the information necessary under the same sub-section for the fifth, sixth and the seventh days of the seven consecutive days. Investigators were expected to cover-up the other sections of the schedule also, during the time of these three visits.

questionnaires

QUESTIONNAIRES

The survey schedule which was canvassed to households comprised of four sections. The first page of the schedule collected the identification information of the household giving the District, Electorate, Assistant Government Agent's division, Grama Sevaka division and if situated in an -urban sector, the name of the M.C., U.C. or T.C. and if in the Rural or Estate sector name of the village or estate respectively. The census block number to which the household belongs and the number of households within that housing unit were also recorded.

In the control data section, information was sought on the date of visit to household,

result of the visit and the time taken to fill the schedule on each visit. The total number of visits made by an interviewer to a household was expected to be not more than six. visits. A code indicates the result of the visit in the following manner_: completed - 1, partly completed - 2, no competent respondent at home - 3, refused - 4, household is temporarily closed - 5 house is demolished - 6 or any other reason under 'other' - 7. These data not only control the flow of the schedules, as a schedule had to be completed at least up to the control data for each of the selected households, but also enable to compute the different non-response rates such as refusal rate, demolished cases etc.

The four major sections of the schedule are the Section 1, which deals with demographic characteristics of the household members, Section 2, which deals with the labour force which consists of persons 10 years and over, and supplementary questions in respect of children aged 5-14 years, youths aged 15-29 years and women in the age group 15-49, Section 3 deals with all sources of income received by the household members and Section 4 deals with the household expenditure incurred during different reference periods.

data_processing

DATA EDITING

All completed schedules were subject to a comprehensive manual editing operation by a well trained group of officers at the Sample Survey Division. At this stage, schedules were checked for the skip pattern, impossible entries, unreasonably large values and also for internal consistency. The relevant field officers were contacted to get the necessary adjustment!; done, if it seemed necessary. Coding of the responses, to the questions which were not in the precoded form, was also done simultaneously with the editing operation.

Most of the edits performed manually were incorporated in the computer edits and the data was 'thoroughly, cleaned before the working master files were created. The computer edit consisted of three parts.. ,

- (a) structural edit
- (b) range edit
- (c) edits for internal consistency, between and within sections

data_appraisal

ESTIMATES OF SAMPLING ERROR

Estimation Procedure of Sampling Error is given the Preliminary Report.

The Preliminary Report is attached in the external resources section.

CONFIDENTIALITY

Under the Statistical ordinance, micro data cannot be released with identifications for public use. Procedures are in place to ensure that information relating to any particular individual person, household or undertaking will be kept strictly confidential and will not be divulged to external parties. Information on individual or individual Household/establishment will not be divulged or published in such a form that will facilitate the identification of any particular person or establishment as the data have been collected under the Census/Statistical ordinance, according to which the information at individual level cannot be divulged and such information is strictly confidential.

ACCESS CONDITIONS

The dataset has been anonymized and is available as a Public Use Dataset. It is accessible to all for statistical and research purposes only, under the following terms and conditions:

1. The data and other materials will not be redistributed or sold to other individuals, institutions, or organizations without the written agreement.
2. The data will be used for statistical and scientific research purposes only. They will be used solely for reporting of aggregated information, and not for investigation of specific individuals or organizations.
3. No attempt will be made to re-identify respondents, and no use will be made of the identity of any person or establishment discovered inadvertently.
4. No attempt will be made to produce links among datasets provided by the Department or among data from the Department and other datasets that could identify individuals or organizations.
5. Any books, articles, conference papers, theses, dissertations, reports, or other publications that employ data obtained from the Department will cite the source of data in accordance with the Citation Requirement provided with each dataset.
6. An electronic copy of all reports and publications based on the requested data will be sent to the Department

The following rules apply to micro data released by the Department of Census and Statistics.

- Only the requests of Government Institutions, Recognized Universities, Students, and selected international agencies are entertained. However, the Data users are required to strictly adhere to the terms stipulated in the agreement form.
- All the data requests should be made to Director General (DG) of the DCS as the sole authority of releasing data is vested with the DG, DCS. DCS of Sri Lanka reserves sole right to approve or reject any data request made depending on the confidential nature of the data set and intended purpose of the study or analysis.
- Requests for micro data should be made through the agreement form designed by DCS for this purpose (Form D.R.1). The agreement form should be filled in triplicate and the Study/project proposal should accompany the filled agreement form. If requests are made for the micro data of more than one survey, a separate agreement should be signed.
- If the data request is from a student a letter from the respective Dept. Head/Dean/Supervisor, recommending the issue of data, should also be accompanied.
- If the request is approved only 25% of the data file is released at the first stage. The release of the total data file is considered only after reviewing the draft report prepared on the basis of the 25% sample data file.
