Overview

ABSTRACT

The Living Conditions Monitoring Survey conducted in 2002/2003 was a nation-wide survey. The sample design and sample size used in the survey allow for reliable estimates at province, location (Rural/Urban) and national levels.

The main objectives of the LCMSIII Survey are to:

- Monitor the impact of Government policies, programs and donor support on the well being of the Zambian population
- Monitor and evaluate the implementation of some of the programs envisaged in the Poverty Reduction Strategy Paper (PRSP)
- Monitor poverty and its distribution in Zambia
- Provide various users with a set of reliable indicators against which to monitor development
- Provide province specific poverty profiles using different poverty lines
- Identify vulnerable groups in society and enhance targeting in policy formulation and implementation
- Provide data required for developing new national and province specific weights for the Consumer Price Index (CPI)
- Provide data required for estimating Gross Domestic Products? (GDP) household final consumption

The Living Conditions Monitoring Survey 2002/2003 collected data on the living conditions of households and persons in the areas of education, health, economic activities and employment, child nutrition, death in the households, income sources, income levels, food production, household consumption expenditure, access to clean and safe water and sanitation, housing and access to various socio-economic facilities and infrastructure such as schools, health facilities, transport, banks, credit facilities, markets, etc.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

- Households
- Individuals

Scope

NOTES

The scope of the LCMSIII survey in terms of topics covered was to a large extent guided by the ZAMSIF supported User-Producer committee recommendations. As such, the survey only included extended components of agreed upon topics of policy relevance. In broad terms, the survey included: -

- (i) A set of core living conditions indicators to be monitored over a period of twelve months and
- (ii) The household budget component to be implemented over a period of twelve months.

To achieve the above stated tasks, the LCMSIII main questionnaire was made of two distinct parts.

Part I of the main questionnaire covered the following topics: -

- Demography and migration
- Orphanhood
- Health
- Education
- Current economic activities and labor force
- Child Health Care and Nutrition
- Household amenities and housing conditions
- Household access to facilities
- Household assets
- Self-assessed poverty and household coping strategies, and
- Household food production

Part II of the main questionnaire covered the following topics: -

- Household expenditure
- Household Income
- Household Non-Farm Enterprises, and
- Deaths in the Household

The information on household expenditure and consumption was collected using a diary and then transferred to the main questionnaire part II. In addition to the household questionnaire, the LCMSIII survey also collected community price information using a community price questionnaire. The price data is relevant for adjusting household expenditure data for differences in cost of living both in time and space.

Coverage

GEOGRAPHIC COVERAGE

The survey has a nationwide coverage on a sample basis. It covers both rural and urban areas in all the nine provinces. Hence it draws a very big sample size of about 19,600 households.

UNIVERSE

The eligible household population consisted of all households. Excluded from the sample were institutional populations in hospitals, boarding schools, colleges, universities, prisons, hotels, refugee camps, orphanages, military camps and bases and diplomats accredited to Zambia in embassies and high commissions. Private households living around these institutions and cooking separately were included such as teachers whose houses are within the premises of a school, doctors and other workers living on or around hospital premises, police living in police camps in separate houses, etc. Persons who were in hospitals, boarding schools, etc. but were usual members of households were included in their respective households. Ordinary workers other than diplomats working in embassies and high commissions were included in the survey also. Others with diplomatic status working in the UN, World Bank etc. were included. Also included were persons or households who live in institutionalized places such as hostels, lodges, etc. but cook separately. The major distinguishing factor between eligible and non eligible households in the survey is the cooking and eating separately versus food provided by an institution in a common/communal dining hall or eating place. The former cases were included while the latter were excluded.

Sampling

Sampling Procedure

The Living Conditions Monitoring Survey III (LCMSIII) was designed to cover 520 Standard Enumeration Areas (SEAs) or approximately 10,000 non-institutionalized private households residing in both the rural and urban areas of all the nine provinces in Zambia. The survey was carried out for a period of 12 months using a rolling sample. For the purposes of this survey, a survey reference month had 36 days instead of 30 or 31 days, as is the case with calendar months. This implies that the 360 days in a year were divided into 10 cycles of 36 days each. As a result 52 SEAs, which is one-tenth of the 520 SEAs, were covered every cycle countrywide.

Sample Stratification and Allocation

The sampling frame used for LCMSIII survey was developed from the 2000 census of population and housing. The frame is administratively demarcated into 9 provinces, which are further divided into 72 districts. The districts are further subdivided into 155 constituencies, which are also divided into wards. Wards consist of Census Supervisory Areas (CSA), which in turn embrace Standard Enumeration areas (SEAs). For the purposes of this survey, SEAs constituted the ultimate Primary Sampling Units (PSUs).

In order to have equal precision in the estimates in all the provinces and at the same time take into account variation in the sizes of the provinces, the survey adopted the Square Root sample allocation method, (Lesli Kish, 1987). This approach offers a better compromise between equal and proportional allocation methods in terms of reliability of both combined and separate estimates. The allocation of the sample points (PSUs) to rural and urban strata was almost proportional. The allocated provincial samples were multiples of 10 so as to facilitate the rolling of equal samples during the 10 cycles of data collection.

Sample Selection

The LCMSIII survey employed a two-stage stratified cluster sample design whereby during the first stage, 520 SEAs were selected with Probability Proportional to Estimated Size (PPES). The size measure was taken from the frame developed from the 2000 census of population and housing. During the second stage, households were systematically selected from an enumeration area listing. The survey was designed to provide reliable estimates at provincial, residential and national levels.

Selection of Standard Enumeration Areas (SEAs)

Please see section 2.5.3 of the Survey Report in External Resources

Selection of Households

The LCMSIII survey commenced by listing all the households in the selected SEAs. In the case of rural SEAs, households were stratified and listed according to their agricultural activity status. Therefore, there were four explicit strata created in each rural SEA namely, the Small Scale Stratum (SSS), the Medium Scale Stratum (MSS), the Large Scale Stratum (LSS) and the Non-agricultural Stratum (NAS). For the purposes of the LCMSIII survey, about 7, 5 and 3 households were supposed to be selected from the SSS, MSS and NAS, respectively. The large scale households were selected on a 100 percent basis. The urban SEAs were implicitly stratified into low cost, medium cost and high cost areas according to CSO's and local authority classification of residential areas.

About 15 and 25 households were sampled from rural and urban SEAs, respectively. However, the number of rural households selected in some cases exceeded the desired sample size of 15 households depending on the availability of large scale farming households.

The selection of households from various strata was preceded by assigning fully responding households sampling serial numbers. The circular systematic sampling method was used to select households. The method assumes that households are arranged in a circle (G. Kalton, 1983) and the following relationship applies:

Let $N = nk$,

Where:

N = Total number of households assigned sampling serial numbers in a stratum

n = Total desired sample size to be drawn from a stratum in an SEA

k = The sampling interval in a given SEA calculated as $k=N/n$.

Weighting

Due to the disproportionate allocation of the sample points to various strata, sampling weights are required to correct for differential representation of the sample at national and sub-national levels. Please refer to section 2.7.1 of the Survey Report under External Resources for the formulae used for calculation of sample weights and estimation process.

Questionnaires

Overview

Two types of questionnaires will be used in the survey. These are:-

1. The Listing Booklet - to be used for listing all the households residing in the selected Standard Enumeration Areas (SEAs)
2. The Main questionnaire - to be used for collecting detailed information on all household members.

The Main Household questionnaire was divided into two parts, namely:-

1. Main Questionnaire Part I - used for collecting information on the various aspects of the living conditions of the households.
2. Main Questionnaire Part II - all the information collected using the household expenditure diary was later on transcribed to this questionnaire in aggregates so as to make computer data capturing easy. This part of the questionnaire was also used to collect information on household Income, Non-Farm enterprises and deaths in the households.

Data Collection

Data Collection Dates

Start	End	Cycle
2002	2003	N/A

Data Collection Mode

Face-to-face [f2f]

Data Collection Notes

Data collection was done by way of personal interviews using two structured questionnaires. These questionnaires are Main Household Questionnaire and the Price Questionnaire. The Main Household questionnaire was divided into two parts, namely:-

1. Main Questionnaire Part I - used for collecting information on the various aspects of the living conditions of the households.
2. Main Questionnaire Part II - all the information collected using the household expenditure diary was later on transcribed to this questionnaire in aggregates so as to make computer data capturing easy. This part of the questionnaire was also used to collect information on household Income, Non-Farm enterprises and deaths in the households.

Administration of the Household Expenditure Diaries: The reference period for all the household consumption data was 31 days. The choice of 31 days as reference period is in order since the longest month in a normal calendar year has 31 days. The diary method was employed to collect household consumption expenditure data. Each diary was designed to accommodate diary entries for a period of 5 days after which another diary was dropped with the household during the next visit. However, households were requested to make diary entries pertaining to 6 days during the sixth visit so that we have 31 days of total diary entries for all the households.

In order to effectively spread the Interviewers workload of checking and filling in diaries and also enhance the quality of diary entries, households were grouped in 5 batches of 3 and 5 in rural and urban areas, respectively. Each household with a literate person was visited 7 times by the Interviewer. However, households that could not fill in the diaries by themselves were assisted by the Interviewer on a daily basis; hence the need to batch up households in manageable groups.

Questionnaires

Two types of questionnaires will be used in the survey. These are:-

1. The Listing Booklet - to be used for listing all the households residing in the selected Standard Enumeration Areas (SEAs)
2. The Main questionnaire - to be used for collecting detailed information on all household members.

The Main Household questionnaire was divided into two parts, namely:-

1. Main Questionnaire Part I - used for collecting information on the various aspects of the living conditions of the households.
2. Main Questionnaire Part II - all the information collected using the household expenditure diary was later on transcribed to this questionnaire in aggregates so as to make computer data capturing easy. This part of the questionnaire was also used to collect information on household Income, Non-Farm enterprises and deaths in the households.

Data Processing

Data Editing

Data Processing and Analysis: The data from the LCMSIII survey was processed and analyzed using the CSPRO and the Statistical Analysis System (SAS) software respectively. Data entry was done from all the provincial offices with 100 percent verification, whilst data cleaning and analysis was undertaken at CSO's headquarters.

Living Conditions Monitoring Survey Report 2002-2003

Title	Living Conditions Monitoring Survey Report 2002-2003
Author(s)	Central Statistical Office, Zambia
Date	2004-11-01
Country	Zambia
Language	English
Publisher(s)	Living Conditions Monitoring Branch, Central Statistical Office Zambia
Description	The Living Conditions Monitoring survey Report 2002/2003 highlights some key aspects of the living conditions of the Zambian population. Therefore, the results presented in this report are by no means exhaustive on any topic covered but only attempt to highlight salient aspects of living standards among various population subgroups at national, provincial and location level. A separate report on poverty is being compiled alongside this main report. Additional tabulations and analyses not included in this report can be provided to users on request. Also obtainable on demand are the LCMSIII data sets for those who wish to do further analysis.

Foreword (i)
List of Tables (viii)
List of Figures (xiii)
List of Abbreviations (xvi)
Executive Summary (xvii)
CHAPTER 1: OVERVIEW ON ZAMBIA
1.0. Introduction 1
1.1. Land and the People 1
1.2. Politics and Administration 1
1.3. Developments in the Zambian Economy 1
1.4. Development in the Social Sectors 2
CHAPTER 2: SURVEY BACKGROUND AND DESIGN METHODOLOGY
2.1. Survey Background 3
2.2. Poverty Monitoring Framework 3
2.3 Justification and Objectives of the LCMSIII (IS) Survey 3
2.4. Scope of the LCMSIII Survey 4
2.5. Sample Design and Coverage 5
2.5.1 Sample Stratification and Allocation 5
2.5.2 Sample Selection 5
2.5.3 Selection of Standard Enumeration Areas (SEAs) 6
2.5.4 Selection of Households 6
2.6. Data Collection 7
2.6.1 Administration of the Household Expenditure Diaries 7
2.7. Estimation Procedure 8
2.7.1 Sample weights 8
2.7.2 Estimation Process 9
2.8. Data Processing and Analysis 9
CHAPTER 3: GENERAL CONCEPTS AND DEFINITIONS 10
CHAPTER 4: DEMOGRAPHIC CHARACTERISTICS OF THE POPULATION
4.0. Introduction 13
4.1. Population Size and Distribution 13
4.2. Marital Status 16
4.3. Distribution of Households and Average Household Size 17
4.3.1. Age of Household Head 18
4.3.2. Female Headed Households 19
4.3.3. Poverty and Household Size 19
4.4. Relationship to Household Head 20
4.5. Prevalence of Deaths in the Household 20
4.6. Causes of Death 21
4.7 Prevalence of Orphan-hood 23
4.7.1. Poverty and Orphan-hood 25
4.8. School Attendance of Orphans 25
4.9. Disability 26
4.10. Summary 27
CHAPTER 5: MIGRATION
5.1 Introduction 29
5.2 Levels of Migration 29
5.2.1 Individual Migration 29
5.2.2. Household Migration 32
5.3 Direction of Migration 33
5.4 Reasons for Migrating 34
5.5. Summary 34
CHAPTER 6: EDUCATION
6.1. Introduction 35
6.2. School Attendance 35
6.3. Gross Attendance Rates 38
6.4. Net Attendance Rates 39
6.5. Type of School Attending 41
6.6. Level of Education of the Population 41
6.7. Reasons for leaving/never attending School 42
6.8. Summary 43
CHAPTER 7: HEALTH
7.0. Introduction 44
7.1. Prevalence of illness 44
7.2. Most Common Symptoms/illness 46
7.3. Health Consultation 49
7.3.1. Institution visited 51
7.3.2. Personnel Consulted 52
7.3.3. Mode of Payment for Consultation 53
7.3.4. Average amount paid for Consultation/Medication 54
7.4. Summary 54
CHAPTER 8: ECONOMIC ACTIVITIES OF THE POPULATION
8.1. Introduction 56
8.2. Concepts and Definitions 56
8.2.1. The Economically Active Population (or Labour Force) 56
8.2.2. Labour Force Participation Rate 56
8.2.3. The Employed Population 56
8.2.4. Employment Status 57
8.2.5. Unemployed Population 57
8.2.6. Unemployment Rate 57
8.2.7. Inactive Population 57
8.3. Economic Activity Status 58
8.3.1 Labour Force Participation Rates 59
8.3.2 Unemployment Rates 60
8.4 Employment Status, Industry and Occupation of Employed Persons 63
8.4.1 Distribution of Employed Persons by Industry 63
8.4.2 Distribution of the Employed Persons by Occupation 64
8.4.3 Distribution of the Employed Persons by Employment Status 65
8.5. Informal Sector Employment 66
8.6 Secondary Jobs 69
8.7. Proportion of Persons Changing Jobs 71
8.7.1 Reason for changing jobs 71
8.8 Income Generating Activities among Persons Presently Unemployed or Inactive 72
8.9 Summary 73
CHAPTER 9: CHARACTERISTICS OF NON-FARM ENTERPRISES
9.0. Introduction 74
9.1. Basic Characteristics of Non-farm Enterprises 74
9.1.1. Ownership of Non-farm Enterprises 74
9.1.2. Non-farm Enterprises by Type of Activity 74
9.1.3. Period of Operation 75
9.1.4. Major Constraints in Establishing the Enterprise 76
9.1.5. Main Source of Capital for Setting up Enterprise 76
9.1.6. Main Source of Credit 77
9.2. Summary 78
CHAPTER 10: HOUSEHOLD FOOD PRODUCTION
10.1. Introduction 79
10.2. The Extent of Agricultural Production 79
10.2.1. Agricultural Households 79
10.2.2. Food Crop Growing Agricultural Households 81
10.2.3. Other Staple Food 81
10.2.4. Other Food Crops 83
10.3. Ownership of Livestock 84
10.4. Ownership of Poultry 86
10.5. Summary 88
CHAPTER 11: HOUSEHOLD INCOME AND ASSETS
11.0. Introduction 89
11.1. Definitions 89
11.2. Distribution of Households by Income Group, Residence, Poverty Status, Stratum and Province, 2003 90
11.3. Distribution of Household Income by Sex, Age and Educational Level of Household Head, 2002-2003 93
11.4. Mean Per Capita Income by Sex of Head, Residence, Stratum, and Province, 2003 94
11.5. Income Distribution by Residence and Per Capita Income Deciles; Lorenz Curves and Gini coefficient; 2002-2003 95
11.6. Household Income by Source, Residence, Stratum, and Province; 2002-2003 97
11.7. Household Ownership of Assets by Type of Asset and Sex of Household Head; 2002-2003 98
11.8. Summary 99
CHAPTER 12: HOUSEHOLD EXPENDITURE
12.0. Introduction 102
12.1. Average Monthly Household Expenditure 103
12.2. Household Expenditure on Food and Non Food 103
12.3. Percentage Share of Household Food Expenditure 104
12.4. Percentage share of household Budget on Non Food Expenditure 106
12.5. Percentage share of own Produce Food Consumed 107
CHAPTER 13: POVERTY ANALYSIS
13.0 Introduction 109
13.1. Data Requirements for Money-Metric poverty Analysis 109
13.2. Constructing Relevant Consumption Aggregates 110
13.3 Adjusting for Differences in Cost of Living 110
13.4 Adjusting for Differences in Household Size and Composition 112
13.5. Construction of the Food basket 112
13.6. Determination of the Absolute Poverty Lines 113
13.7. Estimates of Poverty 114
13.8. Incidence of Poverty among Individuals by location and Provinces 115
13.9. Incidence of Poverty among Individuals by Stratum 116
13.10. Incidence of Poverty among Individuals by Survey Quarter 117
13.11. Intensity of Poverty among Individuals 117
13.12. Perception of Poverty 119
13.13. Reasons for Household Poverty 120
13.14. Household welfare Comparisons 121
13.15. Average Number of Meals in a Day and Required Household Monthly Income 123
13.16. Household Coping Strategies 124
13.17. Summary 125
CHAPTER 14: HOUSING CHARACTERISTICS, HOUSEHOLD AMENITIES AND ACCESS TO FACILITIES
14.0. Introduction 127
14.1. Housing Characteristics 127
14.1.1. Type of Dwelling 127
14.1.2. Construction materials of roofs, walls and floors 129
14.2. Tenancy Status of Dwelling 132
14.3. Household Amenities 133
14.3.1. Source of Drinking Water During The Wet Season 133
14.3.2. Sources of Drinking Water during the Dry Season 134
14.3.3. Treatment/Boling of Drinking Water during the Wet and Dry Season 135
14.3.4. Sources of Lighting Energy 136
14.2.5. Sources of Cooking Energy 137
14.3.6. Types of Cooking Devices 139
14.3.7. Garbage Disposal 139
14.3.8. Toilet facilities 140
14.4. Access to Facilities 141
14.4.1. Proximity to facilities 141
14.4.2. Walking time to facilities 142
14.4.3. Reason for not using facilities 143
14.4.4. Reasons for not using facilities 144
14.5. Summary 146
CHAPTER 15: CHILD HEALTH AND NUTRITION
15.0. Introduction 148
15.1. Child Feeding Practices 148
15.1.1. Breast Feeding and Supplements 148
15.1.2. Frequency of Feeding on Solid Foods 150
15.2. Immunization 151
15.3. Child Nutritional Status 153
15.4. Summary 156
